2. CHEMICAL ROOM.

1	microscope	\$60 00
2	distilling apparatuses	16 50
1	scale	5 00

1 hydrometer	\$1 40
1 hydrometer for alkali	56
1 hydrometer for milk	56
1 hydrometer for salt	56
1 hydrometer for ammonia	56
1 hydrometer for bark liquor	56
1 hydrometer for acid	56
1 hydrometer for vinegar	56
1 hydrometer for coal oil and benzine	56
1 U. S. standard hydrometer	1 30
1 lactscope	3 00
1 pioscope	55
1 Platner's blow pipe	2 25
1 set Battersea crucibles	1 67
1 set cork borers	1 50
½ doz. 2-oz. reagent bottles	20
5 doz. 6-oz. reagent bottles	7 00
1 doz. 1-oz. reagent bottles, wide mouth	1 20
1 5-gal. injecting bottle	4 75
1 ½-pt. graduate	60
1 2-drachm graduate	30
1 120-c. c. graduate	25
1 5-c. c. graduate	15
2 adjustable filter stands	2 50
1 revolving burette stand	2 25
3 evaporating dishes	65
2 desiccators	3 30
2 gas washing bottles	1 25
2 retorts	75
1 Squibb's separatory funnel	1 50
6 pipettes	1 25
3 doz. rubber stoppers	1 00
3 wing-top burners	50
1 twine reel	50
4 connecting tubes	60
8 funnels, bell-shaped	1 20
1 alcohol lamp	25
1 doz. test tubes	10
1 ½ doz. 1-qt. reagent bottles	5 25
7 16-oz. reagent bottles	2 00
½ doz. wash bottle tops	30
3 lbs. acetic acid	1 50
2 lbs. oxalic acid	40
30 gm. naphthylamine	15
30 gm. phenyl-hydrazin hydrochloride	36
30 gm. dimidthylamido hydrochloride	52
Filter paper	5 00
7 lbs. nitric acid	4 00
1 doz. horn spoons	1 00

Total Chemical Room.....

\$149 18

3. SUPPLY ROOM.

1 Babcock tester	\$12 00
1 Arnold's steam sterilizer	22 50
1 centrifuge	5 00
1 condenser still	15 00
1 Becker balance and weights	100 00
1 set Groche platinum crucibles	16 00
1 Squibb's separatory funnel	1 50
2 distilling apparatuses	3 45
1/2 doz. desiccators	9 50
1 1/2 doz. crucibles	3 42
1 doz. evaporating dishes	3 00
1 copper water bath	1 90
1 filtering flask	40
4 specific gravity bottles	90
1 apparatus for extraction	2 00
1 crucible tong	1 00
4 aluminum dishes	2 00
2 hydrometer jars	2 00
2 Bunsen burners	40
2 iron tripods	40
1 doz. support rings	1 80
3 iron supports	1 60
1 wooden filter support	70
2 w. w. mortars	1 25
1/2 doz. weighing bottles	2 00
1 bell-shaped funnel	15
2 distilling flasks	1 50
6 reagent bottles, wide mouth	75
1 doz. reagent bottles	2 00
1 doz. glass bottles	3 20
2 glass stoppered prep. vials	2 25
3 funnels	1 00
2 doz. Koch flasks, all sizes	9 00
1/2 doz. Wolf bottles	2 25
1 doz. test tubes with base	2 25
5 doz. test tubes	1 50
6 stirring rods	10
Corks	1 75
2 oz. ammonium molybdate	80
1/2 lb. ammonium ferrous sulphate	46
1/2 lb. ammonium sulphate	25
1/4 lb. ammonium thio sulphate	10
3 oz. ammonium sulpho-syanate	10
1/4 lb. ammonium ozalate	25
3/4 lb. ammonium chloride	78
1 lb. ammonium nitrate	60
1/4 lb. ammonium citrate carbonate	18

$\frac{1}{2}$ lb. ammonium oxalate	\$0 70
$\frac{1}{4}$ lb. ammonium fluoride	50
$\frac{1}{4}$ lb. ammonium phosphate	68
$\frac{1}{2}$ lb. ammonium hydrosulphite	30
4 lbs. ammonia water	2 00
$\frac{1}{2}$ lb. aluminum and iron sulphate	30
1 oz. antimony chloride	19
$\frac{1}{4}$ lb. barium hydrate	34
$\frac{1}{2}$ lb. barium carbonate	49
$\frac{1}{4}$ lb. barium chloride	33
$\frac{1}{4}$ lb. barium nitrate	39
1 lb. cadmium sulphate	47
$\frac{1}{4}$ lb. calcium oxide	24
2 oz. calcium sulphate	08
1 lb. calcium carbonate	75
$\frac{1}{2}$ lb. animal charcoal	05
1 lb. carbon disulphide	45
$\frac{1}{4}$ lb. copper	40
6 oz. copper sulphate	25
1 lb. copper oxide	1 00
$\frac{1}{4}$ lb. copper acetate	1 53
1 lb. chromium and potassium sulphate	83
1 oz. chromium sulphate	29
1 oz. iodide acid	95
1 lb. chloric acid	25
1 lb. hydriatic acid	50
1 oz. gallic acid	06
1 oz. hydrofluoric acid	1 50
1 lb. lead acetate	1 08
$\frac{1}{2}$ lb. lead oxide	50
$\frac{1}{4}$ lb. lead acetate	54
3 oz. iron sulphate	22
$\frac{1}{4}$ lb. iron sulphide	10
$\frac{1}{4}$ lb. iron and ammonia sulphate	20
$\frac{3}{4}$ lb. iron chloride	60
1 oz. mercury oxide	22
5 lbs. mercury	4 00
2 oz. mercury nitrate	80
$\frac{3}{4}$ lb. manganese peroxide	25
$\frac{1}{2}$ lb. magnesium carbonate	50
$\frac{1}{4}$ lb. molybdic acid	50
1 oz. potassium sulpho-cyanite	10
1 oz. potassium nitrate	05
1 oz. potassium arsenate	08
1 oz. potassium arsenite	25
1 oz. potassium iodide	20
1 oz. potassium antimonate	36
1 oz. potassium chromate	15
$\frac{1}{4}$ lb. potassium bisulphate	13

1 oz. potassium ferrous cyanite.....	\$0 50
$\frac{1}{4}$ lb. potassium binoxolate	29
$\frac{1}{4}$ lb. potassium chloride	24
3 oz. potassium hydrate	80
3 oz. potassium chlorate	24
$\frac{1}{4}$ lb. potassium bromide	30
$\frac{1}{4}$ lb. potassium bisulphate	12
3 oz. potassium ferro cyanite	50
2 oz. potassium nitrate	11
150 gm. potassium sulphide	25
$\frac{1}{2}$ oz. potassium permanganate	11
$\frac{1}{4}$ lb. manganese chloride	97
1 oz. phospho-molybdic acid	15
2 oz. phosphoric acid	20
1 lb. potassia sticks	14
2 oz. picric acid	20
$\frac{1}{2}$ oz. phenolphthalin	35
2 oz. sodium and ammonium phosphate	30
2 oz. sodium nitrate	08
1 oz. sodium iodate	55
1 oz. sodium bisulphite	10
1 oz. sodium sulphate	05
1 oz. sodium tungstate	10
$\frac{1}{4}$ oz. nitro-prussiate sodium	30
6 oz. sodium borate	80
2 oz. sodium acetate	10
2 lbs. sodium bisulphide	20
1 lb. sodium biborate	1 40
$\frac{1}{4}$ lb. sodium bicarbonate	35
$\frac{1}{4}$ lb. sodium phosphate	35
3 lbs. sodium sulphate	30
$\frac{1}{4}$ lb. sodium carbonate	30
$\frac{1}{4}$ lb. zinn metal	47
1 oz. ferrum cyanide	14
2 oz. nickel sulphate	40
1 oz. uranium nitrate	54
3 oz. powdered zinn	15
1 oz. uranium acetate	27
$\frac{1}{2}$ oz. cobald nitrate	28
$\frac{1}{4}$ lb. strontium nitrate	44
$\frac{1}{4}$ lb. sulphur	29
1 oz. sulphanic acid	45
$\frac{1}{4}$ lb. zinc chloride	34
$\frac{1}{4}$ lb. zinc sulphate	18
$\frac{1}{4}$ lb. salts of tartar	18
$\frac{1}{4}$ oz. strontium chloride	32
2 oz. tin metal	34
1 oz. metal fusible, wood	80
1 oz. metal fusible, rose	82

8 oz. vanillin, refined.....	\$0 75
1/8 oz. prussine	3 00
3/8 oz. indigotine	3 00
1 oz. diphenlamin	1 25
1 oz. naphtha alpha	42
1 oz. malic acid	06
1 oz. arsenous acid	05
1/4 lb. boric acid	30
3 oz. citric acid	35
1/4 lb. oxalic acid	15
1/4 lb. potassium	66
1 oz. sodium	50
1 oz. pyrogallic acid	50
1 oz. gutta percha sticks	79
3/4 lb. sulphuric acid	30
1/2 lb. methylic alcohol	60
1 lb. acetic ether	2 00
1 oz. benzine anthracite	1 00
2 lbs. tannin	50
1 lb. calcium sulphide	69
2 lbs. sulphurated iron	68
1 lb. mild mercurious chloride	1 08
1/4 oz. lacmus	10

Total Supply Room

\$303 88

4. MICROSCOPICAL ROOM.

3 Continental microscopes	\$315 20
1 objective, ser. 111 1-12	33 00
1 objective, ser. 11 3/4	5 25
1 objective, ser. 1 1-5	9 00
1 5-7 size lens	16 00
3 revolving microscope tables	22 50
3 condensers	16 50
1 stage micrometer	2 25
1 dissecting apparatus	5 00
1 new model minot, microtome and knife	67 00
1 case for same	5 00
1 Wolfihuegel counting apparatus	3 75
1 haemometer	26 25
1 camera lucida	15 00
1 Reynold's examining set	5 00
1 drawing board	10 50
1 Esmarch apparatus	5 07
1 manometer	5 00
3 Stratton illuminators	15 00
1 dehydrating apparatus	5 00

1 compressor	\$1 50
1 cover glass gauge	2 25
1 nivelating apparatus	6 75
1 chemical scale	12 75
3 adjustable laryng. c. brackets	17 55
1 Loring ophthalmoscope	13 50
2 oak cabinets	60 00
3 reagent cases	9 00
3 Moore's burettes	4 20
1 revolving glass stand	7 00
3 bulb pipettes	1 00
1-3 doz. 4-in. bell glasses	1 80
1-6 doz. 6-in. bell glasses	1 28
1 extracting apparatus	1 50
5 graduates	60
5 calcium chloride tubes	95
½ doz. connecting tubes	1 20
½ doz. Pasteur flasks	1 80
½ doz. Soyka's flasks, graduated	4 50
½ doz. Soyka's flasks	2 70
1 doz. Sternberg's flasks	4 00
2 doz. Kock flasks	
2-3 doz. cylinder jars	3 60
4 doz. reagent bottles, wide mouth	4 00
1½ doz. reagent bottles, wide mouth	1 50
2 tube funnels	15
8 reagent bottles	1 00
½ doz. bottles	2 50
½ doz. horn spatula	36
1 doz. horn spoons	1 00
3 doz. cover glass forceps	1 50
10 oz. cover glasses	8 00
5 grs. slides	30 00
1 doz. test tubes with base	60
2 doz. potato tubes	1 80
75 gm. glass wool	1 80
3 kilo agar agar	3 00
1 quire tracing paper	1 00
Labels	1 00
50 gm. Ehrlich's triple mixture	1 50
25 gm. haematoxiniln	2 00
50 gm. methyl violet oxalic	60
400 gm. Chromogen formic	1 35
50 gm. eosine	1 50
50 gm. methyl violet	2 00
50 gm. eosine haema toxilin	35
80 gm. eosine methylin blue	80
100 gm. Nissel methyl blue	50
50 grams gentian violet	75

10 gm. aniline blue	\$0 30
10 gm. neutral roth	60
5 gm. thionin	75
10 gm. erotrosin	40
40 gm. chromogen	30
15 gm. methylin blue	45
5 gm. Sudan III	25
1 gm. sodium carbonate	20
10 c. c. Ziehl solution	75
25 gm. Berlin blue	23
1 oz. Brunswick black	10
25 gm. aniline red coralin	25
50 gm. Berlin blue	27
2 oz. Congo red	40
5 gm. rubin g.	10
5 gm. orange b. naphthol	08
10 gm. orange II	15
5 gm. golden orange	05
5 gm. delta purpurine	10
5 gm. Biebrich scarlet	10
20 gm. carmin	20
5 gm. fuchsic acid	10
5 gm. violet blue	10
15 gm. thymol	15
10 gm. benzo purpurine	30
15 gm. eosine yellowish	15
15 gm. eosine bluish	15
5 gm. rubin g.	10
10 gm. iodine green	10
15 gm. Bengal rose	40
20 gm. Congo red	20
25 gm. picric acid	35
35 gm. chromic acid	25
2 oz. strychnine	2 50
500 gms. methyline blue. Niss'l.	1 50
250 gms. xylol	50
5 gm. picro carmin	45
30 gm. fuchsin	1 50
25 gm. carmin	30
20 gm. necrosin	30
30 gm. Berlin blue	25
300 gm. Prussian blue	1 70
50 gm. quicksilver	10
25 gm. picric acid	37
25 gm. indigo	30
50 gm. chromic acid	30
50 c. c. Burril's stain	90
½ pt. benzol	30
150 c. c. methylated spirits	20

1 lb. glycerine	\$0 23
100 gm. Canada balsam	50
50 gm. pancreatin	2 20
50 gm. pepsin	45
400 gm. peptone	1 80
50 gm. oil of cedar	40
3 gm. fluoro glucin	80
5 gm. nitrate of silver	15
1 oz. white zinc cement	30
1 oz. Dean's medium	23
1 oz. gold size	19
1 gm. marine blue	30
100 gm. Gibb's double stain	75
1 oz. glycerin jelly	38
1 oz. extractum pancreatis	33
11 gm. bergamot oil	12
25 gm. clove oil	30
50 c. c. cedar oil	30
½ lb. hydrochlorid acid	25
20 gm. vermillion	1 20
100 gm. pyrogallie acid	90
100 gm. cajaput oil	1 00
15 vials blue litmus paper	1 20
15 vials red litmus paper	1 30
50. gm. oil origanum	1 20
½ doz. capillary tubes (Fleischer's)	1 80
2 microtome straps	2 50
1 haemoglobinometer	20 00
1 Janeway blood pressure apparatus	18 00
3 doz. cakes paraffin	5 40
9 oz. celloidin	8 10
Filter paper	3 00
Total Microscopical Room	\$912 69

5. BACTERIOLOGICAL ROOM.

1 refrigerator	\$25 00
1 autoclave	48 75
1 thermostat and incubator	70 00
1 small thermostat	11 50
1 hot sterilizer	16 50
1 Naples water bath	17 30
1 safety burner	3 50
1 centrifuge, complete	22 50
1 Bunsen blast lamp	2 70
1 retort support	1 50
1 doz. Fernbach's culture flasks	27 00

12 doz. preservation jars.....	\$12 50
3 test tube stands	60
1 Petri dish stand	30
2 corkscrews	15
4 clamps for Novy's apparatus	60
1 Hoffman clamp for rubber tubing	20
2 test tube clamps	25
6 mouse jars	9 00
1 filtering flask with side neck	40
4 graduated cylinders	3 00
3 volumetric flasks	80
3 Erlenmeyer flasks	45
1 doz. Kock flasks	3 00
2 hydrometer jars	1 00
4 large test tubes with base	40
1 1-qt. graduate	75
1½ doz. graduates, all sizes	4 00
2 glass stoppered bottles	2 00
1 glass mortar	75
6 doz. rubber stoppers	1 50
10 doz. rubber stoppers	5 00
3 anatomical jars	1 25
1 doz. reagent bottles	3 00
11 doz. bottles, all kinds	4 00
1 burette stand	2 00
2 Moore's burettes	2 80
1 rotary cork press	1 50
1 set cork borers	1 50
1 twine reel	50
1 thermometer	1 50
1 chemical scale	5 00
3 files	50
4 wing tops for blow pipes.....	75
1 Argand burner	70
1 section knife	3 00
100 preservation jars 400 c. c.....	10 50
100 preservation jars, 250 c. c.....	7 80
5 lbs. acetic acid	2 50
5 lbs. chloroform	3 00
4 lbs. hydrochlorin acid	3 25
1 hypodermic syringe	1 00
1 radical burner	1 50
1 standard boiling burner	3 00
2 adjustable support tables	3 00
1 hot water funnel on legs	4 00
10 wire baskets for test tubes	2 50
4 doz. water tumblers	1 00
1 5-gal. injecting bottle	4 00
1 doz. triangles	45

1 crucible tongs	\$0 60
4 wire filter supports	2 00
5 doz. Petri dishes	7 00
1 gross assorted corks	1 00
1 percolator, agate ware	40
5 doz. funnels, agate ware	90
2 medium pots	1 50
3 autoclave racks	75
1 wash boiler	1 30
1 water heater	4 00
1 warming table	60
1 graduate cylinder	1 50
1 paraffin imbedding table	1 20
1 lb. potassium acetate	60
6 lbs. alcohol	3 00
100 specimen jars	6 30
500 test tubes	5 00
Bottles, all kinds	5 00
Total Bacteriological Room	\$411 05

6. PATHOLOGIST'S PRIVATE RESEARCH ROOM.

1 manikin	\$700 00
1 microtome (Schanze)	200 00
1 c. c. continental microscope	103 13
1 dissecting microscope	39 00
1 mechanical stage	18 00
1 haemoglobinometer (Fleischel)	26 25
1 laboratory microtome	12 00
1 case for same	5 00
½ doz. bell glasses, low form	4 50
3 crystallization jars	1 10
1 doz. preparation dishes	5 10
1 doz. Hender dishes	1 00
5 doz. reagent bottles	5 00
½ doz. Kock flasks	60
5 small glass funnels	45
3 wash bottles	75
1 alcohol lamp	25
2 Stainach straining dishes	2 00
½ doz. Moore's straining dishes	4 50
1 doz. Coplin's straining jars	4 50
½ doz. watch glasses	40
2 doz. Syracuse watch glasses	9 00
4 specimen jars (ground in cover)	1 50
3 doz. preservation jars	2 70
6 doz. bottles, all kinds	60

1 section knife.....	\$2 40
1 bow strap	1 50
2 oil hones	2 25
6 graduates	2 00
1 cylinder	70
2 doz. bottles, all kinds	2 00

Total Pathologist's Private Research
Room

\$1,158 18

7. PHOTOGRAPHICAL ROOM.

1 micro-photo camera, complete	\$140 00
1 Carlton camera	94 00
1 projection lantern	60 00
1 ½-in. objective	11 25
1 3-in. objective	11 25
1 1-in. objective	9 75
1 perfection flash lamp	3 00
2 developing tongs	94
1 success mouter	1 28
3 trays	1 20
2 galvanized iron trays	2 25
2 vulcanite frames	1 95
2 agate ware frames	2 50
Developing agents	5 00
2 graduates	75
Bottles, all kinds	2 00

Total Photographical Room

\$347 12

8. MORTUARY.

5 wire corpse protectors	\$200 00
1 scale balance	28 00
1 wardrobe	15 00

Total Mortuary

\$243 00

9. LECTURE ROOM.

1 Fairbanks scale	\$29 00
14 porcelain pans	32 00
8 stock bottles	2 00
2 spirit lamps	75
1 electric fan	16 00
1 Bunson burner	75

Total Lecture Room

\$80 50

10. MUSEUM.

1 set Fuller model of brain	\$3 45
1 set Fuller model of brain, No. 1.....	8 50
1 set Fuller model of brain, No. 2.....	8 50
1 model of brain, 2 pieces	3 45
1 model of brain, 9 pieces	7 65
1 model of brain in vertical section	12 65
1 model of brain, mammoth	28 75
1 model Anzoux preparation of brain	75 00
1 model Anzoux spinal column	22 00
1 No. 1 skeleton	36 00
1 case for same	12 50
2 skulls	10 00
2 cut skulls	16 00
1 model Simian skull and brain	4 00
1 set disarticulated bones of skull	13 00
1 Persian balance	29 75
6 Crayon drawings by Joseph J. Gramling	50 00
30 museum jars, $7\frac{5}{8} \times 8$ in.....	55 00
16 museum jars, $7\frac{5}{8} \times 12$ in.....	35 00
4 doz. museum jars, $5\frac{1}{8} \times 12$ in.....	52 00
1 doz. museum jars, $3\frac{1}{2} \times 12$ in.....	8 00
5-6 doz. museum jars, $2\frac{1}{4} \times 12$ in.....	3 25
2 doz. museum jars, $2\frac{1}{4} \times 8$ in.....	9 00
1 1-3 doz. museum jars, $2\frac{1}{4} \times 4$ in.....	5 00
$1\frac{1}{2}$ doz. museum jars, $3\frac{1}{2} \times 6$ in.....	3 25
$1\frac{1}{2}$ doz. preservation jars, 400 c. c.....	2 00
13 specimen jars, 9×4 in.; 13 specimen jars, 6×4 in.; 14 specimen jars, 12×6 in.....	109 00
12 museum jars, 12×12 in.; 24 museum jars, 8×8 in.; 12 museum jars, 8×5 in.....	100 00
2 injecting bottles	7 00
4 funnels	70
4 graduates	1 25
1 w. w. mortar	45

Total Museum	\$719 10
--------------------	----------

11. INSTRUMENTS.

1 post-mortem case	\$70 00
1 special dissecting set	5 00
1 brain section knife	4 25
2 metal cartilage knives	3 00
2 mouse-tooth forceps	1 30
1 calvarian hook	1 50

1 needle	\$0 10
1 small dissecting set	1 00
1 tape measure	1 50
1 freezing microtome	12 00

Total Instruments	\$99 65
-------------------------	---------

12. FIXTURES, FURNITURE, ETC.

180 cane-seat chairs	\$224 00
6 rockers	6 00
5 stools	11 25
4 tables	33 50
2 stands	5 50
1 doz. reading chairs	16 50
2 office desks	24 50
3 office chairs	20 00
6 book cases	90 00
1 medium cabinet	5 00
25 pictures, framed	105 00
3 clocks	16 00
2 dissecting tables	50 00
348 yds. linoleum	362 50

STATE OF INDIANA

TENTH ANNUAL REPORT

OF THE

DEPARTMENT OF INSPECTION

OF

MANUFACTURING AND MERCANTILE ESTABLISHMENTS, LAUNDRIES,
BAKERIES, QUARRIES, PRINTING OFFICES, HOTELS
AND PUBLIC BUILDINGS.

TO THE GOVERNOR.

1906

INDIANAPOLIS:

WM. B. BURFORD, CONTRACTOR FOR STATE PRINTING AND BINDING.

1907.

OFFICIAL LIST 1906.

CHIEF INSPECTOR.

DANIEL H. McABEE.....Muncie, Delaware County.

CHIEF DEPUTY INSPECTOR.

DAVID F. SPEES.....Vincennes, Knox County.

STENOGRAPHER.

EDNA ROBINSON Lafayette, Tippecanoe County.

DEPUTY INSPECTORS.

HARVEY A. RICHARDS.....Muncie, Delaware County.

ARTHUR L. WRIGHT Indianapolis, Marion County.

THOMAS S. WILLIAMSON...Anderson, Madison County.

JAMES H. ROBERTS.....South Bend, St Joseph County.

STATE OF INDIANA,
EXECUTIVE DEPARTMENT,
INDIANAPOLIS, April 1, 1907. }

Received by the Governor, examined and referred to the Auditor of State for verification of the financial statement.

OFFICE OF AUDITOR OF STATE, }
INDIANAPOLIS, July 19, 1907. }

The within report, so far as the same relates to moneys drawn from the State Treasury, has been examined and found correct.

J. C. BILLHEIMER,
Auditor of State.

July 19, 1907.

Returned by the Auditor of State, with above certificate, and transmitted to Secretary of State for publication, upon the order of the Board of Commissioners of Public Printing and Binding.

FRED L. GEMMER,
Secretary to the Governor.

Filed in the office of the Secretary of State of the State of Indiana, July 19, 1907.

FRED A. SIMS,
Secretary of State.

Received the within report and delivered to the printer July 19, 1907.

HARRY SLOUGH,
Clerk Printing Bureau

TENTH ANNUAL REPORT
OF
DEPARTMENT OF INSPECTION.

Hon. J. Frank Hanly, Governor of Indiana:

Sir—I have the honor to submit herewith the tenth annual report of the Department of Inspection, for the year ending October 31, 1906.

I am pleased to place an exhibit in your hands not only of what has been accomplished by the enforcement of the various laws enacted for the protection of the lives, health and morals of those employed in the industrial establishments of the State, but of the general public at large who visit places of amusement, or are guests at hotels, or those who are assembled on the upper floors of many buildings.

The year just closed has been one of unprecedented activity in all industries of the State. The mechanic or laborer has not had to search for employment; the employment is searching for the workmen, with wages higher than at any previous period.

It is also gratifying to be able to state that with all the rush and overtime worked but one serious disaster has occurred, and in this but two persons of the many employed lost their lives. The report will show that from the creation of the department, deaths and serious injuries as the result of dangerous machinery have gradually decreased, excepting on shafting. Despite all our care, loose clothing and too much haste have prevented any reduction from this cause.

CHILD LABOR.

The subject of child labor is one that has attracted the attention of philanthropists and sociologists to an extent never before known. In their conferences, where the laws of the different States and their enforcement have been discussed, I do not recall an adverse criticism of either with reference to the State of Indiana.

Our present law, passed in 1897, and amended in 1899, with a few slight changes, would be equal to that recommended by the National Child Labor Committee, which is given as, and really is, a model. Our law permits the employment of minors between the ages of fourteen and sixteen years for sixty hours per week. Under the existing conditions, more particularly in the larger mercantile establishments, these hours are too long, especially on Saturdays and the weeks preceding the holidays, when they are on duty until 10 p. m. The ten-hour-per-day law is evaded by extending the noon and lunch hours so that while they have only been employed ten hours, it has been thirteen or fourteen hours from the time they first reported for duty. These long intervals for meals have a demoralizing effect upon the cash girls and boys who are on the streets away from all parental or other control the greater portion of the time.

The State of Illinois has reduced the hours of those between fourteen and sixteen to forty-eight per week. The National Child Labor Committee recommends the same hours. Would respectfully recommend such change in our law in the interest of health and morals for those under sixteen years of age.

Our present law does not prohibit night work of boys between fourteen and sixteen years of age, as does that of Ohio, Illinois and Minnesota. By referring to our report for 1905, I find there were employed in the glass industries of the State six hundred and thirty boys between the ages of fourteen and sixteen years. They are about the only ones who would be affected should any change be made. There is and has been a scarcity of this kind of help in the glass industries since the enactment of the law in 1897, notwithstanding that machinery has taken the place of hundreds of boys. One factory alone which reported two hundred and sixty boys under sixteen, in 1897, now reports but thirty-five, although they have more than doubled their output.

BAKESHOPS.

The Bakeshop or Sanitation Law has accomplished more in the way of cleanliness than its friends anticipated. Bakeshops, confectionery, canning and preserving establishments have all been subject to a rigid inspection. Orders to scrape, wash or paint all woodwork, lime wash sidewalls and ceilings and provide drains to sewers have been issued and complied with, thus improving the sanitary conditions.

It would greatly increase the efficiency of the Department should the number of deputies be increased so we might have the assistance of a practical baker.

BOILER INSPECTION.

The General Assembly of 1903 enacted a boiler inspection law. Owing to the many interests opposing such a measure concessions had to be made in order that a law of some kind might be had; that its provisions are limited in their usefulness is true; that there is a law of any kind on this subject is a great gain. Defective as it is, it has shown the importance of having all boilers regularly inspected by a thoroughly competent inspector.

On account of the lack of office help, we are unable to state the number of boilers that have been condemned, or how many dangerous defects have been ordered repaired. Boilers have been inspected and condemned that had never been inspected from the time they were installed and were found in a most dangerous condition. In some cases the owners admitted they were not safe, yet because there was no person with authority to condemn they continued to use the boilers, while their better judgment was that their use should have been discontinued.

The present law should be amended by requiring all insurance companies and inspectors doing business in the State to furnish this Department with a copy of all inspections made by them, and should they cancel or refuse a policy, because of dangerous defects, they should notify the Department without delay. The Department could then prohibit their use until they were placed in a safe condition.

It is too frequently the case that where certain changes are requested the parties in charge refuse to comply because they are not convinced that they are necessary, allowing the policy to be canceled and they taking the chances. Two destructive explosions have occurred recently. Had the Inspector's orders been complied with they would not have happened.

There are a number of boilers in use that insurance companies have refused to insure because of dangerous defects. Just recently, in a municipal plant, the insurance policies had been canceled by two companies, but were accepted by the third. On their next visit, however, they requested the reduction of the pressure to ninety pounds. This the assured refused to do. The policy was canceled and the higher and dangerous pressure continued. In

order that they might be within the meaning of the law, they secured the service of local inspectors who gave them permission to carry the higher pressure.

When this Department secured all the facts in the case the local inspection was ignored and the pressure reduced to what the insurance companies directed. The two most destructive explosions that occurred recently would not have happened had not those in charge thought they knew more about the boilers than the inspectors and refused to carry out their instructions.

There have been sixteen explosions of boilers in this State in the past year, causing six deaths and thirteen injuries. In the last seven years our reports show that there have been sventy-six explosions, causing forty-nine fatalities and one hundred and eight injuries. That most of these could have been prevented with proper inspection and competent men in charge is proved by the fact that Massachusetts, with more than twice as many people employed in her factories as Indiana, did not have a single explosion in nine years. It is the only State with such a record, and it can only be attributed to the care exercised by those who make the inspections and the Licensing Engineers' Law, which is strictly enforced.

The same results can be had in this State with similar laws, and without great cost to the State, as fees for inspections and licenses would about cover the expense.

BOAT INSPECTION.

Frequent complaints have been made by those who have had occasion to be on some of the boats on the lakes of the State. There are none of these lakes large enough to come under the care of the national laws, yet they are of such dimensions that unless some precautions are taken by the State a large number of lives will be lost. I am informed that boats are overloaded, safety valves weighted beyond a safe pressure, with no provision made to meet an emergency should one arise.

The present law only provides for the inspection of the boilers and machinery. The certificate of authority to operate such boat does not prevent the overloading of either the boat with passengers or the boilers with steam, either of which is a very dangerous practice. Even when not overloaded, provision should be made to meet any accident or emergency that might arise.

That this may be done, a new law and regulations should be had. The inspection of these boats would give better results were they inspected by a member of this Department, and respectfully recommend that such changes be made in the law.

NEW DANGERS.

Quite recently the daily press has given an account of panics in two theaters of our State, one in this city and one in Evansville. In both cases they were caused by a cinematograph or moving picture machine. Fortunately, there were no fatalities, although many were quite seriously injured. At Greenwood, a gas tank of a somewhat similar machine exploded, killing two persons and injuring a third. The explosion occurred just before the performance. Had it occurred later when the house was filled, the results would probably have been much more disastrous.

Some eastern States that have had more experience with these traveling machines have very stringent laws regulating their use. Respectfully recommend a similar law in this State.

NEEDS OF THE DEPARTMENT.

In order that the Department may be as effective as the people expect it should be in the enforcement of all the laws which are primarily for the protection of life, health and morals of not only those who are employed in industrial establishments, but of those who visit places of amusement or are guests at hotels, the force of deputies should be increased.

The mammoth plant under construction on the lake front, near Hammond, which will surpass any similar works of its kind, will require the attention of a deputy the greater part of his time, providing they are as reckless with the lives of their employes as are plants in and near Pittsburg, Pennsylvania. Our report for this year will show more than two hundred thousand workmen alone in the factories and shops of the State.

A comparison of the amount and character of the work performed by this Department with that of other States having Departments of Inspection will demonstrate that we are handicapped for want of sufficient force. The following list shows the number of deputies and salaries in each of the States named:

New York, thirty-eight deputy inspectors, \$1,000 and expenses.

Massachusetts, twenty-eight deputy inspectors, \$1,500 and expenses.

New Jersey, eleven deputy inspectors, \$1,000 and expenses.

Pennsylvania, thirty-nine deputy inspectors, \$1,200 and expenses.

Ohio, fifteen deputy inspectors, \$1,000 and expenses.

Illinois, eighteen deputy inspectors, \$1,000 and expenses.

Michigan, sixteen deputy inspectors, \$1,000 and expenses.

Wisconsin, ten deputy inspectors, \$1,000 and expenses.

Indiana, five deputy inspectors, \$1,000 and expenses.

With this showing, I most respectfully recommend that the number of deputies be increased by three, and one clerk in the office.

INTERNATIONAL CONVENTION.

I had the privilege of attending the twentieth annual convention of the International Association of Factory Inspectors, held in Columbus, Ohio, June 19th to 21st. These assemblies are attended by the inspectors of the various States and provinces and are of great value to all who are interested in the welfare of those whom inspection laws are intended to benefit.

The meeting for 1907 will be held in Hartford, Conn. Would most respectfully request that at least three members of this Department be permitted to attend. The information received by them in visiting the large manufacturing plants and the interchanging of views and experiences will be of such a character that they and the State will be well repaid for the outlay.

WORK IN OFFICE.

There have been four thousand four hundred and twenty-eight inspections made, requiring the issuing of two thousand five hundred and forty-eight orders for the better guarding of dangerous machines, elevators, repairing of defective boilers, improved sanitary conditons, fire escapes on hotels and public buildings. We also have received and examined two thousand two hundred and eighty-nine certificates of boiler inspections; received and referred for further investigation or other dispositon, two thousand and eighty-seven accident reports; executed seven hundred and thirty-six affidavits, without charge; mailed to the manufacturers and others of the State two thousand reports of 1905, and not less than four thousand parcels containing laws and blanks as provided for in the law; compiled and have ready for the printer a report of two hundred and twenty pages. Our letter book shows we have answered eleven hundred and sixty-seven letters.

Most respectfully submitted.

D. H. McABEE,

Chief Inspector.

RECAPITULATION AND COMPARISON WITH LAST REPORT (1904-5).

EXHIBIT C.

Detailed Statement of Accidents Reported

TO THE

DEPARTMENT OF INSPECTION

FOR

Year Ending September 30, 1906.

The following is an explanation of abbreviations used:

Extent of Injury: F.—Fatal; Se.—Serious; Sl.—Slight.

In order that the report may be more promptly issued, the accidents are reported from October 1, 1905, to October 1, 1906.

EXHIBIT C—INJURIES.

Number.	Date of Injury.	Name of City or Town and Persons Injured.	Age.	Married.	Cause of Injury.	Nature of Injury.	On Machinery.	Extent of Injury.	Time Lost in Days.	Wages Lost.	Wages Paid During Disability.	Benefits from Other Sources.	Burial or Medical Expenses.	By Whom Paid.	Dependent Persons.
	1906.	Aetna.													
1	Oct. 2	Grimmer, William	32	M.	Powder explosion.	Burned and mangled.	No	F.					\$100 00	Company	1
2	Oct. 2	Nicholsen, L. V.	34	M.	Powder explosion.	Burned and mangled.	No	F.					100 00	Company	3
		Alexandria.													
828	June 29	Isgrig, Geo.	33	M.	Unguarded gears.	Shoulder bruised.	Yes	Se.	54		\$32 00		35 00	Company	1
1072	Sept. 18	Poling, Henry	45	M.	Electric crane.	Side crushed.	Yes	F.					55 00	Company	1
554	Mar. 13	Sater, Roy	24	M.	Belt and pulley.	Hand amputated.	Yes	Se.	36		75 00		160 00	Company	1
3	Oct. 23	Tolle, James	25	M.	Paper dryer.	Crushed.	Yes	F.							
		Anderson.													
593	Feb. 1	Alexander, Walter	19	S.	Dough brake.	Hand crushed.	Yes	Se.	36	\$39 00			25 00

EXHIBIT D.

Selections from the 2,548 Orders Issued

BY THE

DEPARTMENT OF INSPECTION.

Showing the lines along which the Department is working, as well as the many phases of knowledge necessary for the proper discharge of the duties.

These orders are revised, corrected and mailed by the Chief Inspector on blanks prepared for that purpose from the office, 91 State House, where all communications with reference to same should be addressed.

EXHIBIT D.

SELECTIONS FROM THE 2,548 ORDERS ISSUED BY THE DEPARTMENT OF INSPECTION.

February 26.—Inclose floor end of drive belt and pulley in rattler room, after completing other changes in said room now under way; adopt, as soon as possible, some practical means for the removal of unwholesome gases and smoke from your core room when air currents are unfavorable to natural draft.

February 26.—Place a substantial gear shield before the inmeshing side of gears on two large power punches on west side in boiler shop, and on one small punch press on east side in shop, as pointed out to Mr. Maley; posting State Factory Law in each building (foundry and boiler shop).

Note.—Three days after inspection, and before the changes recommended had been made, one of the shop workmen suffered loss of one leg in the gears above referred to.

March 9.—Provide and attach, to the east side, a shield or guard over the reciprocating parts and cable cam on dough divider machine; apply a permanent holder (one that can not be removed) on belt shifter to prevent the shifting of belt to tight pulley while machine is being cleaned; report all accidents to this Department; and post State Factory and Sanitation laws and notices in each work room of your bakery.

March 16.—Connect, at once, your exhaust fan and flues with raveling machines, and keep same in working order and in use for the purpose designed.

March 16.—Provide and attach a shield or guard over revolving paper cutter having saw-teeth edge, and operated by a woman; place a board or screen shield along south rail of each twisting reel as safeguard, on second floor in twisting room.

March 16.—Cover exposed drive shaft in women's sewing room; house in the bevel gear on west end of three Nordyke & Marmon bolting reels next to west wall, in mill B; inclose four bevel gears on new steamer, second floor, and house in two exposed conveyor gears in mill basement.

March 28.—Replace the present defective lifting cables of your elevator with new cables as soon as possible.

April 2.—Provide, at once, suitable water closets, properly screened and well ventilated, for the use of employes of each establishment, namely: The Monarch Governor & Machine Company, The Advance Machine & Sup-

ply Company, and The Crescent Soap Company; such water closets shall be arranged for the males and females, separately; the closets now in use are open, exposed, unsafe, unsanitary and are not separate as required by law.

April 6.—Provide ample and proper means of ventilation for the work rooms now used by you as sewing or machine rooms. Authorities agree that not less than thirty cubic feet per minute should be supplied for each workman in the room.

April 14.—Raise the height of your elevator safety gates so persons can not pass head over top bar, or attach "tell-tales" eighteen to twenty-four inches long on the front and under side of elevator platform; provide knotted ropes, one on each third and fourth floors to reach to the ground, for use in event of fire below third floor until such time as more persons are employed above, when a regular outside fire escape must be placed; post one copy of State Factory Law above each floor.

May 1.—Have your boiler inspected, internally, every six months, as required by law; keep certificates of such inspections on file and mail copies of the same to this Department.

This boiler must not be operated until the safety valve has been freed and actual condition of the boiler has been made known.

May 1.—Have the three exposed gear wheels on elevator motor mechanism inclosed under shield, on third floor; place some safeguard that will prevent a workman falling or stepping into floor opening between large tanks, on fourth floor, in effort to turn hot water valve; place some shield or hooding over two exposed motor operating gears, in bottling house, and post State Factory Law in each building.

June 8.—Provide an emergency trap exit in floor, in northeast corner of store room, not less than 24 inches square, made easily accessible from passageways in east basement, at north end, with a permanent ladder from trap exit to ground; said trap must not be covered above and arranged for easy opening from below; the iron sidewalk doors, at north end of west basement, must be so arranged that one person from below may open same; provide speaking tube through floor above as a means of alarm in event of fire in basement, and place a red light over platform in basement stairway directly in front of first floor entrance.

June 26.—Secure age certificate for errand boy and keep same on file in your office; employ no minors between the ages of fourteen and sixteen years without proper age certificate has been provided and placed in your possession; provide, at once, one separate water closet for use of female employes and drain pipe for waste water from second floor washing place to sewer; post state factory law in your press room.

July 15.—Make safe the rotten and dangerous window sills to which is anchored large window sash and plate 66x59 inches on second floor of building; on third floor of same building, make safe with new glass a like window with broken glass; both windows immediately over sidewalk, endangering the lives of passersby.

July 31.—Lime wash, at once, the interior of your bakeshop; thoroughly washing and cleaning the doors, windows and window casings; scraping and cleaning dough troughs, bread boxes and other furniture; screen shop windows and doors during fly season, as the law requires; post in your shop the state laws and notices mailed to you under separate cover.

A disregard of this order will be followed by prosecution.

March 22.—Have your boiler inspected every six months as required by law; provide dogs on the running boards of all rip saws, and insist on employes using the guards on all machines.

March 26.—Repair the gauge-cocks on boiler and keep them in good working order at all times; have boiler inspected, at once, and every six months in future; keep certificates of such inspections on file and mail copies of same to this Department.

March 30.—Have your boiler inspected, at once, and every six months in future; keep certificate of such inspection on file and mail copy of same to this Department; provide larger connection pipes to water column, and remove the globe valve from between the safety valve and boiler.

April 4.—Plumb all furnace stacks and columns under furnace stacks; provide iron rings around stacks for fastenings for guy rods; remove 9-inch brick lining from upper part of stack and replace with not more than 4½-inch, and keep lower part of stack properly lined.

May 9.—Cover all the lower half of beater belts or erect a guard rail along them; shield all low shafting, in mill; provide guard rails at the wheels of all gas engines; cover or countersink all set screws in collars and hubs of pulleys, and shield all gear wheels.

September 25.—Cover or countersink all set screws in collars and hubs of pulleys; house in or shield all low shafting, in basement, at crossings and exposed places; provide a one-inch pipe to water column with a good blow-off pipe from column; have your boiler inspected, at once, and every six months in future; keep certificate of such inspections on file and mail copies of same to this Department.

January 13.—Place hand rails on stairs leading to basement; cover point of contact of cog gears on dryer; cover shaft ends on degerminator; place closet in sanitary condition; have boiler inspected every six months as required by law; cover or countersink all projecting set screws in set collars and pulley hubs, and post new laws.

January 22.—Employ no females after 10 p. m., in future; provide means for removing offensive slops; cover shafting on second floor, on south side of building; place hand rails on stairs, and cover or countersink all projecting set screws in set collars and pulley hubs.

February 13.—Repair gauge cocks on boiler; cover or countersink all projecting set screws in set collars and pulley hubs, and on west end of reel No. 6; cover or cut off the projecting end of mandrel on east end of

same machine; provide shield in front of belts and pulleys on roll ends at runways; floor, to a reasonable width, the tops of grain pits where shafting appears on third floor of elevator.

February 16.—Place steps to all windows leading to fire escapes; supply all stairs leading to floors where female help is employed with solid risers from tread to tread; have boilers inspected internally every six months and keep reports of such inspections on file in office; repair gauge-cocks on boilers; provide $\frac{3}{4}$ -inch connections to water column of small boiler; instruct employes that machine guards must be kept in use; post proper notices of young persons employed, and post enclosed noon permit.

April 30.—Cover exposed cog gears on punches, eye bender and bolt threader in machine and blacksmith shops; cover couplings and divided set collars on shafting in iron and wood shops; provide guards for rip saws in pattern shop and enlarge guard on jointer in planing mill; place shield around coping heads on tenoner, and hoods over emery wheels; cover or countersink all projecting set screws, and post additional laws.

January 30.—Provide rubber mat in front of switch board.

March 3.—Box or shield low shafting in engine room; cover or shield inmeshing gears on crusher; provide not less than $\frac{3}{4}$ -inch pipe from boiler to water column on the firebox boiler; provide two more gauge-cocks for same boiler; repair and clean seats of water closet used by packing room employes.

June 1.—Provide legs for dough trough and castors for legs of same; lime wash or paint walls and ceiling of bakeshop, and post law and expectorating notices.

December 23.—Provide a clutch on rubber rolls that can be thrown out instantly in case of accident; provide larger collars on emery wheels, in machine shop; keep a register and roster of minors employed, and post laws.

Any information desired with reference to this clutch can be had from the Farrel Foundry & Machine Co., of Ansonia, Conn.

February 20.—Post in a conspicuous place in every sleeping room a notice descriptive of all means of escape; post notices in the halls and on doors leading to fire escapes.

May 8.—Comply with the recommendations made by the inspector of the Hartford Steam Boiler Inspection & Insurance Company.

May 10.—Have your boiler inspected every six months as required by law; keep certificates of such inspections on file and mail copies of same to this Department; provide three gauge-cocks for boiler; provide a shield over cut-off saw; cover lower pulley of band saw; repair table of trimming saw; erect a rail in front of vat where you steam wood before cutting, and post laws.

March 12.—Dear Sir: Your certificate of boiler inspection received. The grate surface is given as 13 square feet, safety valve as a pop of $1\frac{1}{2}$

inches in diameter. You will increase the diameter of said valve to $2\frac{1}{2}$ inches, as required by Section 1, Chapter 246, Law of 1903. "Pop valves shall be in the ratio of one square inch of area to three square feet of grate surface. A lever and ball safety valve in the ratio of one square inch of area to two square feet of grate surface."

Please report to this office when you have complied.

May 17.—Place fire escape on the northeast corner of your building in accordance with plans you now have, or place iron stair exit from third floor of your knitting factory, not less than 21 inches wide, and extend from third floor balcony to balcony on level with second floor, at northeast corner of building; the second floor balcony to extend over engine room roof, with steps from balcony to roof.

June 5.—Erect fire escape on your building, third floor balcony to take in south window on east end of building; balcony to take in one window at second floor, with drop ladder to ground.

June 5.—Erect a fire escape at the first window from the south end on the west side of building, at the third floor; balcony to take in third window from the north end on the west side of building, at second floor, with counterbalance stairs to ground, providing the north half of second floor is used for school purposes; if not, then place drop ladder from second floor balcony to ground; provide a door at the first window from the south end on the west side of building, opening out on to an iron balcony and extending over and on to two-story building, the door to be cut down on a level with third floor.

June 5.—Erect fire escapes as follows: Start at north window on east side of building, at third floor; balcony to take in second window from north end, at second floor, with drop ladder from second floor balcony to ground; place balcony on south side of building at west window of room No. 9, and take in east window of room No. 25.

REPORT

OF THE

ADJUTANT-GENERAL

OF THE

STATE OF INDIANA

FOR THE

Fiscal Year Ending December 31, 1905

INDIANAPOLIS:

WM. B. BURFORD, CONTRACTOR FOR STATE PRINTING AND BINDING
1907

THE STATE OF INDIANA,

FRED L. GEMMER,
Secretary to the Governor.

Filed in the office of the Secretary of State of the State of Indiana, May 15, 1907.

FRED A. SIMS,
Secretary of State.

Received the within report and delivered to the printer May 15, 1907.

HARRY SLOUGH,
Clerk Printing Bureau.

ADJUTANT-GENERAL'S REPORT, 1905.

STATE OF INDIANA,
ADJUTANT-GENERAL'S OFFICE,
INDIANAPOLIS, February 1, 1906. }

To the Governor of Indiana:

Sir—I have the honor to submit herewith my report for the year 1905 covering the condition of the Indiana National Guard to this date, the report of the Major-General Commanding, the financial report of the Adjutant-General and Quartermaster-General.

ORGANIZATION.

At the close of the year the Indiana National Guard consisted of thirty-four companies of Infantry, three batteries of Artillery, three bands, one Signal Corps and one Hospital Corps.

During the year the following companies were mustered out:

Company I, 2d Infantry, Union City.
Company C, 3d Infantry, Lagrange.
Company I, 1st Infantry, Salem.

CAMP OF INSTRUCTION.

The annual camp of instruction was held at Fort Benjamin Harrison, August 2d to 11th, inclusive, a full report of which will be found in the report of the Commanding General.

GENERAL ORDERS.

Below will be found the General Orders issued during the year:

STATE OF INDIANA,
ADJUTANT-GENERAL'S OFFICE,
INDIANAPOLIS, May 17, 1905.

CIRCULAR,
No. 1.

Under the provisions of Section 116 of the Act of Congress, approved January 21, 1903, officers of the National Guard who may make application for admission, recommended by the Governor, will be admitted to the Army Medical School, Washington, D. C.; The Infantry and Cavalry School, Fort Leavenworth, Kansas; The Artillery School, Fort Monroe, Virginia, and Garrison Schools at the following Posts, the total number to be admitted on the latter case being indicated, as follows:

"Fort Adams, Newport, Rhode Island, 4; Fort Barrancas, Florida, 5; Fort Brady, Sault Ste. Marie, Michigan, 4; Columbus Barracks, Columbus, Ohio, 8; Fort Crook, Nebraska, 8; Fort D. A. Russell, Wyoming, 9; Fort Des Moines, Des Moines, Iowa, 4; Fort Ethan Allen, Vermont, 10; Fort Hamilton, New York, 5; Fort Harrison, Montana, 4; Fort Jay, New York City, 4; Jefferson Barracks, Missouri, 10; Madison Barracks, Sacketts Harbor, New York, 8; Fort McPherson, Georgia, 7; Fort Meadem, South Dakota, 8; Fort Myer, Virginia, 6; Fort Niobrara, Nebraska, 9; Ord Barracks, Monterey, California, 16; Plattsburg Barracks, New York, 12; Presidio, San Francisco, California, 14; Fort Sheridan, Illinois, 12; Fort Snelling, Minnesota, 10; Fort Thomas, Kentucky, 8; Vancouver Barracks, Washington, 10; Fort Wadsworth, New York, 5; Fort Walla Walla, Washington, 4; Fort Wayne, Michigan, 4."

In order that an officer of the Guard may be eligible for admission to the service schools it is required that he shall have been a member of the National Guard for at least one year; that he shall be between the ages of twenty-one and thirty-five years (except for admission to the Army Medical School) and a citizen of the United States; and that he shall furnish his affidavit covering these points and a certificate from the Colonel of his Regiment, or other person or persons, that he is of good moral character. This affidavit, with accompanying papers, should be forwarded through military channels to the Adjutant-General, at Indianapolis. If the application is approved by the Governor it will be forwarded to the War Department, Washington, D. C.

No preliminary examination is required for admission to a garrison school. There are garrison schools for Cavalry officers, Coast and Field Artillery officers and Infantry officers.

For admission to the Medical School, the Infantry and Cavalry School, Leavenworth, and the Artillery School, Fort Monroe, a rigid mental and physical preliminary examination is required, the details of which will be forwarded from this office to any officer who may apply for such information.

The following provisions of General Orders No. 115, War Department, 1904, are applicable to officers of the Guard attending the schools:

"The expense of the Government on account of officers of the organized militia attending the various garrison and service schools is limited strictly to travel allowances, commutation of quarters and subsistence. The travel allowances consist of the mileage allowed by law, in general equivalent to a first-class ticket and four cents per mile from the officer's home to the school on first joining and the same upon returning to his home, provided he has pursued to completion the regular course. Commutation of quarters is at the rate of two rooms for a lieutenant and three for a captain, the commutation per month being \$12 per room. Militia officers can not be furnished with quarters in kind at any of the designated posts. For subsistence each militia officer will be paid \$1 per day, while in actual attendance upon the course of instruction. Each militia officer attending the school must provide himself, at his own expense, with the proper uniforms, namely, those of the organized militia of his own State or Territory, and with the required text-books. The course will require the entire time of the student, so that no outside occupation during the school session will be practicable.

Militia officers authorized to attend any of the designated schools must, before their admission thereto, sign an agreement to attend and pursue the course of study at the school designated, and be bound by and conform to the rules and discipline imposed by its regulations.

The militia officer found deficient in any of the subjects in the course of study may be conditioned by the commandant upon the recommendation of the academic staff, and continued at the school, with a view to making good his deficiency at the final examination.

Without such recommendation he will be reported to the Military Secretary, with a view to the withdrawal of the authority to attend the school. Any officer showing an habitual neglect of his studies or a disregard of orders will, upon the recommendation of the commandant, be deprived of the privilege of further attendance at the school."

Officers desirous of availing themselves of the privilege of attending any of the schools should prepare and forward their application, with other papers called for, as soon as possible. No applications made later than May 30, next, will be forwarded during the present year.

By order of the Governor.

JOHN R. WARD,
Adjutant-General.

INDIANA NATIONAL GUARD,
ADJUTANT-GENERAL'S OFFICE,
January 21, 1905.

GENERAL ORDERS,
No. 1.

Permission is hereby granted all troops of the National Guard of other States, or other organizations, to enter and pass through the State of Indiana, armed and equipped, for the purpose of proceeding to or returning from participation in the inauguration of the President in Washington, on March 4, 1905.

By order of Governor Hanly.

JOHN R. WARD,
Adjutant-General Indiana.

INDIANA NATIONAL GUARD,
 ADJUTANT-GENERAL'S OFFICE,
 February 23, 1905.

GENERAL ORDERS,
 No. 2.

I. In compliance with Paragraph No. 1, S. O. No. 16, War Department, c. s., Brigadier-General Charles Shaler, United States Army, reported in person, on January 26, 1905, to the Governor of Indiana, at Indianapolis, Indiana, for duty with the Organized Militia of this State, for a period of four years, unless sooner relieved.

II. The above assignment of General Shaler is hereby announced for the information and guidance of all concerned. He will be respected and obeyed accordingly.

By order of the Governor.

JOHN R. WARD,
 Adjutant-General Indiana.

STATE OF INDIANA,
 ADJUTANT-GENERAL'S OFFICE,
 INDIANAPOLIS, April 14, 1905.

GENERAL ORDERS,
 No. 3.

The following appointments on the Staff of the Governor are hereby announced:

John R. Ward to be Adjutant-General of Indiana, with the rank of Brigadier-General, in the Active Militia.

Oran Perry to be Quartermaster-General of Indiana, with the rank of Brigadier-General in the Active Militia.

They will be obeyed and respected accordingly.

By order of the Governor.

JOHN R. WARD,
 Adjutant-General.

STATE OF INDIANA,
 ADJUTANT-GENERAL'S OFFICE,
 INDIANAPOLIS, May 17, 1905.

GENERAL ORDERS,
 No. 4.

In addition to the duties prescribed in General Orders No. 2, c. s., A. G. O., Indiana, Brigadier-General Charles Shaler is assigned to duty as a personal Aide on the staff of the Governor and Commander-in-Chief.

By order of the Governor.

JOHN R. WARD,
 Adjutant-General.

STATE OF INDIANA.
OFFICE OF THE ADJUTANT-GENERAL,
INDIANAPOLIS, IND., July 12, 1905.

GENERAL ORDERS,
No. 5.

I. Beginning on August 2d and concluding on August 11, 1905, the Indiana National Guard, constituting the organized militia of the State, will engage in field and camp service for instruction at the Army Post site near Lawrence, Marion County, Indiana.

II. The Adjutant-General will, on the issuance of this order, immediately proceed to make the necessary arrangements for the transportation of the several organizations of the militia to and from the place of encampment, designated in paragraph I of this order, and will cause to be prepared pay-rolls covering payment to be made by the State to the militia for the service performed. He will also take any and all steps necessary to the fulfillment of the spirit of this order as comes within the authority of his department.

III. The Quartermaster-General will at once proceed to place the site selected for the camp in condition to receive the troops, and will provide for the subsistence of the same during the time of said encampment; provide the necessary horses and forage therefor; establish headquarters for the Governor and his staff; procure a supply of water suitable to the needs of the troops encamped, and perform any other service necessary for the fulfillment of the intent of this order not herein enumerated.

IV. The Adjutant-General and Quartermaster-General will, while on duty under this order, establish and maintain during the encampment their respective headquarters in the field at the place of encampment.

V. The Major-General commanding will issue such orders as he deems necessary for the mobilization of the Guard, their equipment, discipline, course of instruction while in camp, and such other matters as the tour of duty contemplated may necessitate.

By order of the Governor.

JOHN R. WARD,
Adjutant-General.

STATE OF INDIANA,
ADJUTANT-GENERAL'S OFFICE,
INDIANAPOLIS, July 20, 1905

GENERAL ORDERS,
No. 6.

I. The organization of the Active Militia of Indiana, designated as the Indiana National Guard, is hereby announced as follows:

JOHN R. WARD,

Adjutant-General.

STATE OF INDIANA,
ADJUTANT-GENERAL'S OFFICE,
INDIANAPOLIS, August 1, 1905.

GENERAL ORDERS,
No. 7.

1. The following act of the General Assembly, approved March 6, 1905, is published for the information and guidance of all concerned :

CHAPTER 131.

AN ACT amending section 3, 4, 8, 13, 15, 16, 17, 20, 23, 26, 40, 49, 56, 57, 65, 67, 82 and 105 of an act entitled "An act for the reorganization of the Indiana militia, prescribing regulations and penalties for violations thereof, providing for the election and appointment of officers, defining the rights and duties of civil and military officers, and penalties for neglect or violations thereof, providing for armories, courts-martial, councils of administration, boards of survey, military encampments, and the calling of the militia into active service, making annual appropriations for the support of the militia and other expenses, repealing all laws heretofore enacted on that subject in conflict with the provisions of this act and declaring an emergency for the immediate taking effect thereof," approved March 5, 1895, and amending sections 3, 4, 6, 7 and 8 of an act entitled "An act amending sections 6, 7, 10, 11, 14, 18, 19 and 32 of an act entitled 'An act for the reorganization of the Indiana militia, prescribing regulations and penalties for violations thereof, providing for the election and appointment of officers, defining the rights and duties of civil and military officers, and penalties for neglect or violations thereof, providing for armories, courts-martial, councils of administration, boards of survey, military encampments, and the calling of the militia into active service, making annual appropriations for the support of the militia and other expenses, repealing all laws heretofore enacted on that subject in conflict with the provisions of this act and declaring an emergency for the immediate taking effect thereof,' approved March 5, 1895, and providing for the payment of officers and soldiers, and declaring an emergency," approved March 12, 1901," and declaring an emergency.

[S. 249. Approved March 6, 1905.]

Active Militia.

Section 1. Be it enacted by the General Assembly of the State of Indiana, That section three (3) of the above entitled act, approved March 5, 1895, be amended to read as follows: The active militia shall consist of such able-bodied male citizens between the ages of eighteen (18) and forty-five (45) years, as may be enrolled, organized and mustered into the service of the State, as hereinafter provided. The organized force shall contain not more than forty-eight (48) companies of infantry, four (4) batteries of artillery, four (4) troops of cavalry, four (4) companies of engineers, a signal corps, a hospital corps, including ambulance company, and such persons as may be enlisted or commissioned therein, and one (1) band to each regiment of infantry, together with a major-general, an

adjutant-general's department, an inspector-general's department, a judge-advocate-general's department, an ordnance department, a quartermaster's department, a subsistence department, and a medical department, each such department to be composed of the requisite number of officers to meet the requirements of the organized strength, and whenever the organized strength of the national guard shall, in the judgment of the Governor, warrant his so doing he may appoint not to exceed two (2) brigadier-generals (exclusive of the adjutant-general and the quartermaster-general). The military organization of the national guard shall constitute a division, and the present regiments, battalions, batteries, companies, and corps shall remain as now established, but the Governor shall have power to alter, divide, annex, consolidate, disband or reorganize the same and create new organizations whenever the efficiency of the State forces will be thereby increased, and he shall at any time have power to change the organization of regiments, battalions, squadrons, troops, batteries, companies, signal corps, hospital corps and engineer corps so as to conform to any organization, system of drill, or instruction now or hereafter adopted for the army of the United States, and for that purpose the number of officers and noncommissioned officers of any grade, in regiments, battalions, squadrons, troops, batteries, companies, signal corps and hospital corps may be increased to the extent made necessary by the new positions thus created: Provided, That in case of an emergency caused by invasion, insurrection or other great public danger, the Governor may, by proclamation, temporarily increase the organized force to a number sufficient to repel the invasion, suppress the insurrection, or otherwise provide for the public defense.

Exempt from Jury Duty.

Sec. 2. That section four (4) of the above entitled act, approved March 5, 1895, be amended to read as follows: Every officer and enlisted man of the active militia shall be exempt from service on any jury in any court of this State and from payment of any poll and road tax; and in case of an officer, his commission, and of an enlisted man, a certificate of his commanding officer shall be sufficient evidence that he is so exempt, and any citizen who shall have performed duty in any military organization of the national guard of the State for a period of six (6) years and has been honorably discharged, shall be exempt from serving as a juror in any court of the State.

Governor's Powers—Uniforms.

Sec. 3. That section eight (8) of the above entitled act, approved March 5, 1895, be amended to read as follows: The Governor shall have the authority, by general order, to provide for the disbursement of the military fund, for the proper organization of the militia, and the promotion of its discipline, instruction and military efficiency, to prescribe a uniform for the same, to appoint boards of examination, inquiry and survey, to provide for the collection of any fine, penalty or forfeiture due from any officer or member of the national guard out of any payment to be made such officer or member by the State, and to fix an allowance not exceeding ten dollars (\$10.00) per year, to be paid for uniforms for each enlisted

man of the active militia, or renovation or repair of same: Provided, That to each commissioned officer shall be issued one dress and one service uniform and overcoat with the proper insignia of rank, which uniform shall be the property of the State. All uniforms for the use of the militia shall be made from the material furnished or prescribed by the State, and in the uniform pattern and style adopted as the uniform of the Indiana National Guard, which same shall conform both for officers and enlisted men to the uniform of the United States army modified as may be necessary in the case of officers in regard to collar and cap device to designate State service.

Battalions.

Sec. 4. That section thirteen (13) of the above entitled act, approved March 5, 1895, be amended to read as follows: Four companies shall constitute a battalion, three battalions shall constitute a regiment, and the entire organization of the national guard shall be under the command of a major-general appointed by the Governor, but the above organization directed for the national guard may be modified by the Governor, according to the convenience and necessities of the service.

Officers—Appointments by Governor.

Sec. 5. That section fifteen (15) of the above entitled act, approved March 5, 1895, be amended to read as follows: The Governor shall appoint one (1) adjutant-general and one (1) quartermaster-general, each with the rank of brigadier-general, who shall both be a part of the active militia. And he may at his pleasure appoint one (1) military secretary, with the rank of colonel, and aides-de-camp with the rank of colonel, lieutenant-colonel or major, not exceeding eight (8) of each grade, these officers to be honorary members of the national guard as the personal staff of the Governor, to hold office during his pleasure, and their commissions shall expire with the term of office of the Governor appointing them.

Major-General—Staff Officers.

Sec. 6. That section sixteen (16) of the above entitled act, approved March 5, 1895, be amended to read as follows: A major-general to command the national guard, shall be appointed and commissioned by the Governor for a term of four (4) years, and there shall be appointed by the Governor, upon the recommendation of such major-general, a staff consisting of one (1) assistant adjutant-general, one (1) inspector and one (1) surgeon, each with the rank of lieutenant-colonel; one (1) judge advocate, one (1) quartermaster, one (1) commissary of subsistence, one (1) engineer and one (1) signal officer, each with the rank of major; two (2) inspectors of small-arms practice and ordnance officer, one of the grade of major, one of the grade of captain; and three (3) aides-de-camp, each with the grade of captain. The major-general commanding may appoint and warrant a noncommissioned staff consisting of one (1) sergeant-major, senior grade mounted, one (1) post quartermaster-sergeant, one (1) post commissary sergeant, two (2) trumpeters, one (1) color sergeant and four (4) sergeant clerks. The staff of a brigadier-general commanding shall

consist of one (1) adjutant-general, one (1) quartermaster, and one (1) commissary of subsistence, each with the grade of captain; one (1) major-surgeon and two (2) aides-de-camp, of the grade of first lieutenant, to be selected from the commissioned officers of the national guard, and appointed and commissioned by the Governor upon recommendation of the respective commanding generals, subject to finding of an examining board. The brigade noncommissioned staff shall consist of one (1) sergeant-major, senior grade, one (1) quartermaster-sergeant, one (1) commissary sergeant, one (1) color sergeant, two (2) trumpeters and two (2) sergeant clerks.

Colonels and Majors.

Sec. 7. That section seventeen (17) of the above entitled act, approved March 5, 1895, be amended to read as follows: A colonel and lieutenant-colonel shall be appointed by the Governor for each regiment, and a major for each battalion, who shall each be commissioned for four (4) years, such appointments to be by promotion, according to lineal seniority, subject to finding of an examining board.

Officers' Commissions—Qualifications.

Sec. 8. That section twenty (20) of the above entitled act, approved March 5, 1895, be amended to read as follows: All officers shall be commissioned by the Governor, who is ex officio, the commander-in-chief, and no person shall be commissioned in the national guard of this State unless he be a citizen of the State, of eighteen (18) years of age, or upwards. No commission shall be issued to any officer in the national guard, except to general officers, the staffs of the commander-in-chief, major-general and brigadier-general, until the officer appointed shall have passed a satisfactory examination before a board as to his knowledge of military affairs proportionate to the office to be held, his general knowledge, and his fitness for the service. No person shall be eligible for appointment to the office of major-general to command the national guard, or as a brigadier-general to command a brigade, unless he has served ten (10) years as a commissioned officer in the national guard, or army of the United States. No person shall be eligible for appointment as an officer in the major-general's or brigadier-general's staffs until he has served for five (5) years in the national guard or army, excepting medical officers, who shall be graduates of some incorporated school of medicine and of at least two (2) years' practice; the judge advocate, who shall be a counsellor-at-law of at least five (5) years' standing; the engineer officer, who shall be a graduate of some incorporated school of engineering, and of at least two (2) years' practice; the signal officer, who shall be a practical electrician or telegraph operator of not less than three (3) years' practice. All commissioned appointments on the major-general's and brigadier-general's staffs shall be recommended by the respective commanders. All noncommissioned appointments on the staff shall be made by the respective general commanding. At least two (2) years' service in the national guard or army shall be requisite for appointment of all noncommissioned staff officers.

Major-General—Powers.

Sec. 9. That section twenty-three (23) of the above entitled act, approved March 5, 1895, be amended to read as follows: The major-general commanding shall have power to authorize enlistments, make discharges and transfers of enlisted men, assign and transfer officers and organizations, appoint mustering officers for the recruiting of companies, or muster-in of new organizations after same have been duly authorized, order general courts-martial and inspections, appoint boards of survey and examination, and courts of inquiry, and issue such orders for the instruction and discipline of the national guard as may in his judgment be deemed necessary to promote the efficiency of the organization, and shall exercise the same authority over the national guard as a territorial division commander in the United States army exercises over the troops in his division.

Requisitions for Arms.

Sec. 10. That section twenty-six (26) of the above entitled act, approved March 5, 1895, be amended to read as follows: The commanding officer of every company of the national guard shall make a requisition on the quartermaster-general for such supply of arms and equipments as may be necessary for his company.

Musicians.

Sec. 11. That section forty (40) of the above entitled act, approved March 5, 1895, be amended to read as follows: There may be raised for each regiment, by the voluntary engagement of such persons, a band composed of not more than twenty-eight (28) musicians, which shall be under the command of the regimental adjutant; each band to be composed as follows: One (1) chief musician, one (1) principal musician, one (1) drum major, four (4) sergeants, eight (8) corporals, one (1) cook, and twelve (12) privates.

Company Defined.

Sec. 12. That section forty-nine (49) of the above entitled act, approved March 5, 1895, be amended to read as follows: Whenever the word company is used in a military sense in this act, it shall be understood and construed to mean a company of infantry, engineers, hospital, ambulance or signal corps, battery of artillery, troop of cavalry or regimental band.

Compensation of Militia.

Sec. 13. That section fifty-six (56) of the above entitled act, approved March 5, 1895, be amended to read as follows: Whenever any portion of the national guard, or all of it, shall be called into the service of the State by the Governor in time of war, invasion, insurrection or other public danger, each private shall be entitled to one dollar and fifty cents (\$1.50) per day and subsistence, each corporal to one dollar and seventy-five cents (\$1.75) per day and subsistence, each sergeant and sergeant-major to two

dollars (\$2.00) per day and subsistence, and each officer shall be entitled to pay at the same rates in every respect as the corresponding grades may at the time be entitled to in the United States army, and subsistence. And whenever such services have been rendered, the auditor of the State shall draw his warrant on the State treasury in favor of the Governor in payment for the services rendered in accordance with the foregoing provisions of this section, and the treasurer of the State shall pay the same out of any funds not otherwise appropriated. When any part of, or all of the national guard of this State shall be ordered by the Governor, or with his approval, into camp for instruction or to participate in field exercises, practice marches or maneuvers in this State or elsewhere, including all occasions on which the troops are paid regular army pay by the United States Government, enlisted men shall be entitled to the same pay per diem, and subsistence, from the State, as is fixed for enlisted men for each day passed in practice on the rifle range, viz., each private, artificer, wagoner, cook and company musician, one dollar (\$1.00) per day; corporals, one dollar and five cents (\$1.05); sergeants, one dollar and ten cents (\$1.10); first sergeants, quartermaster-sergeants, commissary sergeants and sergeants-major, one dollar and fifteen cents (\$1.15), all in addition to any pay received from the United States: Provided, That no such encampment or tour of duty shall continue longer than ten (10) days, or be held oftener than twice a year. When any part or all of the national guard shall be ordered by the Governor, or with his approval, to participate in official military ceremonies, such as escorts, parades and funerals, each enlisted man shall be entitled to one dollar (\$1.00) per day and subsistence, and every commissioned officer to two dollars (\$2.00) per day and subsistence, and this same rate of pay shall apply when officers and enlisted men attend courts-martial, as members or officers of the court, or witnesses respectively; such amounts to be due and payable out of the military fund upon warrant of the adjutant-general approved by the Governor.

Encampments.

Sec. 14. That section fifty-seven (57) of the above entitled act, approved March 5, 1895, be amended to read as follows: The major-general commanding may order encampments, practice marches, field exercises or maneuvers of any part or all of the national guard, not to exceed ten (10) days in any year, when approved by the Governor.

Molesting or Interfering—Penalties.

Sec. 15. That section sixty-five (65) of the above entitled act, approved March 5, 1895, be amended to read as follows: Whoever shall unlawfully molest, insult or abuse any officer or enlisted man of the national guard, while in the performance of his military duty, shall be deemed guilty of a misdemeanor and on conviction thereof, shall be fined in any sum not to exceed five hundred dollars (\$500.00), or imprisoned in the county jail for not more than six (6) months, or both, and it shall be lawful for any officer of the militia on duty therewith, to arrest or cause the arrest of any person so offending, and detain such person in custody until his arrest can be procured by civil authority. A person, who, either by him-

self or with another, willfully deprives a member of the national guard of his employment, or prevents his being employed by himself or another, or obstructs or annoys said member or said national guard or his employer, in respect of his trade, business or employment, because said member of said national guard is such member, or dissuades any person from enlistment in the said national guard by threat of injury to him in case he shall so enlist in respect of his employment, trade or business, shall be deemed guilty of a misdemeanor, and on conviction thereof, shall be fined in any sum not to exceed five hundred dollars (\$500.00). No association or corporation, constituted or organized for the purpose of promoting the success of the trade, employment, or business of the members thereof, shall by any constitution, rule, by-law, resolution, vote, or regulation, discriminate against any member of the national guard of the State of Indiana, because of such membership in respect of the eligibility of such member of the said national guard to membership in such association or corporation, or in respect to his rights to retain said last mentioned membership; it being the purpose of this section to protect a member of the said national guard from disadvantage in his means of livelihood and liberty therein, but not to give him any preference or advantage on account of his membership of said national guard. A person who aids in enforcing any such provisions against a member of the said national guard with the intent to discriminate against him because of such membership, shall be deemed guilty of a misdemeanor, and on conviction thereof, shall be fined in any sum not exceeding one thousand dollars (\$1,000.00).

Retired List—Privileges.

Sec. 16. That section sixty-seven (67) of the above entitled act, approved March 5, 1895, be amended to read as follows: All commissioned officers who may have heretofore or shall hereafter serve in the Indiana national guard for a period of five (5) years, or who shall become permanently disabled to perform their duties, irrespective of length of service, may upon their honorable retirement from the service, whether by resignation or otherwise, be carried upon a roll to be established and maintained in the office of the adjutant-general, which roll shall be designated "The Indiana national guard retired list," and shall be entitled to wear on occasion of ceremony, the uniform of the highest rank which they have held. The officers so carried on said roll may be eligible for detail or appointment on the general staff, or the staff of any commander, when not physically disqualified for military duty, but when so appointed shall be recommissioned as of the rank to which they have been appointed, which rank they shall hold during the time of such appointment, unless promoted therefrom, and in case of a second retirement from active service, they shall be entered on said roll as of their highest rank. No officer whose name shall appear on said retired list shall be entitled to receive any pay or emolument whatever, from the State, during the time he so remains on said list, unless specifically assigned to duty in orders from the Governor or major-general commanding, and in case he be reappointed or recommissioned therefrom, he shall only be entitled to the pay and allowance provided by law for officers of the rank named in his last commission.

Judge Advocate—Records—Witnesses—Fee.

Sec. 17. That section eighty-two (82) of the above entitled act, approved March 5, 1895, be amended to read as follows: It shall be the duty of every judge advocate to keep a faithful record of the proceedings of his court; to enter thereon the order appointing the court, the names of the members present, the response of the accused when asked if he objects to any member of the court, a copy of the charges and specifications against the accused, and his plea to each specification and charge, a synopsis of the evidence of each witness for the prosecution and defense, and finally, the findings and sentence of the court in full, which proceedings shall be signed by the president and attested by the judge advocate, and transmitted, without delay, by the latter to the office ordering the court. The judge advocate of every court-martial shall have the same power to summon all the witnesses required either for the prosecution or the defense, as by existing laws the clerks of the circuit courts in the State have; and any person so summoned and failing to attend shall be dealt with as for contempt under existing laws. Judge advocate, members and officers of general courts-martial, shall receive two dollars (\$2.00) per day and subsistence, for each day in actual attendance at such courts, and transportation, and for each day actually spent in preparation for trial before such courts, and in making up the record thereof. Military witnesses shall receive pay at the rate of two dollars (\$2.00) per day for officers and one dollar (\$1.00) per day for enlisted men. Civilian witnesses summoned by the judge advocate shall receive the same compensation for their attendance before the courts-martial as is allowed by existing laws for their attendance upon civil courts of the State, said payments to be made out of the military fund of the State, upon warrant of the adjutant-general, approved by the Governor.

Dismissal of Officers.

Sec. 18. That section one hundred and five (105) of the above entitled act, approved March 5, 1895, be amended to read as follows: No commissioned officer shall be dismissed from the service except by the sentence of a legally constituted court-martial, rendered after a fair trial, and approved in the manner prescribed in the portion of this act organizing courts-martial: Provided, That no provision herein shall in any way apply to the revoking of commission by the Governor upon the finding of any examining board; or for negligence of duty; loss of interest; dilatoriness in making required returns and reports; failure to comply with instructions or frequent unauthorized absence from meetings of command as provided in existing regulations.

Companies—Organization—Engineers.

Sec. 19. That section three (3) of the above entitled act, approved March 12, 1901, be amended to read as follows: A company of infantry shall consist of one (1) captain, one (1) first lieutenant and one (1) second lieutenant, to be elected primarily by the company; six (6) sergeants and eight (8) corporals, to be appointed by the regimental commander upon the recommendation of the captain (the first sergeant and the quartermaster

sergeant to be named by the captain from among the six sergeants so appointed), two (2) cooks, one (1) artificer, two (2) musicians, and not less than forty (40) and not more than eighty-seven (87) privates, one of whom may be appointed company clerk by the captain. The second lieutenant shall be elected by the company, and commissioned subject to the findings of an examining board: The company officers shall be promoted by seniority as vacancies may occur within their own company, subject to finding of examining board. A company of engineers shall consist of one (1) captain, one (1) first lieutenant, one (1) second lieutenant, ten (10) sergeants, ten (10) corporals, two (2) musicians and not more than sixty-four (64) privates of first class, and sixty-four (64) privates, second class. The minimum strength not to be less than fifty-three (53) enlisted men. The officers to be appointed and commissioned by the Governor, upon the recommendation of the commanding general, subject to the findings of an examining board. The noncommissioned officers shall be appointed and warranted by the battalion commander in case of such being commissioned, and in the absence thereof, by the commanding general.

Batteries—Cavalry—Signal and Hospital Corps.

Sec. 20. That section four (4) of the above entitled act, approved March 12, 1901, be amended to read as follows: A battery of field artillery shall consist of one (1) captain, two (2) first lieutenants and one (1) second lieutenant, to be elected primarily by the battery, subject to the finding of an examining board; nine (9) sergeants and twelve (12) corporals, to be appointed by the battalion commander, upon recommendation of the captain (the first sergeant, quartermaster-sergeant and stable sergeant to be named by the captain from among the nine sergeants so appointed), two (2) cooks, four (4) artificers, two (2) musicians, and not more than ninety-one (91) nor less than forty (40) privates, one of whom may be appointed company clerk by the captain. The two platoons constituting a battery of artillery, company of infantry, or engineers, or troop of cavalry, may, at the discretion of the Governor, be located in different towns, and in such case, the officers and noncommissioned officers authorized for a battery, company or troop, shall be as equitably distributed between the two platoons as may be possible. The battery officers shall be respectively elected, promoted and commissioned in same manner as provided in infantry companies. A troop of cavalry shall consist of one (1) captain, one (1) first lieutenant, and one (1) second lieutenant, to be elected primarily by the troop; eight (8) sergeants and eight (8) corporals, to be appointed by the squadron commander, upon the recommendation of the captain (the first sergeant, and quartermaster sergeant to be named by the captain from among the eight sergeants so appointed), two (2) cooks, two (2) farriers and blacksmiths, one (1) saddler, one (1) wagoner, two (2) trumpeters and not more than seventy-six (76) nor less than twenty-seven (27) privates. The troop officers shall be respectively elected, promoted and commissioned in same manner as provided in infantry companies. A company of signal corps shall consist of one (1) captain, one (1) first lieutenant, and one (1) second lieutenant, five (5) first class sergeants, ten (10) sergeants, ten (10) corporals, thirty (30) first class and twenty (20) second class privates; the minimum strength of the company shall be thirty (30)

enlisted men. The company may be divided into squads of suitable size, to be stationed at places designated by the commanding general. At least two-thirds of the officers and men shall be expert telegraphers and electricians. The officers shall be appointed and commissioned by the Governor, upon recommendation of the commanding general, subject to the finding of an examining board. The hospital corps shall consist of one (1) ambulance company, one (1) field hospital, and of sergeants first class, sergeants, corporals and privates of the hospital corps, who are members of regiments, separate battalions and squadrons. The Governor shall be authorized to increase the number of enlisted men in the hospital corps so as to provide for medical attendance in batteries, separate troops and companies, and such additional men shall be consider[ed] a part of the hospital corps. The ambulance company shall consist of one (1) major surgeon commanding, one (1) captain assistant surgeon, one (1) first lieutenant assistant surgeon, four (4) sergeants first class, nine (9) sergeants, one (1) musician, thirty (30) privates first class and seventeen (17) privates. With the transportation one (1) captain quartermaster in charge of transportation, one (1) sergeant first class, one (1) sergeant, one (1) blacksmith, one (1) saddler, one (1) cook, two (2) musicians, two (2) supernumeraries and thirteen (13) drivers. Total enlisted, eighty-three (83). Transportation shall be nine (9) ambulances, one (1) medical supply wagon, three (3) army wagons. The field hospital shall consist of: For field hospital work, one (1) major surgeon commanding, one (1) captain assistant surgeon, one (1) first lieutenant assistant surgeon, one (1) sergeant first class, three (3) sergeants, twenty (20) privates, first class, ten (10) privates, two (2) cooks, two (2) assistant cooks, one (1) dispensary assistant. With the transportation, one (1) captain quartermaster, two (2) sergeants, ten (10) drivers, one (1) artificer, two (2) supernumeraries. Total enlisted, fifty-five (55). Transportation shall be eight (8) army wagons. All officers of the hospital corps shall be appointed, promoted and commissioned by the Governor upon recommendation of the commanding general, subject to the finding of the examining board. The noncommissioned officers of the hospital corps shall be appointed and warranted by the commanding general upon recommendation of the chief medical officer.

Regimental Staff.

Sec. 21. That section six (6) of the above entitled act, approved March 12, 1901, be amended to read as follows: The regimental staff shall consist of a surgeon, with the rank of a major, two (2) assistant surgeons. The battalion staff shall consist of an adjutant, with the rank of first lieutenant, an adjutant, a quartermaster, and a commissary, each with the rank of captain, and one (1) chaplain, to be commissioned by the Governor. The battalion staff shall consist of an adjutant, with the rank of first lieutenant, and a quartermaster and commissary with the rank of second lieutenant, to be commissioned by the Governor. The artillery of the State shall be organized as an artillery battalion, under the command of a major, and the artillery battalion staff shall consist of an assistant surgeon, with the rank of first lieutenant, an adjutant, and a quartermaster and commissary, and an ordnance officer, each with the rank of first lieu-

tenant, and a veterinary surgeon and a reconnoissance and signal officer, each of grade of second lieutenant, to be commissioned by the Governor: Provided, That after battalions and regiments of any and all arms have been organized, all officers, field, staff and line, shall be promoted by seniority as vacancies may occur in their respective corps or departments, subject to the finding of an examining board as to their qualifications and fitness. The cavalry of the State, when two or more troops shall have been duly mustered in, may be organized into a quadron under command of a major with a staff consisting of one (1) squadron adjutant of rank of first lieutenant, one (1) squadron quartermaster and commissary of rank of second lieutenant, one (1) captain assistant surgeon, one (1) veterinary surgeon of rank of second lieutenant, and a noncommissioned staff of one (1) squadron sergeant major, one (1) sergeant of the hospital corps, two (2) privates first class, and one (1) private of the hospital corps. The squadron officers to be appointed and commissioned by the Governor, lineal seniority to govern as in the case of infantry battalions, and subject to the finding of an examining board. The engineer companies, when two or more of same have been mustered in, may be organized into a battalion, officered as provided for in the case of infantry.

Regimental Noncommissioned Staff.

Sec. 22. That section seven (7) of the above entitled act, approved March 12, 1901, be amended to read as follows: The regimental noncommissioned staff shall consist of a sergeant-major senior grade, a quartermaster sergeant, a commissary sergeant and two (2) color sergeants, who shall be appointed by the colonel, and one (1) sergeant first class, three (3) sergeants and six (6) privates first class and three (3) privates of the hospital corps. The battalion noncommissioned staff shall consist of a sergeant major junior grade, to be appointed by the colonel upon recommendation of the battalion commander. The artillery battalion noncommissioned staff shall consist of a sergeant major junior grade, a quartermaster and commissary sergeant, to be appointed by the battalion commander, and one (1) sergeant, two (2) privates first class, and one (1) private of the hospital corps.

Aides-de-Camp.

Sec. 23. That section eight (8) of the above entitled act, approved March 12, 1901, be amended to read as follows: The commissions of the aides-de-camp shall expire upon the same date as the commission of their chief, notwithstanding the time named in their respective commissions may not have elapsed: Provided, That such aides-de-camps be not reassigned by competent authority to new duties, or carried as supernumerary officers of their respective grades.

Emergency.

Sec. 24. An emergency is hereby declared to exist for the immediate taking effect of this act, and the same shall be in force from and after its passage

By order of the Governor.

JOHN R. WARD,
Adjutant-General.

STATE OF INDIANA,
 ADJUTANT-GENERAL'S OFFICE,
 INDIANAPOLIS, August 21, 1905.

By order of the Governor.

JOHN R. WARD,
 Adjutant-General.

STATE OF INDIANA,
 ADJUTANT-GENERAL'S OFFICE,
 INDIANAPOLIS, December 11, 1905.

GENERAL ORDERS,
 No. 9.

The following appointments on the Military Staff of the Governor are hereby announced:

Brigadier-General Oran Perry, Adjutant-General, vice John R. Ward, resigned.

Brigadier-General George W. Powell, Quartermaster-General, vice Oran Perry, promoted.

They will be respected and obeyed accordingly.

By order of the Governor.

ORAN PERRY,
Adjutant-General.

Adjutant-General John R. Ward resigned December 7th and was succeeded by Quartermaster-General Oran Perry, December 11th, 1905.

George W. Powell, late Adjutant of the 158th Volunteer Infantry, was appointed Quartermaster-General, to succeed General Oran Perry, December 11th, 1905.

Elsewhere will be found the report of the Quartermaster-General and the financial statement of the Adjutant-General.

Respectfully submitted,

ORAN PERRY,
Adjutant-General.

PART I.
CAMP OF INSTRUCTION.

REPORT No. 1.

HEADQUARTERS INDIANA NATIONAL GUARD,
INDIANAPOLIS, IND., NOV. 1, 1905.

The Adjutant-General, State of Indiana:

Sir—I have the honor to submit my report on the Annual Camp of Instruction, held August 2, 1905, to August 11, 1905, inclusive, pursuant to G. O. No. 5, A. G. O., 1905, at Fort Benjamin Harrison, near Lawrence, Indiana.

On account of the voluminous quantity of material, I have taken the liberty to sub-divide this report into three parts, viz.:

PART I. The Camp of Instruction.

PART II. Practice March and Tactical Exercise, August 8 and 9.

PART III. Field Day, Athletic Contests, August 10.

The Table of Contents provides a complete tabulation showing classification and arrangement of sub-reports and appendices, making detailed comment unnecessary. The various sub-reports will speak for themselves as to the professional interest and application of the respective authors thereof.

STAFF ORGANIZATION.

On account of the enforced absence of the Assistant Adjutant-General, Lieut.-Col. Alfred B. Schanz, Inspector-General, was detailed as Acting Assistant Adjutant-General, while Brig.-General Charles Shaler, U. S. A., retired, kindly assumed the duties of the Inspector Generalship, and was assisted in his work by a number of officers from the regular establishment, who consented to act as Assistant Inspector Generals, as well as Umpires, Instructors, and Judges of the Athletic Contests, and were indeed most welcome visitors. These officers were:

First Lieut. Chas. S. Tarlton, 1st U. S. Infantry.

Second Lieut. C. Lininger, 1st U. S. Cavalry.

Second Lieut. C. A. Thuis, 23d U. S. Infantry.

Second Lieut. Jarvis J. Bain, Engineer Corps, U. S. A.

They are certainly entitled to the gratitude of this command for the zeal and interest displayed, and the patience with which they participated in the exercises.

This Staff of Inspectors was requested to make their scrutiny severe in a technical sense, so as to determine without favor our principal shortcomings. Their reports will indicate that their professional criticisms followed out that purpose, and the service should derive some valuable points therefrom for future avoidance of similar errors.

His Excellency, Governor J. Frank Hanly, honored the Guard by his presence in Camp and his personal manifestation of great interest in the methods and exercises.

ORGANIZATION OF CAMP.

Preliminary work and execution of detail were covered by G. O. Nos. 8 and 9, Headquarters I. N. G., 1905, and organization and movement of the entire command were controlled under G. O. Nos. 10, 11, and 12, Head-

quarters I. N. G., 1905. Of all these orders copies are hereto attached. (Appendices "B," "C," "D," "E" and "F.")

The preparatory work on the ground for camp, rifle ranges, etc., was planned and carried out under the direction of Brig-Gen. Oran Perry, Q. M. G., whose report undoubtedly covers all detail regarding same. Special thanks are due Capt. B. F. Cheatham, Q.-M. U. S. A., Constructing Quartermaster of Fort Benjamin Harrison, whose courtesy and kindness were without limit. The entire Army Reservation, with the exception of fields of standing crops, was placed at the disposal of this command for tactical purposes.

The location of Camps and Ranges are indicated on attached map marked (Appendix "H"). This same map is also referred to, to show routes of the Practice Marches on August 8 and 9.

SCHEDULE OF EXERCISES.

After our successful experience with the Schedule of Exercises, it was decided to prepare something similar for this tour, amended so as to meet changed requirements. The fundamental idea was to broaden out the responsibility of regimental commanders, by sending out whole regiments for a whole day on target practice, entrenchment work, etc. It was found that this was an improvement over the system of the previous year, when the schedule was drawn up on the unit of a battalion. For the second year this method of prescribing the exercises of the "Camp of Instruction" has proven a complete success. Of course there are unlimited mutations possible adapted to any variety of strength, work, length of tour and peculiarities of terrain with maneuvers, which can be made more or less elastic to conform with unforeseen weather conditions or other unexpected adverse conditions. Credit for the adjustment of these Schedules is due to Lieut.-Col. Alfred B. Schanz, Inspector-General, Indiana National Guard. A copy of this year's Schedule is attached hereto marked (Appendix "G").

Further comment on this tour of duty will be found in the introduction to Parts II and III.

Very respectfully,

WILL J. McKEE,
Maj.-Gen. Comdg. I. N. G.

REPORT No. 1. APPENDIX "A."

STATE OF INDIANA,
OFFICE OF THE ADJUTANT-GENERAL,
INDIANAPOLIS, IND., July 12, 1905.

GENERAL ORDERS,
No. 5.

I. Beginning on August 2d and concluding on August 11th, 1905, the Indiana National Guard, constituting the organized militia of the State, will engage in field and camp service for instruction at the Army Post site near Lawrence, Marion County, Indiana.

II. The Adjutant-General will, on the issuance of this order, imme-

diately proceed to make the necessary arrangements for the transportation of the several organizations of the militia to and from the place of encampment, designated in paragraph 1 of this order, and will cause to be prepared pay-rolls covering payment to be made by the State to the militia for the service performed. He will also take any and all steps necessary to the fulfillment of the spirit of this order as comes within the authority of his department.

III. The Quartermaster-General will at once proceed to place the site selected for the camp in condition to receive the troops, and will provide for the subsistence of the same during the time of said encampment; provide the necessary horses and forage therefor; establish headquarters for the Governor and his staff; procure a supply of water suitable to the needs of the troops encamped, and perform any other service necessary for the fulfillment of the intent of this order not herein enumerated.

IV. The Adjutant-General and Quartermaster-General will, while on duty under this order, establish and maintain during the encampment their respective headquarters in the field at the place of encampment.

V. The Major-General commanding will issue such orders as he deems necessary for the mobilization of the Guard, their equipment, discipline, course of instruction while in camp, and such other matters as the tour of duty contemplated may necessitate.

By order of the Governor.

JOHN R. WARD,
Adjutant-General.

REPORT No. 1. APPENDIX "B."

HEADQUARTERS INDIANA NATIONAL GUARD,
ASSISTANT ADJUTANT-GENERAL'S OFFICE,
INDIANAPOLIS, July 20, 1905.

GENERAL ORDERS,
No. 8, 1905.

I. The Annual Camp of Instruction for 1905 will be held at Fort Benjamin Harrison, near Indianapolis, from August 2 to 11 inclusive, and subordinate commanders will hold their commands in readiness to report by route and at time hereafter designated.

II. The following clothing and equipment, in addition to arms and accoutrements, is prescribed for camp tour, viz.: Regulation blue blouse and trousers, Khaki coat and trousers, campaign hat, leggings, dark blue flannel shirt, blanket, shelter halves, canteen, haversack, meat can, knife, fork, spoon, tin cup, poncho, two suits underclothing, strong shoes, two pairs socks, towel and toilet articles. In addition, boxes of cleaning material and field desk with record books will be brought, together with necessary stationery.

III. Field ranges and cooking utensils for use during the encampment will be issued each command for temporary use upon proper requisition, upon arrival in camp, the same to be turned back upon completion of tour.

IV. Company Commanders will see that all men have strong, suitable footwear for the tour of camp, and that same are uniform as to color throughout each Company—all black or all tan. Preferably, the shoes should not be new, but should be in good repair for 10 days' hard usage.

V. All officers entitled to mounted pay will be required to have available for use upon beginning of tour a suitable mount with equipment. Officers will not be permitted to ride any animal furnished by the Quartermaster's Department for use during the camp, the same being for the exclusive use of the authorized enlisted men.

VI. For the camp tour, two (2) cooks to each Company, Battery, the Hospital Corps and the Signal Corps, and one (1) for each band, are authorized, where cooks have not been regularly enlisted, and transportation and subsistence will be allowed, together with one (1) dollar per diem.

VII. Attention of subordinates is called to Article "C," Rules and Regulations. Mess or other chests of more than thirty (30) cubic feet contents ($2\frac{1}{2} \times 3 \times 4$ ft.) will not be carried on State transportation or brought to Camp.

By command of Major-General McKee.

F. W. FRANK,
Lieut.-Col. and A. A. G.

REPORT No. 1. APPENDIX "C."

HEADQUARTERS INDIANA NATIONAL GUARD,
ASSISTANT ADJUTANT-GENERAL'S OFFICE,
INDIANAPOLIS, August 1, 1905.

GENERAL ORDERS,
No. 9, 1905.

I. During the Annual Camp of Instruction, 1905,

DAILY SERVICE

will be as prescribed in Army Regulations, 1904, Pars. 375 to 379, inclusive, regimental and artillery battalion morning reports being handed to the Adjutant-General of the Division by 10 o'clock a. m. Also those of the Hospital Corps and the Signal Corps.

(a) Reveille will be sounded at 5:30 a. m.

Call to quarters at 9:45 p. m.

(b) Regimental Commanders and the Commanding Officer of the Artillery Battalion will prescribe hours for service calls in conformity with Army Regulations, the same to include at least three drills aggregating four (4) hours in duration daily, and will embrace twenty (20) minutes' careful instruction in the "Set-up Exercises," preferably divided about equally to each drill and at reveille roll call; also some time to "Position and Aiming Drill Exercises," at each drill.

(c) Two school hours of at least twenty (20) minutes each will also be prescribed for officers and for non-commissioned officers daily.

(d) Instruction will embrace extended order, estimating distances, fire discipline, advance and rear guard, outpost duty, security and information as well as close order drill—company, battalion and regimental.

(e) Particular attention will be given to military courtesy and to interior guard duty; the commanding officer of each camp making such detailed orders as in his judgment will bring about the best results; and will also prescribe system for camp police and sanitation to conform to general plan for disposal of garbage and refuse.

(f) For instruction in entrenchments, road mappings, sketching and elementary engineer work, hours and instructors will be designated in later orders from these headquarters.

(g) Practice marches, reconnoissance, offensive and defensive problems will be as covered in later orders from time to time.

II. Regimental Commanders and the Commanding Officer of the Artillery Battalion will establish summary courts immediately upon arrival in camp.

III. Regimental Commanders will submit reports of camp tour by the last day of August instant, such reports to be accompanied by reports of battalion commanders and commanders of any separate forces or expeditions. (Attention is called to Pars. 449, 450 and 451, A. R., 1904.) The Commanding Officer of the Artillery Battalion will submit similar report within time named, accompanied by battery commanders' reports. All officers of the Division Staff and the commanding officers of the Hospital Corps and of the Signal Corps will submit similar reports within the same time.

IV. The strictest discipline compatible with the service will be maintained throughout the tour of duty, and subordinate commanders are charged with the enforcement to the letter of all the laws, rules and regulations of the State and the United States; exacting the fullest compliance with military customs and usage. In this connection particular attention will be given to the "Field Service Regulations."

TARGET PRACTICE.

V. All possible time will be given to small arms practice, and extra hours will be devoted by each command the day before designated to go on the range to the preliminary instruction prescribed by the "Firing Regulations." Troops will bivouac on the range the night before date set for reporting on the range.

STATE PAY ROLLS.

VI. State pay rolls will be filled out in triplicate, with names and signatures of every man in camp, by noon of Thursday, August 3d, and Regimental Commanders, the Commanding Officers of the Artillery Battalion and the Hospital and the Signal Corps are charged with muster on the respective rolls immediately after. The completed rolls will be turned in to Division Headquarters by 6 o'clock p. m., Thursday, August 10th.

VII. Enlisted men will not leave limits of the Post Reservation except under specific orders, and subordinate commanders are strictly charged with enforcement of this regulation. Trespassing upon private property is prohibited under all circumstances.

VIII. The published "Schedule of Exercises" is intended to be merely an outline of work contemplated, and is subject to change in all respects, but will be followed so far as found practicable.

IX. Major David I. McCormick (retired) is announced as Chief Range Officer during the Camp tour.

By command of Major-General McKee.

F. W. FRANK,
Lieut.-Col. and A. A. G.

REPORT No. 1. APPENDIX "D."

HEADQUARTERS INDIANA NATIONAL GUARD,
CAMP OF INSTRUCTION, FORT BENJ. HARRISON,
NEAR INDIANAPOLIS, August 2, 1905.

GENERAL ORDERS,
No. 10, 1905.

I. The following named officers are announced as Inspectors-General during the Annual Camp of Instruction, 1905, viz.:

Brig.-Gen. Chas. Shaler, U. S. A., retired.

First Lieut. Chas. S Tarlton, 1st U. S. Infantry.

First Lieut. Chas. W. McClaskey, U. S. Marine Corps.

Second Lieut. Clarence Lininger, 1st U. S. Cavalry.

Second Lieut. Chas. A. Thius, 23d U. S. Infantry.

Second Lieut. Jarvis J. Bain, Eng. Corps, U. S. A.

Cadet Jos. R. Harrison, West Point.

II. Lieut.-Col. Alfred B. Schanz, Inspector-General, is announced as Acting Assistant Adjutant-General.

Capt. W. A. Kreber, A. D. C., is assigned as Provost Marshal during the Camp tour.

III. The following named officers will act as Assistant Range Officers:

First Lieut. Benj. E. Wimer, 1st Infantry.

Second Lieut. I. W. Logan, 3d Infantry.

By command of Major-General McKee.

ALFRED B. SCHANZ,
Lieut.-Col. and Insp.-Gen.
A. A. A. G.

REPORT No. 1. APPENDIX "E."

HEADQUARTERS INDIANA NATIONAL GUARD,
CAMP OF INSTRUCTION, FORT BENJ. HARRISON,
NEAR INDIANAPOLIS, August 5, 1905.

GENERAL ORDERS,
No. 11, 1905.

I. The Sunday Morning Inspection of the Division, in quarters, by the Commanding General and Staff will begin at 9 o'clock a. m., August 6. the sub-division being inspected in the following order:

1. Third Infantry.
2. First Infantry.
3. Signal Corps.

- 4. Hospital Corps.
- 5. Artillery Battalion.
- 6. Second Infantry.

II. For the Review by the Commander-in-Chief, commanding officers will form their commands in readiness to march out at 4.45 p. m., August 6, 1905, at the sounding of "To the Colors."

III. Troops will be paraded in service uniforms without equipment beyond arms, belts and bayonets.

IV. The Review will be on the field west of the camp of the Second Infantry. Formation will be in line of masses, facing East, in the following order from right to left:

- Signal Corps, I. N. G.
- Second Infantry.
- First Infantry.
- Third Infantry.
- Artillery Battalion.
- Hospital Corps.
- Ambulance Corps.

V. For the Review, camp guards will be reduced to the lowest possible number necessary to protect property. The two reliefs off post will parade with their respective companies.

VI. Commanding officers will make customary field returns upon returning to camp.

By command of Major-General McKee.

ALFRED B. SCHANZ,
Lieut.-Col. and Insp.-Gen.
A. A. A. G.

REPORT No. 1. APPENDIX "F."

HEADQUARTERS INDIANA NATIONAL GUARD,
CAMP OF INSTRUCTION, FORT BENJ. HARRISON,
NEAR INDIANAPOLIS, August 10, 1905.

GENERAL ORDERS,
No. 12, 1905.

I. At reveille, 5.30 a. m., Friday, Aug. 11, 1905, bed sacks will be emptied at a designated place in each regimental (battalion or corps) camp, well shaken, folded in regulation fold and turned in to Battalion Quartermasters, together with such other temporary issues of Quartermaster's stores, camp and garrison-equipage, except tentage, as will not be needed for remaining hours of camp tour.

II. All sinks will be filled up; sunken water barrels dug up and holes filled; water barrels and garbage cans thoroughly cleaned. Grounds will be left thoroughly policed and leveled as neatly as possible wherever excavated. Commanding Officers will make personal inspection of their entire camp grounds to see that this is done.

III. Morning drill-call and guard mount at hours prescribed in regimental (artillery battalion) schedules of service will be observed as usual.

IV. At 9.00 a. m. all contract horses will be turned in to the contractor at the artillery picket line. Battery commanders will arrange with the contractor time and place of final delivery of contract animals.

V. At 9:30 a. m. all tent pegs except the four corner ones will be pulled and packed in readiness to be turned in to the Battalion Quartermasters.

VI. At 10.00 a. m. "The General" will be sounded at Camp Headquarters and taken up simultaneously by each regiment and the artillery battalion, and at the firing of one gun five minutes later all tents will be struck. All pegs will be carefully collected, packed in original boxes and turned in. Tents must be shaken out, folded, and tied in same manner as when they were issued, and tent poles tied together in bundles.

VII. Mess call (dinner) will be at 11.30 a. m. Companies leaving on an early schedule may arrange their mess hour accordingly.

VIII. As quickly as possible after dinner, the mess furniture, cooking utensils, etc., issued for camp use, including field ranges, will be turned in to the Battalion Quartermasters. All utensils must be properly cleaned before being turned in and Battalion Quartermasters are strictly charged to see that this is done.

IX. Camp guards will be maintained until the schedule of departure makes it necessary to relieve same, when relief will be ordered by Regimental Commanders. Brigade guard will be maintained until relieved by orders from these Headquarters.

X. Troops will leave camp as per schedule of departure. They will be orderly and quiet en route and no ungentlemanly conduct permitted.

XI. Applications will be made for separate transportation for fatigue parties remaining after camp breaks, under S. O. 99, Par. 10, for duty with Quartermasters in turning in their property. So far as practicable these several details shall be taken from one company. Company commanders shall understand that respective quartermasters alone are authorized to relieve these details.

By command of Major-General McKee.

ALFRED B. SCHIANZ,
Lieut.-Col. and Insp.-Gen.
A. A. A. G.

REPORT No. 2.

HEADQUARTERS INDIANA NATIONAL GUARD,
OFFICE OF THE INSPECTOR-GENERAL,
INDIANAPOLIS, IND., Nov. 1, 1905.

The Assistant Adjutant-General, Indiana National Guard:

Sir—I have the honor to submit the following report:

The Schedule of Exercises for the Camp of Instruction August 2 to August 11, 1905, inclusive, was prepared in advance under the direction of the Commanding General, by this office.

By G. O. No. 10, Paragraph II, Headquarters Indiana National Guard, 1905, the undersigned was detailed as Acting Assistant Adjutant-General for the Camp Tour, and assumed the duties of said office upon reporting at Field Headquarters, Fort Benjamin Harrison, August 2, 1905. The clerical field equipment was adequate to the requirements of the office, but the civilian clerks as usual were men inexperienced in this kind of detail, picked up at the last moment, and most of them requiring a kindergarten training for several days before becoming to any degree useful. The great need of clerical assistance broken in to know the work before camp, became more apparent than ever, and for the benefit of the service should be insisted upon under proper authorization.

Nevertheless, all essential recording of correspondence, issuance of orders and working details, was carried on without interruption and delay, and the execution of the Camp Schedule was accomplished as intended. The paper work in the various commands was up to the average with some room for improvement in promptness, accuracy and neatness to come hereafter. Field reports and military maps in connection with practice marches and tactical exercise, showed no improvement over 1904, and should be given more special attention hereafter in consideration of the great importance of these returns in the Service of Information.

Very respectfully,

ALFRED B. SCHANZ,
Lieut.-Col. and Insp.-Gen.
A. A. A. G.

REPORT No. 3.

ROOM 57, STATE HOUSE,
INDIANAPOLIS, Jan. 1, 1906.

Report of Acting Inspector-General Charles Shaler, Brig.-Gen., U. S. A., retired, on the Encampment of Indiana National Guard, Fort Benjamin Harrison, Aug. 2, to Aug. 11, 1905.

(Extract.)

To the Major-General Commanding Division of the Indiana National Guard:

Sir—In accordance with your request, I volunteered to act as Inspector-General during the Encampment of the Guard, Aug. 2, to August 11,

1905, being assisted by other army officers who also volunteered for the purpose. These officers were:

First Lieut. Charles S. Tarlton, 1st U. S. Infantry, on sick leave of absence.

Second Lieut. Clarence Lininger, 1st U. S. Cavalry, on leave of absence.

Second Lieut. Charles A. Thuis, 23d U. S. Infantry, on leave of absence.

Second Lieut. Jarvis J. Bain, U. S. Engineers, on graduating leave.

The three officers first named had served in Indiana volunteer regiments, while Lieutenant Tarlton had in addition served as an officer of the Indiana National Guard and attained therein the rank of Captain before the Spanish American war. For this reason they were particularly well fitted to perform the duty imposed upon them at the encampment.

Formal Inspections of the different organizations were made as follows:

THURSDAY, AUG. 3D.

Morning: Inspection in quarters of Batteries A, B and C.

Afternoon: Artillery Battalion Inspection Mounted under Arms.

These inspections were made by General Shaler.

FRIDAY, AUG. 4TH.

Morning: Battalion Inspection in Quarters of 3d Infantry.

Afternoon: Regimental Inspection under arms.

These inspections were made by Lieut. Thuis. Lieut. Thuis also inspected the Hospital Corps and the Signal Corps on August the third.

SATURDAY, AUG. 5TH.

Morning: Battalion Inspection in Quarters of 1st Infantry.

Afternoon: Regimental Inspection under arms.

These inspections were made by Lieutenant Lininger.

MONDAY, AUG. 7TH.

Morning: Battalion Inspection in Quarters of 2d Infantry.

Afternoon: Regimental Inspection under arms.

These inspections were made by Lieutenant Tarlton.

Before the inspections, beginning Friday, Aug. 4, were made the following system was adopted for the organizations, with a view of permitting comparison to be instituted between the different organizations and the different units of each. The figure 10 was adopted as perfect, and the subjects selected were: 1, Arms and accoutrements; 2, Clothing; 3, Quarters; 4, Kitchens; 5, Books, papers and records; 6, Non-commissioned officers; 7, Officers. The total possible would therefore be 70.

INSPECTION OF ARTILLERY BATTALION.

Taking up first the Inspection of the Artillery Battalion, it was on the morning of the 3d inst. paraded without arms or accoutrements and in rear of the pieces.

The men, although they had arrived in camp the day before, were in

good form except that, being supplied with but one service uniform of light color, the clothing was not clean.

The men were fairly well set up. The hat cords and ornaments were missing in whole or in part, except in Battery C.

In the general inspection the chief of the line of caissons was not in proper place, but his position was corrected by the major commanding.

After dismissal the tents and kitchens were examined. The equipments and accoutrements were properly placed, the tents were neat and orderly; the streets in order. The kitchens in fair condition, but little to criticise.

The men having been dismissed, the guns, carriages, caissons and harness were examined in place. The mounted batteries, considering that they had not been a full day in camp, were found as to material—particularly the harness—serviceable, not as neat, well brushed, as could have been expected.

On another occasion it is thought that the Captains should, as soon as possible after establishing camp, attend to the material.

Battery "C" was neat and orderly in appearance, but it must be noted that in comparison with the field artillery these lighter and smaller guns and carriages require less work to put them and preserve them in good order.

The stables were temporary and well arranged. At the formal inspection the horses, particularly of Battery A, were well groomed and cleanliness was apparent.

At casual inspections made informally from time to time during the encampment it appeared that sufficient care was not exercised to remove the manure promptly as prescribed by Drill Regulations.

In the afternoon inspection was made of the mounted batteries and Battery C.

The chests were not opened as required until directions were given, which should have been given before. The officers did not seem to be familiar with the ceremony of inspection, though it is laid down with ample detail in drill regulations. This ceremony can be and should be practiced at least once a month at the home station.

The commands in the Artillery Battalion were well given.

The books and papers were very casually examined and will be made the subject of remark later in this report.

To sum up, in general, the Battalion of Artillery as to drill and condition is serviceable. There is much room for improvement in attention to be paid to care of guns and harness in the field, and the details of ceremonies. There is evident interest and earnestness on the part of officers and men.

The inspection of the other organizations are set forth in the reports of Lieutenants Tarlton, Lininger and Thuis hereto appended.

RECORDS, BOOKS, PAPERS, CORRESPONDENCE.

A special examination was made by me as to the methods of keeping records, books, papers, correspondence. As a result it is found that in general this is not done in accordance with regulations and general orders, and for this negligence there does not seem to be any legitimate excuse.

The orders and regulations on the subject are clear, brief and explicit, and are supplemented by a pamphlet entitled "Instructions for Conducting Correspondence and Keeping the Records by the Organized Militia and Volunteer Forces," War Dept. A. G. O., Washington, 1904. This pamphlet should be in the hands of every regimental and battalion commander and of the adjutants. It should be carefully studied and scrupulously followed. This matter can be understood and complied with in time of peace, and if this were done the organization could take the field and carry out there the duties prescribed. The National Guard as well as the United States army is, as a rule, but a school during peace, and anything that can be thoroughly and easily learned in school ought not to be put off until actual war occurs, when there is much to be learned that can not at other times be taught. The educational feature should be held paramount.

Some excuses were urged that need only be mentioned that their fallacy may be apparent.

1st. The correspondence was in many cases not indexed because it was not sufficiently copious to require an index, those who were charged with it being able to remember.

The change of a colonel and particularly of an adjutant would leave everything in confusion.

2d. *Per contra* it was urged that the officer charged with the correspondence had not sufficient time to comply with all the requirements.

In that case he should at once be replaced by some officer who has or will take sufficient time.

The records should be so kept that if an organization were to take the field the system in vogue would simply be continued, and not be revised or supplemented in any way.

As to Regimental Records, it was found that in the 1st Regiment all the books and records required were not at Regimental Headquarters. The indexing was hardly worthy of the name.

In the 2d Regiment it was explained that though the books and indexes were not properly arranged, there was a transition stage at the time of the encampment, and a complete change was in progress.

In the 3d Regiment books, papers, correspondence and indexes were in excellent condition.

As to the battalions, it was found that in the 1st Battalion of the 1st Regiment the system of books, records, indexes and methods of correspondence were excellent, and might well serve as a model.

In the other battalions there was much carelessness as a rule.

This subject should be one of comment and order by the General commanding, and the Inspector-General of the Division should be directed to give it his special attention. Furthermore, there should be an insistence on sending communications promptly *through the proper channels*, and following up letters that require an answer promptly, and an insistence on early reply. Unless such replies are received promptly reprimand or court martial for neglect of duty should follow.

I dwell at some length on this subject for the reason that carelessness or negligence in these matters hardly seem excusable, leads often to delay, sometimes to confusion, and can be easily remedied,

SANITATION.

This was well attended to and was systematically carried out, due to the good arrangements made and the zeal of the officers charged with it.

GUARD DUTY.

The sentinels were alert, but poorly instructed as a rule.

Each relief should be inspected once by the officer of the guard, and every sentinel should in his presence be required to turn over the orders to his relief, being carefully corrected when he goes amiss. The instructions to be given to the sentinels should be printed in a leaflet some time in advance of the encampment. Each member of the different organizations should be furnished with a copy, and the accompanying officers should be required to have them read by the men at several drill nights before the encampment. In this manner the men could be well instructed and the supervision mentioned by the officer of the guard would serve to correct any defects.

COMMANDS AND COURTESIES.

Altogether too many of the company officers, and some of the field officers gave their commands not only badly, but very badly. For this there seems to be no valid excuse, as the methods of giving commands are explicitly and minutely laid down in ten paragraphs of Infantry Drill Regulations, a condensed text-book. Seeing the inspiring effect of commands well and sharply given, and the ill effect of commands given in a dull, slow, unimpressive manner, it seems that more impress should be given to this subject, and that when an officer is observed giving commands improperly he should, as soon as practicable, be taken aside and instructed. Some men through self-consciousness, diffidence or temperament, seem to be unable to inspire their men by brief, soldierly commands. These, if found incapable in this respect, should be set aside. Small as this detail may seem, it is evident that as ten paragraphs are devoted to it in the drill regulations it is considered of great importance by experienced officers.

Salutes, the conventional military method of recognition, and just as important as bowing to a lady is in civil life, are very badly given as a rule, and it is evident that in many cases it is due to sheer negligence; perhaps in some cases to a misunderstanding of its military propriety on the part of company officers. In very many cases the officers and men did not salute at all. In some cases the salute was given by men who remained seated; in others it was given by an awkward waving of the hand, which bore no semblance to the salute as prescribed. A little training in the armories or at the drill halls would correct this at once.

As the bearing of all the officers I came in contact with was habitually courteous, it is certain that they could instruct their men in like courteous bearing if they were to instill into them the fact that it is a military conventionality prescribed by regulations, and if not observed gives the impression not only of ignorance but of boorishness.

In concluding this report attention is invited to the fact that while criticism has been exercised freely, remedies have been indicated for the defects.

It is unnecessary to comment upon those features that are good, for whereas in most cases there is much to commend, the duties are well performed because they are well understood, and therefore need no comment. Criticism would be useless unless it were believed to be advantageous, for otherwise it would be mere fault-finding. But where the zeal and interest in the work undertaken is so great as in the Indiana National Guard, it is evident that it aims at not a fair but at a high standard, and suffers only by comparison with the highest, which I believe it seeks to attain.

I wish to reiterate the statement previously mentioned, that courteous consideration and an apparent effort to improve was the rule.

I forward herewith the following inclosures.

Appendix "I-1." General remarks by Lieut. Lininger.

Appendix "I-2." General remarks by Lieut. Thuis.

Appendix "J." Report on Inspection of 1st Infantry by Lieut. Lininger.

Appendix "K." Report on Inspection of 2d Infantry by Lieut. Tarlton.

Appendix "L." Report on Inspection of 3d Infantry by Lieut. Thuis.

Appendix "M." Report on Inspection of Hospital Corps by Lieut. Thuis.

Appendix "N." Report on Inspection of the Signal Corps by Lieut. Thuis.

Respectfully submitted.

CHARLES SHALER,

Brig.-Gen. U. S. A. Ret.

On Duty with Indiana National Guard.

REPORT No. 3. APPENDIX "I--1."

FORT BENJAMIN HARRISON, INDIANA,

August 11, 1905.

The Acting Inspector-General, Brigade Indiana National Guard, Fort Benjamin Harrison, Ind.:

Sir—As an Acting Assistant Inspector-General during the Encampment of the Indiana National Guard, August 2 to 11, 1905, I wish to speak of a few noticeable features, which came to my notice. The remarks are general and there are happy exceptions to all my unfavorable criticisms. The officers, especially those of the line, do not appear to come up to the standard that they should. They are lacking in military bearing and set up; do not perform their duties or give their commands in a manner to draw quick and responsive action from their men. They do not give to their offices the dignity that they should. They associate with their men, joke and laugh with them, go with them to the city and seem trying to make each of himself a hail-fellow well-met. No doubt in this class of service this can not be entirely overcome, but it should not be done in so noticeable a manner or to such a great extent. It cheapens the office.

There is a lack of military courtesy, both among officers and enlisted men. The junior officers especially do not give to their superiors the respect that is due their rank or experience. Even in the simple matter of saluting, which is one of the quickest tests of the discipline of a command,

there is great room for criticism. But the fault for this is put upon the officers. Naturally the enlisted men will not be punctilious in this matter unless it is required by their officers.

All organization commanders seemed to pay a great deal of attention to the sanitary condition of their camps. They were all kept well policed. The kitchens and store tents were clean and neat, some of course much better than others and a few could hardly have been improved upon. All companies had civilian cooks, and while this no doubt for the time being gave the men better food, it has one decided disadvantage—it does not instruct the men of the company in the preparing and handling of the government ration. If suddenly ordered into the field and cooks were not available, the company would most undoubtedly suffer from this. The army ration was issued and most or possibly all companies bought a few extras from company funds; and all this served to give an ample supply of good food. It was noticed that of the three infantry regiments but one had its kitchen and store tents located as prescribed by the Field Service Regulations.

The lack of knowledge of guard duty was a very noticeable feature, especially in the matter of courtesies, challenging, knowledge of general orders and similar points in the Manual. Officers allowed their guards and prisoners to associate as if there were no distinction. Officers in general were deficient in the knowledge of their own duties. The proper performance of guard duty is something that can not be taught during the ten days of an encampment. It can and should be learned at home, then when troops assemble they will be able to acquit themselves creditably. It is a very important duty.

In the matter of uniform, the Guard is in a woeful condition. But one service (Khaki) uniform is issued. This is soiled at the end of the railroad journey and long before the end of the encampment is in a very dirty, almost filthy condition. This, the soldier can not help, as he has neither time nor means to have his suit washed. He should have at least two uniforms. In the regular cavalry where it is worn, each trooper has about five or six Khaki and two olive drab uniforms. Some provision might also be made for uniform shoes. On the maneuver I noticed soldiers marching side by side wearing gymnasium, patent leather, russet, and ordinary black calfskin, and in all states of repair from brand new to worn out and some long ago. This not only spoils uniformity but is very apt to be injurious to the soldier who is not equipped with proper marching shoes. Other things were noticed lacking, such as hat cords, hat and collar ornaments, shoulder straps and chevrons.

While I have offered criticisms and stated them rather strongly, I believe the entire command took a great deal of interest in making the encampment a success. They worked hard and energetically, were willing and desirous of learning, were glad to be shown their weak points and how to correct them. Considering the limited time and the great amount of subject-matter to be covered, nothing could be taken up and taught thoroughly. But on the whole I believe the encampment resulted in a vast amount of good for the Indiana National Guard.

Very respectfully,

C. LININGER,
Second Lieut. 1st Cavalry, Actg. Asst. Inspector-General.

REPORT No. 3. APPENDIX "I—2."

MADISON BARRACKS, NEW YORK,
August 28, 1905.

General Chas. Shaler, Acting Inspector-General, Indiana National Guard:

Sir—In reference to your letter of the 21st instant, I have embodied a few remarks of comment and criticism on

First. The encampment and troops as a whole.

Second. The maneuvers as carried out in the field.

Some perhaps have already been embodied in previous reports, but this I can not avoid, because my notes are destroyed and I did not retain a copy of former reports.

First. Length of encampment too short. Since time is short and since regiments do not do the same thing twice during its tour of duty in camp, lectures should be given the day previous the practical exercises take place. For instance, if the First Regiment is scheduled to dig entrenchments today, a lecture on this subject should have been given yesterday. Again, if this same regiment is to fire on the range tomorrow, a lecture on Small Arms Firing should be given today. In this way officers, who are enthusiastic and energetic, could, by taking notes and before retiring for the night, read them over and at the same time consult an appropriate text-book, glean much information that they would not otherwise get. The enlisted men would be benefited as well as the officers, for through the latter they would obtain their instruction and information.

Orders should pass directly from regimental headquarters to the companies and not through the battalion headquarters, thereby saving time and labor. Battalion staff and non-commissioned staff would then be available for duty as assistants and clerks to the Adjutant, Quartermaster, and Commissary; and also be available for such odd jobs as Signal, Engineer, Range officer, etc.

The Quartermaster and Commissaries should issue supplies and stores in order that they get the proper experience in paper work.

More attention should be paid to military courtesies. Officers are prone to neglect these and adopt the good-fellowship proposition entirely.

Guard duty appeared to be a great stumbling block for all, but as the encampment progressed, much improvement was noticed as to form and method. It is thought, however, that the spirit of the orders given was not carried out. A number of apparent breaches in orders were noticeable.

It was learned that many of the National Guardsmen attended the encampment purely from a pleasureable standpoint, with no intention to work, using their vacation allowance for this purpose.

Second. To sum up the whole thing in a few words, I might say that few were benefited by the maneuvers and that none displayed any great knowledge of field work. Those few officers who were in the State volunteers in '98 had a fair idea of how matters should go, but this number was very much in the minority and they had all they could do to look out after their own affairs. Many faults were found in regard to the disposition of troops, use of cover, tactics and especially security and information.

Very respectfully,

CHAS. A. THUIS,
2d Lieut. 23d Infantry.

REPORT No. 3. APPENDIX "J."

CAMP OF INSTRUCTION, FORT BENJ. HARRISON,
NEAR INDIANAPOLIS, Aug. 7, 1905.

To the Acting Inspector-General, Indiana National Guard, Fort Benj. Harrison, Indiana:

Sir—I have the honor to render the following report of Inspection of the First Infantry, I. N. G., made this date:

The band and the twelve companies were each inspected, the companies under arms, on their several parade grounds. Uniform, Khaki. Blanket roll was ordered made, and it and all equipments to be exposed to view in the tents. Inspection began promptly at 9:00 a. m. A rating on a scale of ten (10) was made on various items in each organization, as follows:

Clothing: Cleanliness; fit; completeness; uniformity in color of shoes. Things mainly lacking being hat cords, letters and numbers; chevrons.

Quarters: Policing; sanitation. In every organization there were cases where all equipment was not exposed to the view of the inspector.

Kitchens: Sanitation; policing, neatness and cleanliness of cooks in person; convenience in arrangement of kitchen utensils. No kitchen or store tent in the regiment is located as prescribed by the Field Service Regulations.

Books, Papers and Records: Neatness; completion to date.

Arms and Accoutrements: Cleanliness; completeness. In every organization there were numbers of cases where the individual mess furniture of the soldier was not properly cleaned.

Officers: Military bearing; manner of giving commands; military bearing and general appearance of the Company as shown at inspection; knowledge of the Company in Guard Duty as evinced by questioning individuals.

Non-commissioned Officers: Military bearing and general set up of themselves and squads; general knowledge of duties as shown at Inspection and by questions. In no company did the First Regiment carry out the instructions of Par. 493, Inf. Drill Reg., 1904.

Special mention is made in the following cases:

Band: Has no books. Commanding officer was not in complete uniform, and lacked side arms.

Co. C: Did not have complete records.

Co. M: Did not have complete records.

A relief of the guard was inspected between 1:00 and 2:00 p. m. They were very deficient in knowledge of Guard Duty. No one even knew his general orders. The guard report had not been obtained at First Sergeants' Call.

The latrines were in good shape.

The camp had been well policed, and the sanitary conditions on the whole was good.

Very respectfully,

C. LININGER,
Second Lieut. 1st U. S. Cav.,
A. A. Insp.-Gen.

REPORT No. 3. APPENDIX "K."

CAMP OF INSTRUCTION, FORT BENJ. HARRISON,
NEAR INDIANAPOLIS, Aug. 7, 1905.

To the Acting Inspector-General, Indiana National Guard:

Sir—I have the honor to make the following report upon the inspection of the 2d Infantry, I. N. G., held at Camp of Instruction, Fort Benj. Harrison, August 5, 1905:

The Inspection commenced promptly at the designated hour, 9:00 a. m. The arms and accoutrements were serviceable and clean.

The clothing was serviceable and good, but dirty from camp wear.

The quarters were in splendid shape, and clean.

The kitchens clean and well arranged, the slop cans being scalded and washed each day.

The non-commissioned officers taking an interest, and knowing their duties fairly well. In most cases the First Sergeants and the Quartermaster-Sergeants performing their duties in a most satisfactory manner.

There was quite a difference in the make up of the officers of the line; some were snappy and well informed; others hardly up to the positions they were occupying; while in several cases it appeared as if it would be well to bring some of them before the examining board; but in most cases the officers seemed desirous to gain information and improve their position.

The attendance at Inspection was good, considering the number of men each Company had taken to camp.

The Regiment formed under arms upon its parade grounds in 7 minutes and 15 seconds, which was considered very good.

The Band is a new one, but was considered very good.

The Quartermaster Department was clean, and the employes seemed to take an interest, and many conveniences had been arranged for the care of the horses.

The Commissary Department was well handled and kept in fine order.

The latrines were clean and did not give an offensive smell. They were well arranged, and splendidly located.

The Field and Staff, taken as a whole, well informed, and each seemed well equipped in his respective knowledge of his department.

The Drill and Review was well conducted and performed. The movements of the different Companies and Battalions were snappy and uniform.

The Regiment had 472 men present out of a total of 507 men in camp.

Very respectfully,

C. S. TARLTON,
First Lieut. 1st Inf. U. S. A.

REPORT No. 3. APPENDIX "L."

VINCENNES, IND., August 16, 1905.

To the Acting Inspector-General, Camp of Instruction, Fort Benjamin Harrison, Near Indianapolis, Indiana:

Sir—I have the honor to submit the following report of an inspection made by me of the Third Regiment, Indiana National Guard, at Camp of Instruction, Fort Benjamin Harrison, near Indianapolis, Aug. 4, 1905.

The companies were inspected under arms on their respective parade grounds. Immediately after the inspection of arms and accoutrements the company quarters, records and sinks were inspected; after which a general camp inspection was carried out.

During the company inspection it was found that about three-fourths of the men were recruits who had never before participated in an encampment, and whose knowledge of a soldier's life in the field practically amounted to nothing. Perhaps about one-half of the line officers were little better off than the enlisted men, and of the whole of the line officers not one could be graded higher than 70 per cent. in general efficiency. Naturally none of them were able to impart much information and instruction to the men under them.

The arms and accoutrements as a rule were found to be in fair condition. Company B, however, had its arms in very good shape, which showed that the men had spent considerable time and labor in preparing them for inspection.

The clothing was insufficient in quantity. Nine-tenths of the men had only one suit of Khaki, and with this suit they mounted guard, attended inspections and drills, and performed all sorts of field service and police duty. Some few men had hat cords; others had numbers and letters; none had both, and a large number had neither. The Regimental Commander informed me that these things had been requisitioned for prior to going into camp.

The quarters and kitchens as a rule were in very good condition; their sanitation excellent. It appears that the line officers gave these matters their greatest amount of attention.

With the exception of a few the Company Commanders did not keep their records and papers in good shape; while none kept them entirely according to the army methods now in use.

Of the non-commissioned officers very few had any real conception of their duties as such, and were unable to answer some of the simplest questions put to them by the inspecting officer.

The members of the guard were inspected at the Guard House, and one relief on post. Out of the entire guard only one man was found who could recite his general orders. Non-commissioned officers as well were unable to recite the general orders; also, they were unable to give intelligently their duties as non-commissioned officers of the guard.

The drill, as well as the other duties, was performed in a lifeless manner. The quality of the commands given contained everything short of snap, accent, decision, animation, etc. Naturally the movements were slovenly executed and inaccurate. Too much talking was permitted among

the men while presumably standing at attention. The military bearing of all, both officers and men, was poor.

Military courtesies among all were lax.

Business-like methods in doing most things were absent, there being little or no system.

For the betterment of the National Guard in the future the following recommendations, which are thought could be easily carried out, are annexed: Paulins, or large tentage should be issued to companies for mess purposes; temporary shower baths, which should cost very little, should be erected; more clothing should be issued; troops dressed in Khaki should have at least three suits, while those dressed in blue should have at least two changes. There should be detailed with each company for instruction purposes two non-commissioned officers of the regular establishment; with each regiment three commissioned officers, regular army. The tour of duty should be at least increased to one month.

Very respectfully,

CHAS. A. THUIS,
Second Lieut. 23d U. S. Inf.

A. A. Insp.-Gen.

REPORT No. 3. APPENDIX "M."

VINCENNES, IND., August 19, 1905.

To the Acting Inspector-General, Indiana National Guard, Camp of Instruction, Fort Benjamin Harrison, Near Indianapolis, Ind.:

Sir—I have the honor to submit the following report of an inspection made by me of the Hospital Corps, I. N. G., at Camp of Instruction, Fort Benj. Harrison, near Indianapolis, Ind., Aug. 3, 1905:

	<i>Per cent.</i>
Equipment	5
Clothing	8
Quarters	8
Kitchen	7
Discipline	6
Military Courtesies	6
Drill	7
General Camp Sanitation.....	9
Personnel—	
Officers	9
Men	9.5

— 74.5

The above markings are made on a basis of 10 being the highest.

Equipment: Need more field pouches and litters, and at least two more ambulances. The medicine chests are not up to date; they are too large and heavy. Aluminum bottles and receptacles should be used instead of glass. Some of the medicines are obsolete.

Clothing: Good, but insufficient in quantity.

Kitchen: Poorly equipped. Instead of a wall tent fly the kitchen should have a paulin for covering.

The tents should be so arranged and connected as to have a continuous ward or wards. The wards should have board floors. There should be a large tent or paulin set aside for a dining room for the Corps, and particularly for the patients, and should be equipped with tables and benches.

The reason why the enlisted men received so high a mark is because over three-fourths are professional men (doctors and pharmacists) and medical students.

Very respectfully,

CHAS. A. THUIS,
Second Lieut. 23d U. S. Inf.

REPORT No. 3. APPENDIX "N."

VINCENNES, IND., August 19, 1905.

To the Acting Inspector-General, Indiana National Guard, Camp of Instruction, Fort Benjamin Harrison, Near Indianapolis, Ind.:

Sir—I have the honor to submit the following report of an inspection made by me of the Signal Corps, I. N. G., at Camp of Instruction, Fort Benj. Harrison, near Indianapolis, Ind., Aug. 3, 1905:

	<i>Per cent.</i>
Equipment	7
Clothing	8
Quarters	9
Kitchen	8
Discipline	7
Military Courtesies	7
Drill	8
General Camp Sanitation	9
Personnel—	
Officers	8
Men	8

— 79

The above markings are made on a basis of 10 being the highest.

Equipment: Since the several regiments are not provided with flags and heliographic instruments, the Corps should have a larger quantity on hand. They should also be provided with acetylene lamps and better field glasses; and perhaps the necessary meteorological instruments for target ranges.

Clothing: Good, but insufficient in quantity.

The construction of the telegraph line in the field, Aug. 8th, was considered an excellent piece of work, both as regards time and method of construction.

Very respectfully,

CHAS. A. THUIS,
Second Lieut. 23d U. S. Inf.

REPORT No. 4.

INDIANAPOLIS, IND., August 15, 1905.

To the Assistant Adjutant-General, Indianapolis, Indiana:

Sir—I have the honor to make the following report relative to the work of the Medical Department during recent Camp of Instruction, held at Post Benjamin Harrison, near Indianapolis, August 2 to 11, inclusive.

A general comment may be made to the effect that this camp presents an improvement over the camp of the preceding year, and yet there is very apparent room for further improvement.

Water: At its source the water supply was excellent, but by reason of the use of old pipes, was physically contaminated at the distributing

points. Either these were old oil pipes still containing certain oleaginous gummy deposits, or the pipe fitters had used unreasonable quantities of greasy substance to seal the connections. The consequence was that for the first few days all the water in the camp was offensively oily, a scum arising to surface on standing.

From the age of the pipes heavy deposits of rust and scale were present, settling as a very heavy sediment when allowed to stand. As the end of camp approached this became obviously better, yet there remained in the minds of officers and men the first impression of an unfit water supply. Horses, during these first few days, when it was at its worst, refused it—this at particular places where the circulation in the pipes was most sluggish.

In no case do I believe this to have been the cause of sickness, nor do I believe it to have been bad except physically, and this was confirmed by analysis; yet this must be understood, that no compromise on this point is safe. The purest water obtainable should be insisted upon. The health of your men depends on this, and consequently the fighting force, the whole integrity of an army. The best water obtainable always, and this means physically, chemically and bacteriologically.

Chemical analysis was conducted in the field by detachments from Hospital corps—these detachments preceding columns to points of bivouac and analyzing such water as might be used. In several instances wells and streams were condemned as unfit and prevented from use by armed guards.

The sooner it is understood the better, that no unnecessary policy of economy be applied to health conditions. If military sanitation and effectiveness are to come up to the new standards established in the leading armies of the world during the last few years, we must insist on these few elementary principles that make it possible.

Commissary: The rations furnished were wholly satisfactory with certain reservations. Some supplies of potatoes were badly rotted, yet they were exchanged at once on representation of cooks and regimental quartermasters.

Some more uniform method of cutting and distributing meats should be adopted. One company received its designated meat ration in a large, unutilized section of quarter, all good, sweet meat. The adjoining company its allotment in ends and scraps—trimmings. It is definitely understood that there must be some slight variance, but more uniformity, and this means fairness of distribution, is advised. This will contribute materially towards fostering a wholesome contentment among the men.

Kitchens were uniformly neat, no very faulty conditions being observable anywhere. The 2d Regiment deserves special commendation on this point, and this conspicuous instance is believed to be due largely to the kitchen line being established directly at the head of the Company streets in front of officers' quarters. This means unavoidably an hourly oversight, and it is strongly recommended that other organizations hereafter pursue the same course. The policing, care of quarters and general drainage can be dismissed as generally satisfactory, the few exceptions being of individual dereliction and not to any lowering of standards.

Sinks: The problem of sinks is one of fixing responsibility. Battalion

sinks were recommended this year by the Medical Department. For some reason, only two sinks were provided each Regiment, and in these no provision was made for urinals, with the resulting and inevitable end, that seats were soiled, walls and corners contaminated, and local conditions rendered less sanitary than they might have been. The more nearly responsibility is fixed on company commanders, the less likelihood of failure in this detail of sanitation. It is believed, however, that this precaution is not weakened materially in fixing on battalion sinks and at the same time, this with the minimum of digging, scattering of paper and greater and more rapid facilities towards cleanliness.

In this camp a battalion and a half used each sink, and divided responsibility was evident. These conditions, however, were better than at any time formerly, and the type of sink with drilling sides and open top is commended as superior to any other for the summer season.

Flies were not present, ventilation of course perfect, and these objections to the tent entirely obviated.

Special commendation is due the 3d Regiment for promptness in constructing a regimental sink on bivouac of adequate size and convenience of arrangement—makeshifts or total neglect being evident in other organizations.

It is believed that no greater improvement can be shown in any organization than in the Hospital Corps, and this is attributed wholly to the assiduous attention and enthusiastic work of Major Sommer, his subordinate officers, and a splendid personnel in the corps.

Little of actual sickness was met with, cases of temporary emergency being frequent, however. Attention has already been called to work on water and milk analysis by details from this organization. Too great stress can not be laid on the importance of this. Prevention is the modern word, not cure, and more and more will it be the office of our medical officers to exercise their utmost efforts along these lines. They will, of course, not neglect the strictly and medically professional code of "healing the sick," but they are simply in accord with the admitted axiom that "prevention is better than cure."

One caution as to the amount of work that may be safely imposed on men. The rank and file come from all walks of civilian life, laborers, clerks, stenographers, salesmen of various sorts, men out of all mercantile lines, and a few from professional circles. These men are not physically fit, from the standpoint of subjecting them to great tests of endurance. In many instances the exposure to drill in heat of the sun is alone sufficient to exhaust, and often causes mild degrees of prostration. It is a mistake to subject them to the gruelling exercises that would try a seasoned campaigner.

Problems of tactics and maneuvers should be planned with this in view. In the one exercise of this last camp, this mistake was made, particularly in the 2d Regiment, the men went practically without mess for twelve hours while engaged in active marching, except for very brief interruption. Following this exercise, the regiment was utterly exhausted, and many sick. The same end might have been accomplished with imposition of less hardship. The problem of enlisting full companies and of promoting re-enlistment among already trained men will not be made

easier by taxing them to the point of physical if not moral revolt. The point is that men rise to the occasion when imperative, no matter how severe the demand, no suffering, no sacrifice is too great for the American soldier to make in the hour of need, but he should not be called on in militia camps, when physically untrained to do that which would be a trial to the man long seasoned by every sort of privation and campaign.

Very respectfully,

FRED R. CHARLTON,
Lieut.-Col. and Asst. Surgeon-General.

REPORT No. 4. APPENDIX "O."

HOSPITAL CORPS, INDIANA NATIONAL GUARD,
INDIANAPOLIS, August 31, 1905.

To the Assistant Surgeon-General, Indiana National Guard, Indianapolis:

Sir—I have the honor to submit the following report on tour of duty at Camp of Instruction, Fort Benjamin Harrison, August 2d to 11th, 1905, inclusive, viz.:

Paragraph 5, Special Orders No. 95, Headquarters Indiana National Guard, July 13, 1905, assigned me as Commanding Officer of the Hospital Corps, and in pursuance of General Orders No. 5, Adjutant-General's Office, July 12, 1905, and Special Orders No. 108, Headquarters Indiana National Guard, the Quartermaster of the Hospital Corps with a detail of four (4) men left the home station for Fort Benjamin Harrison on August 1st, and proceeded to draw property from Post Quartermaster's Depot then on the grounds, and on arrival of the Hospital Corps on the morning of the 2d, I proceeded to pitch and equip a hospital of 50 beds on a site already selected, within easy reach of all organizations comprising the Division.

The camp site was an ideal one, being situated entirely in the open on a slight elevation which fell away gradually toward the right flank.

The equipment used by the Indiana National Guard for field hospital work, was to be had on the ground, and the work of transferring it to the proposed site was already under the supervision of Capt. F. J. Boatman, Quartermaster, and Lieut. H. E. Figg, Assistant Surgeon, who were assigned to duty with me, and both proved to be able assistants. The personnel of the hospital on August 2d consisted of one major, surgeon; one captain, quartermaster; one lieutenant, assistant surgeon; four sergeants, first class; ten sergeants; sixteen privates, first class; thirty-six privates, of the Hospital Corps.

With these men, the tentage for the entire Hospital (comprising 44 tents) was pitched, and the quipment at hand was placed in condition for use and the hospital began to receive patients at noon on August 2d.

From that date until August 11th, 31 patients were received, all of whom were returned to duty either during the period of camp or upon the departure of their respective organizations for their home stations. No deaths occurred.

Of the 31 cases treated, 8 were slight injuries, 7 diarrhoea, 7 disturbances of digestion, 2 exhaustion, and one each of conjunctivitis, tonsillitis, paraphimosis, herpes, orchitis, hemorrhoids, and ivy poisoning.

Besides cases treated in hospital, 20 cases were referred to hospital by surgeons of regiments, for treatment of dental ailments, comprising extractions, alveolar abscesses and odontalgia, which were treated by our sergeants in charge of dental work.

In pursuance of instructions from the Assistant Surgeon-General, one sergeant and one private was ordered to report to the surgeon of each regiment, and one sergeant first class, and one private to the Commanding Officer of the Artillery Battalion, for duty during tour of camp duty. When regiments left camp on expedition of August 8th and 9th, five additional privates were assigned to each regiment.

During tour of camp duty, the routine work of the Hospital Corps was performed by the men, the Commanding Officer having in mind in his assignments only the individual fitness of the men for the particular duty assigned them. Drill was established and carried out so far as time could be spared for them from other necessary duties.

For report on maneuvers of August 8th and 9th, attention is called to special report of Commanding Officer of Hospital in Assistant Surgeon-General's Office.

In pursuance of Order from the Asst. Surgeon-General, the Field Hospital was discontinued on August 11th, all patients having been disposed of as indicated above, and the commissioned and enlisted personnel of the Hospital Corps proceeded to their home stations. The medical property was packed and shipped to the armory of the Hospital Corps, at Indianapolis, and the quartermaster's supplies turned in to the Post Quartermaster's Depot.

As regards the medical, surgical and quartermaster's supplies, with which we established our hospital, I have the honor to state that the tentage was good and ample, but in the way of furniture, bedding and surgical supplies, the cots were of a bulky pattern, and have seen much hard service. The bedding was good. The medical chests were large and bulky, and contained much obsolete material. In the way of improvement to the service of the Medical Department, I have the honor to recommend that the regulation equipment for Field Hospital work as prescribed by the Manual for the Medical Department, U. S. A., be secured for service in the Indiana National Guard.

The chief objections to the present equipment are: First, should the Indiana Organized Militia be mustered into the United States Service, the equipment would not fit in, in any respect with that issued by the United States Government.

Second, the question of transportation: With the transportation required to mobilize our present field hospital of 50 beds, I could transport a complete field hospital of 108 beds comprised of the regulation equipment.

As regards the amount of dental service required, which heretofore has been done by practicing dentists who are sergeants in the Hospital Corps, and have been assigned to this duty by reason of their special qualifications, I have the honor to state that I believe the amount of this class

of work done would justify the appointment of a dental surgeon with an assistant.

Very respectfully,

EDGAR F. SOMMER,
Major Comdg. Hosp. Corps, I. N. G.,
Comdg. Officer, Field Hospital.

REPORT No. 4. APPENDIX "P."

Note: For purposes of arrangement, this report is introduced as an appendix to the report of the Asst. Surgeon-General.

HEADQUARTERS 2D INFANTRY,
INDIANAPOLIS, IND., September 1, 1905.

Col. H. B. Smith, Comdg. 2d Inf., I. N. G.:

Sir—In accordance with your verbal request I submit the following report for your consideration:

I reported at Camp Benj. Harrison, August 2d, 1905, and remained in Camp until and including August 11th, 1905. Capt. J. R. Newcomb and Lieut. John Wallace were present for duty during the same time. One sergeant and one private of the Hospital Corps reported August 3d and remained attached to our command during the tour of duty.

Lieutenant Wallace was appointed Sanitary Officer of the Regiment, as it is customary in the service to assign that duty to the junior Medical Officer of a command. He was instructed to make an inspection of the Camp twice daily, and submit a report of same, which report was submitted to you for your consideration.

This inspection was to include the appearance and cleanliness of the men, the appearance of the tents, kitchens, garbage cans, and the sinks. Copies of each report were kept for reference.

At the first Officers' Meeting, Officers were told that Commanding Officers of Companies would be held responsible for everything within their lines. That Battalion Officers would be held responsible for everything within the lines of the Battalion. Also that if the Company Officers did not see that all Sanitary and Hygienic instructions were carried out, a report of such failure would be made to his Battalion Commander, and if conditions were not remedied, a report of the same would then be made to the Commanding Officer of the Regiment. It is a pleasure for me to say that it was not necessary to report any officer for failure to perform his duty.

By order of the Colonel Commanding, the latrines were placed under the charge of Lieutenant White, there being only two for the Regiment it was not possible to hold Battalion Officers responsible for same.

Every morning the sinks were burned out with crude oil, then lime was poured in them and on the sides of the same, and lastly dirt was thrown in to cover all that remained. In this way the odor was kept down, and flies did not have the usual opportunity to distribute infection. The sinks were constructed before the troops arrived, and the plan of construction was superior to that of former years when a tent was used.

The sickness in the Command was slight, the number carried on sick report averaging seven or eight, of which there were three in Division Hospital during the entire time of the encampment. Those excused from duty in quarters were excused because of minor injuries, with the exception of one or two cases. Several men were sent home from camp because of venereal disease. Company Officers should be instructed to leave such men at home, as they are a menace to the health of the other men in the Company.

The water to be had at this Encampment was of good quality and plentifully supplied. There was, I think, less eating of fruits and such things purchased at the Sutler's tent than in former years, and this was a feature in decrease of number of men on sick report.

On Tuesday, August 8th, the regiment left Camp on a practice march and did not return to Camp till nearly noon of August 9th.

Six Hospital Corpsmen reported to our Command for duty during the march and marched in the rear of the Regiment under the command of the Sergeant already on duty with our Regiment. While on the march Lieutenant Wallace took the rear of the column and was instructed to care for such men as should need medical or surgical treatment.

On arrival at the old Lawrence Fair Grounds, where the Regiment temporarily bivouaced, sinks were dug in the rear of each Battalion. As the Regiment remained there but a few hours, they were used little if at all, and were filled up when the Regiment left the grounds. On the return march to Camp and from Camp to position occupied by the Regiment in the battle exercises, Lieutenant Wallace again took position in rear of the Regiment. When Regiment took position to defend the Camp, Lieutenant Wallace was placed immediately in the rear of the firing line where he could best render service to the wounded. Captain Newcomb with a Sergeant and three Hospital Corpsmen established a dressing station in a valley about one quarter of a mile behind the line and close to the road. I took position, theoretically, at an imaginary ambulance station, the general hospital at Camp being considered our field hospital.

We returned to Camp with the Regiment before noon of Wednesday, August 9th.

The men rested during the afternoon and at sick call the next morning there were noticeable no serious affections resulting from the severe service. A few men reported with blistered feet, but they were soon relieved.

During the remaining days of the Encampment there were no unusual calls for the services of the medical officers.

I wish before closing to call attention to the fact that when the Regiment marched to the Rifle Range the Hospital Corpsmen were sent out without mess.

I wish to commend the building of sinks as they were built this year, though I think there should be one sink to each Battalion.

Also, I would recommend the arrangement of the Camp by which the kitchens and commissary tents were placed near the tents of the Company Officers. I commend the holding of the officers specifically responsible for conditions which may come under their control. I recommend the abolishing of the sale to the men of fruits, pastries, and such other things as are found in the Sutler's tent.

I also recommend that all officers be instructed to inform themselves regarding Camp Sanitation and Hygiene, and the means of prevention of disease, so that they may be better prepared to instruct the men regarding the same, and to keep their camps in proper condition.

Officers of the regular establishment are required to study these subjects and take examination in them, and I think all officers of the National Guard should have some knowledge of the same.

Respectfully submitted,

HOMER I. JONES,
Major Surgeon, 2d Infantry.

REPORT No. 5.

OFFICE DIVISION QUARTERMASTER.
INDIANAPOLIS, IND., August 30, 1905.

To the Assistant Adjutant-General, Indiana National Guard:

Sir—Pursuant to Paragraph I, Special Orders 99, c. s. Headquarters Indiana National Guard, your A. Q. M. G. established depot for annual Camp of Instruction at Fort Benjamin Harrison, at seven a. m. on July 29th, 1905. One large tent, which was also used as an assembly tent, had been erected by the Quartermaster-General and was ready for the arrival of the first train load of supplies, which reached camp at nine a. m. Before dark of same day all supplies for which requisition had been made were at the camp ground, and additional tentage had been erected sufficient to protect the property. The handling of supplies was made easier by the erection of a large platform which enabled the force of employees to unload on a line with car doors. Sunday was used by the force of employees in sorting and arranging supplies, and verifying the invoices.

Under Paragraph 11, Special Orders, above referred to, Regimental Quartermasters were directed to report to your A. Q. M. G. at nine a. m. on Monday, July 31st, with specified details. As a matter of fact, but one Quartermaster reported at this time, and he without detail. The Q. M. of the Second Infantry had previously obtained permission to report at ten o'clock, promptly, at which time he reported with complete detail. Your A. Q. M. G. made official report during Camp of Instruction as to time of reporting of Regimental Quartermasters and details.

Wheel transportation was ample and each Q. M. was promptly issued his allotment and before dark of the 31st of July an issue based on five hundred men to the regiment had been made and was on the regimental camp grounds. The traction company who had the contract for transporting the Quartermaster's supplies had ample transportation for the purpose, and no criticism could be made of their handling of the same. No serious complaint was made of shortage in equipment. Your A. Q. M. G. was able to fill all proper requisitions with the exception of such property to be used specifically by officers. Tables and chairs were short and cots not in the best of condition. Public animals furnished by contractor were as satisfactory as could be expected under the contract. Team horses furnished for the artillery battalion were probably the best ever furnished.

and mounts supplied were fully equal to those furnished in the past. The return of equipment by the Regimental Quartermasters to depot was carried on under different system than any heretofore used. No property was received by your A. Q. M. G. until Saturday morning, August 12th, and in most instances was loaded direct from the wagon to the cars, thus saving one handling. The traction company had ample transportation available, and the last carload of equipment reached the city before dark on the same day.

In the employment of civilian employes your A. Q. M. G. engaged the needed number through a contractor, who acted as foreman of the gang, and none but negroes were employed. This plan was more successful even than had been hoped, and it is believed that more efficient service was rendered by them. Your A. Q. M. G. is pleased to report that to the best of his knowledge fewer complaints were received from any source in regard to the workings of the Quartermaster's department during this Encampment than any other since he has held the office. The property was better handled, better cared for, and many of the petty annoyances that have heretofore made his life miserable were absent.

In compliance with recommendation of your A. Q. M. G. orders were issued limiting the size of company mess chests. An error was made, however, in not recommending that the contents of these mess chests also be limited. It seems to be the custom of company commanders to load into mess chests all kinds of company property from blankets to mascots, and while, except in a few instances, of which previous report has been made to you, company commanders complied with orders as to size of chests, as many men were needed to handle them as heretofore.

Orders covering transportation of troops provided for the unloading of a number of organizations on spur of the Big Four Railroad extending into the Reservation. Under instructions from headquarters the unloading of troops and company baggage was to be done in the shortest possible time in order to avoid blockades. In most instances these instructions were complied with. The Acting Quartermaster of the First Infantry misunderstood instructions to proceed with his wagon to the spur track of the Big Four Railroad and instead went to Lawrence, thus causing considerable delay and narrowly avoiding blockade. Should the Big Four again be used for transportation of troops and baggage, it is respectfully recommended that a bridge be constructed over the ditch at the side of the track, thus considerably lightening the labor required in unloading.

In return of property by Regimental Quartermasters to depot comparatively little shortage existed, the greatest item being in the utensils packed in field ovens. This shortage could be entirely obviated and the service bettered, it is believed, by making a permanent issue of ovens to company organizations, and your A. Q. M. G. would respectfully recommend that such issue be made. In his report of August 30th, 1904, your A. Q. M. G. recommended that only such issue be made by the Quartermaster's Department to officers of the Indiana National Guard as are made to officers in the regular establishment and he begs to repeat this recommendation, as experience in the last camp has tended to more firmly convince him of its wisdom. The criticism heretofore made covering the transportation and

subsistence of Quartermaster's details need not obtain this year, as all due arrangements were properly made. However, stringent measures should be adopted to insure the reporting on time of such details.

Considerable embarrassment was caused your A. Q. M. G. when requisition was made on him for mounts for army officers who were guests of the organization, inasmuch as the mounts furnished him by the contractor, while adequate for general purposes, were hardly of the grade that should be supplied these officers who were rendering the Guard efficient service without cost. It is therefore respectfully recommended that should the same conditions again obtain your A. Q. M. G. be given authority to secure a better grade of mounts at the discretion of the Commanding General.

The tentage furnished the National Guard is almost without exception below standard, and steps should be taken to have the same condemned. During the last two camps of instruction the artillery battalion has been furnished conical wall tents, and it is respectfully recommended that if the tentage now on hand can be condemned, an effort be made to secure the conical wall tents.

During the two camps held on the Government Reservation there has been a public mess maintained by a sutler who had the exclusive privilege therefor. Your A. Q. M. G. is of the opinion that the granting of such exclusive privilege is not to the best interest of the service, as the monopoly tends to produce unsatisfactory results. Civilian employes of the various departments have been subsisted at this public mess, and there has been constant complaint of the service given. On the day following the breaking of camp your Quartermaster's employes went on strike because of breakfast furnished them, and it was only by strenuous efforts that annoying delays were avoided. But by a personal expenditure of money in purchasing additional supplies and strong protest to sutler, the trouble was bridged over and the last meal furnished was entirely satisfactory, and what the previous ones should have been. This complaint of employes is an annual one, and for this reason your A. Q. M. G. would recommend that a mess be established under the control of the Assistant Commissary-General at which all civilian employes would be subsisted.

During the Camp of Instruction just closed only one regular Regimental Quartermaster was on duty, the First and Third Infantry having Acting Quartermasters, and they without previous experience in this department. In spite of this handicap, however, the work of the department was carried out more successfully, in the opinion of your A. Q. M. G., than during any previous Encampment during his incumbency of the office. For this result he is not only indebted to the junior officers of the department, but to the consistent support rendered him by the Quartermaster-General's office and the Headquarters of the Indiana National Guard.

Very respectfully,

CARROLL B. CARR,
Major I. N. G., A. Q. M. G.

REPORT No. 6.

HEADQUARTERS INDIANA NATIONAL GUARD,
OFFICE OF DIVISION COMMISSARY.
INDIANAPOLIS, August 24, 1905.

To the Assistant Adjutant-General, Indiana National Guard:

Sir—I have the honor to submit the following report on tour of duty at Camp of Instruction, Fort Benjamin Harrison, August 2d to 11th, 1905, inclusive, viz.:

In compliance with Paragraph 5, S. O. No. 99, A. A. G. O., July 19, 1905, the Asst. Commissary-General proceeded to Fort Benjamin Harrison July 30, 1905, arriving there at 6.50 a. m. Acting Post Commissary Sergt. Clyde E. Botkins reported promptly at 8.45 a. m.

The large tent to be used as a commissary depot had been previously erected under the direction of the Quartermaster-General, and was of ample size, but of inferior quality, leaking badly during a heavy shower. No particular damage was done as the depot was well supplied with mess shelters to protect the supplies, but a tent of heavier canvas should be procured as soon as possible.

Issues were made to the commissary officers of the various organizations immediately upon their arrival in camp with advance detail, on Tuesday, Aug. 1st, 1905, and by them to the companies as fast as they arrived on Wednesday, August 2, 1905.

No complaint of any importance reached this office as to the quantity or quality of the rations issued. Such complaints as were received were of a minor character, readily adjusted and not worthy of especial mention. They were due almost wholly to the ignorance of the company commanders and quartermaster-sergeants as to the proper method of handling the rations issued to them.

On August 2d, 1905, the following list of questions, to be answered by company quartermaster-sergeants, was given to each commissary officer. viz.:

- I. Have you ever seen a copy of Circular No. 2, A. A. G. O., July 14, 1905?
- II. Have you a copy of the Manual for Army Cooks?
- III. Did you study this book before coming to camp?
- IV. Previous to coming to camp did your company commander give you any instruction regarding your duties in handling the company rations?
- V. Are the company cooks civilians or enlisted men?
- VI. Do you make daily issues of rations to the cooks?
- VII. Do cooks have access to rations not issued?

Instructions were given to each officer to return written report of the answers received by 7.00 p. m., August 3d, 1905. All the reports were in promptly and are on file in this office. Where the reports show lack of instruction, the Asst. Commissary-General made a personal investigation and gave such instructions as would enable the quartermaster to properly care for the rations, if carried out.

These reports show very little, if any, improvement over conditions as they existed in 1904.

Wednesday, August 9th, an inspection was made of all the company kitchens and quartermaster-sergeants with a view of determining whether or not the rations issued and still due the companies would be sufficient. Only a few complaints of shortages were received, and these were adjusted by the regimental commissaries. No extra rations were issued.

With one or two exceptions, the quartermaster-sergeants seemed to be interested and alive to the importance of their work, but many of them are unable to get the best results through lack of instruction and co-operation by the company commanders.

It is an injustice to not only the quartermaster-sergeants, but to all the enlisted men, who suffer for their mistakes, to allow the quartermaster-sergeants to trail along from year to year with practically no instructions except what is received at camp, and still expect them to handle the rations in an intelligent and proper manner. They should be as thoroughly drilled in their duties as any other N. C. O. If there was any improvement in the handling of the rations this year over last year it was so slight as to be unnoticeable.

Only one organization, the Second Infantry, conformed to the Field Service Regulations as regards the location of kitchens. This is much the better location, as it enables the company officers to keep in closer touch with the kitchens and a better supervision over the meals served. All organizations should follow this plan in the future.

The following recommendations are respectfully submitted:

I. That by means of correspondence through this office during the coming year, the quartermaster-sergeants receive such instruction and drill as will enable them to perform their duties in handling the rations in an intelligent and business-like manner whenever called upon.

II. If, at the next Camp of Instruction, a field day is provided for, a prize be offered to the quartermaster-sergeant who can pass the best examination regarding his duties in handling subsistence. That all officers and enlisted men interested be notified of this event at the earliest possible moment.

Very respectfully,

WM. H. KERSHNER,

Major, Assistant Commissary-General,
Indiana National Guard.

REPORT No. 7.

HEADQUARTERS INDIANA NATIONAL GUARD,
OFFICE CHIEF OF ENGINEERS,
ROCKVILLE, IND., August 28, 1905.

The Assistant Adjutant-General, Indiana National Guard, Indianapolis, Ind.:

Sir—Pursuant to your G. O. No. 9, 1905, I have the honor to submit the following report relative to this department during the annual Camp of Instruction at Fort Benjamin Harrison, near Lawrence, Indiana, held August 2 to 11, 1905.

The published schedule of exercises was carried out to the letter in

my department and the following shows the time spent in entrenchments, gun-pits, etc.

August 3d, morning, entire Regiment 2d Infantry.

August 3d, afternoon, entire Regiment 3d Infantry.

August 4th, morning, entire Regiment 1st Infantry.

August 5th, morning, Artillery Battalion.

The location of the trenches and gun-pits was the same as last year, viz., about 2,000 feet northwest of Division Headquarters. The work this year was done for an object lesson in construction, and not for any tactical benefit. Instructions were given in making small sections of shelter trenches for the men lying, kneeling and standing, also, instructions in hasty entrenchments under the fire of an imaginary enemy, by use of bayonet only. There were constructed about one-half mile of these latter entrenchments. It was remarkable how complete a cover some of the men would get in a short time. Sergt. M. Rushen, Co. M 2d Infantry constructed a trench, with bayonet only, which completely hid him from view, in a minute and a half, the soil being loose and favorable.

Various forms of revetments were made, each regiment making gabions, hurdles, etc. The gabions were made by the use of nine-hole forms, and the pickets and watling material consisted of small bushes and grape vines, taken from the Spees ravine nearby. Some good gabions were made and all were completed within the time specified in Beach's manual. Instructions were given in laying off angles, drawing parallel lines and in estimating distances.

Obstacles were made and carefully explained, consisting of abatis which was constructed from nearby trees (see photograph, Appendix "Q"), also high wire and low wire entanglements. The interweaving of the wire was explained together with the main objects to be attained, viz., that the entanglements or obstacles should be within effective range of fire; that they must offer no shelter to the enemy; that they must be hard to remove, and should be concealed as far as possible. Other methods of entanglements were explained but were not actually constructed.

On account of our army having not adopted any system of our own, the following gun-pits were constructed:

Battery A, Russian gun-pit for 3.2-in. gun.

Battery B, French gun-pit for 3.2-in. gun.

Battery C, German and Austrian gun-pits for Hotchkiss guns.

(See photographs, Appendices "R," "S," "T," "U" and "V.")

The cannoneers were placed in the two latter gun-pits and General Shaler rode from 400 to 600 yards in front of the guns and whilst there, the pieces were fired a number of times and the men kept themselves so well hidden behind the epaulements that they could not be seen at all while they were loading and firing. After each gun-pit was constructed the gun was put in it to test the height of the epaulements and whether or not the pieces could be seen. All gun-pits as well as entrenchments were covered with weeds, grass, brush, etc., to conceal them.

The interest taken in the engineering work by both officers and men was unusual, even more than that shown at last year's Camp of Instruction. Battery A, under Captain Heiskell and Lieutenant Tyndall worked

until 1.30 p. m. upon Russian gun-pits, and both officers and men showed great anxiety in the completion of this gun-pit without going to mess. On account of the extremely hard soil, picks and mattocks had to be used to loosen the soil for shoveling. In this connection I desire to say that on account of the difficulty in constructing this pit and the little protection it affords for the piece and cannoneers while firing, it is impracticable.

Concerning the practice march and deployment of the entire command, the 8th and 9th instant, I wish to advise that Major Conde's battalion constructed some most effective entrenchments, affording splendid cover. Entrenchments were thrown up by the entire 2d Infantry, with the exception of one company on the extreme right of Col. Smith's firing line. This company had no protection by natural cover and should have constructed entrenchments by all means.

The First Infantry, the North Column, had orders to bivouac near Baker's Bridge and establish outposts and a complete service of security against attack from the north or east that might be possible; the enemy having been reported in superior force advancing from the east, making a retreat necessary. This regiment approached Baker's Bridge from the north and west, and in my opinion should have bivouaced west of the bridge, leaving Fall Creek between it and the enemy, instead of crossing the creek as they did. The positions of the other commands were well taken, especially the locations of the various batteries.

Concerning the laying out of the camp, I think the method used in the 2d Infantry the best one, viz., in locating the kitchens on the line of the company's tents next to the Company Commanders; this gives the latter an easy opportunity to observe the kitchens from their tents, and facilitates in their cleanliness and the keeping of the men out of them and would recommend its adoption.

I would again respectfully recommend that sufficient money be appropriated to fully equip an Engineering Corps and that it be organized in time for the next Camp of Instruction. Should this meet with disapproval I would recommend the expenditure of sufficient money to purchase material for instruction during the annual camp, as with the expenditure of a little money a great deal of benefit can be had in the Engineering Department.

I would again recommend that there be purchased for the Engineering Department, the plane table, Batson sketching case, prismatic compass, aneroid barometer, and sets of drawing instruments.

Very respectfully,

FRANK E. STROUSE,
Major and Chief of Engineers.

REPORT No. 7. APPENDIX "S."

REPORT No. 7. APPENDIX "T."

REPORT No. 7. APPENDIX "U."

REPORT No. 7. APPENDIX "V."

REPORT No. 8.

INDIANAPOLIS, IND., Feb. 16, 1906.

To the Assistant Adjutant-General, Indiana National Guard:

Sir—I have the honor to submit herewith a report of rifle practice for the year 1905. But little practice was had by the organization before the Annual Encampment, Fort Benjamin Harrison, Aug. 2d to 11th. Practice was had on the same ranges, and the arrangement of the targets were the same as in 1904. The troops were assigned to the ranges by regiments in their numerical order. More time was consumed in firing than formerly (numbers considered) because as the soldier becomes more proficient he is inclined to take more pains.

While some of the companies did not show any improvement in comparison with their former records, there was an increase in the figure of merit in all the regiments, and it is a pleasure to call particular attention to the records of Co. B, 1st, and Co. D, of the 2d Infantries, whose figures of merit are extremely gratifying compared with their records in 1904. Attention is invited to the figures accompanying this report. The figure of merit they attained was the result of hard, systematic work on the part of both officers and enlisted men, and was obtained by taking advantage of every opportunity to get on the range.

A large majority of the enlisted men demonstrated that the position and aiming drills had been wholly neglected; and we are inclined to believe that by their neglect they mean to insinuate that such matters are simply fads of the experienced men of the world, printed in the Firing Regulations to worry those who care nothing for the experience of the past. We hope, however, that the results obtained by those who observe the rules and regulations will shame the careless ones into an effort to emulate the example of the up-to-date officers and soldiers.

Owing to the limited time and the arrangement of targets on the different ranges, many men of the different organizations did not get to fire at all, and many did not get a chance to fire beyond the 200 yard range, and the latter was particularly true of the 3d Infantry, which was the last to get on the range, and which, owing to the tour of duty necessarily arranged for the Encampment, were unable to get but one battalion beyond the 200 yard range, which resulted in a great amount of dissatisfaction, the cause being unavoidable.

Taking the Indiana National Guard as a whole, they manifest a very great desire to learn to shoot, and if given proper instructions and the opportunity, we feel sure that Indiana will not remain in the column of those States whose soldiers can not shoot to hit.

In view of the various duties incident to the Annual Encampments, and the change of the physical conditions incident to change from everyday home life, change of water, food, travel to camp, loss of sleep, the strenuous effort required to perform their duties, unfitting the soldier for accurate shooting, it is respectfully suggested that rifle range practice be eliminated from future Encampments, and that the soldier be encouraged to give this matter more attention at his home station.

General Orders, Headquarters I. N. G., May 15, 1905, made provisions

for the selection of a team consisting of twelve principals, three alternates, one spotter, one coach and one team captain, to take part in National Contest at Seagirt, N. J., Aug. 24 to 26, 1905. Conditions were such that the selection could not be made until after the shooting was over at the Encampment. The time was so limited in which to make the selections, and the indifference to the orders in the different regiments so prevalent near the close of the Encampment, that a failure to make selection was barely averted, and had it not been for the special efforts of Capt. J. F. Robinson and Capt. Basil Middleton, 1st Infantry, it is extremely doubtful if the selections would have been made, but their efforts stimulated others, and as a result about forty officers and enlisted men reported on the rifle range, Fort Benj. Harrison, out of which the team was finally selected. Only about one week remained for practice before going to Seagirt. A portion of this time it was so damp that practice was impossible.

With but one exception none of these officers and enlisted men had ever seen a skirmish run, and some of them had never fired at so great a range as six hundred yards, which was the longest that could be had at Fort Harrison, although the team was expected to and did fire on the one thousand yard range at Seagirt. Altogether the conditions were such that the team was wholly unprepared to enter a contest in which some of the best marksmen in the world were engaged.

Each regiment was represented on the team, and the experience they brought home with them we think is well worth all it cost in a financial way, but the honors they did not win on the field (for which blame should not in any way attach to the team) was rather burdensome to have. There were thirty-seven teams in this contest, and the Indiana Team carried off the honors with thirty-sixth place.

No doubt this annual contest will be a fixed feature, and it is respectfully suggested that the Indiana team be selected at an early date, and a suitable 1,000 yard range be procured, and such facilities furnished as will permit of early and proper instruction before going into another contest against such odds. Unless the long range is used, it is useless to attempt to make a showing at these matches, as they are won or lost on the one thousand yard range and in skirmish fire.

Very respectfully,

D. I. McCORMICK,
Major I. N. G., Retired,
Acting Chief Range Officer.

REPORT No 8. APPENDIX "V-1."

REPORT No. 8. APPENDIX "V—2."

REPORT No. 9.

INDIANAPOLIS, August 30, 1905.

To the Assistant Adjutant-General, Indiana National Guard:

Sir—Pursuant to General Orders No. 9, c. s., I have the honor to report regarding tour of duty at the annual Camp of Instruction held at Fort Benjamin Harrison, August 2d to 11th, inclusive.

Prior to the date for reporting at camp I was, by verbal instructions of the Adjutant-General of the State of Indiana, placed in charge of transporting the troops from their home station to the camp and the return. They moved from home station as follows:

FIRST INFANTRY.

- Band—I. & V. R. R. to Indianapolis; Big Four to Army Post.
- Co. A—I. & V. R. R. to Indianapolis; Big Four to Army Post.
- Co. B—Big Four R. R. to Indianapolis and to Army Post.
- Co. C—Pennsylvania R. R. to Indianapolis; Big Four to Army Post.
- Co. D—I. & V. R. R. to Indianapolis; Big Four to Army Post.
- Co. E—S. & T. H. & Vandalia R. R. to Indianapolis; Big Four to Army Post.
- Co. F—Pennsylvania R. R. to Indianapolis; Big Four to Army Post.
- Co. G—Big Four to Army Post.
- Co. H—Monon and I. & V. R. R. to Indianapolis; Big Four to Army Post.
- Co. I—Monon to Indianapolis; Big Four to Army Post.
- Co. K—I. & M. Traction Company to Indianapolis; I. U. Traction Company to Army Post.
- Co. L—C. H. & D. R. R. to Indianapolis; Big Four to Army Post.
- Co. M—L. E. & W. R. R. to Muncie; Big Four to Army Post.

SECOND INFANTRY.

- Band—L. S. & M. S. R. R. to Fort Wayne; L. E. & W. and Big Four to Army Post.
- Co. A—I. U. Traction Company to Army Post.
- Co. B—Big Four R. R. to Indianapolis and to Army Post.
- Co. C—I. U. Traction Company to Army Post.
- Co. D—I. U. Traction Company to Army Post.
- Co. E—I. C. & S. Traction Company to Indianapolis; I. U. Traction Company to Army Post.
- Co. F—Big Four R. R. to Army Post.
- Co. G—L. E. & W. R. R. to Muncie; Big Four to Army Post.
- Co. H—I. U. Traction Company to Army Post.
- Co. I—I. U. Traction Company to Indianapolis and Army Post.
- Co. K—I. U. Traction Company to Indianapolis and Army Post.
- Co. L—I. & N. W. Traction Company to Indianapolis; I. U. Traction Company to Army Post.
- Co. M—I. & E. Traction Company to Indianapolis; I. U. Traction Company to Army Post.

THIRD INFANTRY.

Band—I. U. Traction Company to Indianapolis and to Army Post.

Co. A—Big Four R. R. to Army Post.

Co. B—L. S. & M. S. to Fort Wayne; L. E. & W. and Big Four to Army Post.

Co. C—Lagrange, C. R. & I. R. R. to Richmond; Pennsylvania R. R. to Indianapolis and Big Four to Army Post.

Co. D—L. E. & W. R. R. and Big Four to Army Post.

Co. E—Big Four R. R. to Army Post.

Co. F—Pennsylvania R. R. to Colfax; Big Four to Indianapolis and to Army Post.

Co. G—Pennsylvania R. R. to Warsaw, and Big Four to Army Post.

Co. H—Big Four R. R. to Army Post.

Co. I—L. E. & W. R. R. to Indianapolis, and Big Four to Army Post.

Co. K—L. S. & M. S. to Fort Wayne; L. E. & W. and Big Four to Army Post.

Co. L—Monon R. R. to Indianapolis, and Big Four to Army Post.

Co. M—Monon R. R. to Indianapolis, and Big Four to Army Post.

ARTILLERY BATTALION.

Battery A—Overland.

Battery B—L. E. & W. R. R. to Muncie; Big Four to Army Post.

Battery C—I. & N. W. Traction Company to Indianapolis; I. U. Traction Company to Army Post.

SIGNAL CORPS.

Indiana Union Traction Company to Army Post.

HOSPITAL CORPS.

Indiana Union Traction Company to Army Post.

The companies, band and battery moving to Muncie via L. E. & W. R. R. and thence to Army Post via Big Four were on special train, as were also the companies traveling via the Michigan Division of the Big Four.

The manner in which the several companies were handled by the different transportation lines was a matter giving considerable pleasure to the officer in charge of transportation, as with the exception of two companies all came into the city of Indianapolis and proceeded directly to camp on schedule time; these two companies were delayed by wrecks on the railroad and therefore no criticism was to be offered. The only instance of delay in transporting to the camp was in the case of the Indianapolis battalion, who were scheduled to leave at two o'clock on August 1st, but owing to error at the general office of the Union Traction Company arrangements had not been made for cars. The local officers of this company, however, immediately arranged for extra cars and the troops moved with a delay of about one hour.

Troops were returned to their home station almost entirely by same routes over which they were transported to the camp, the only notable exceptions being the Lagrange company, that proceeded to Fort Wayne on the special train to that point, and thence via the G. R. & I., and the South Bend company, that moved from camp to Frankfort via the I. & N. W.

Traction Company, thence via the Pennsylvania Lines. This arrangement enabled these two companies to reach their destinations prior to mid-night of the 11th inst.

Inasmuch as conveniences for loading at Fort Benjamin Harrison were not the best, and there being but one siding each for the traction line and the Big Four Railroad, and there being a number of the companies moving at the same time, there was necessarily some delay in starting. The Traction Company, however, did excellent work with the exception of moving two companies. This, I believe, after investigating, to have been caused by a change in the hour at which the Indianapolis battalion was to leave the camp, and as the change was not made until the morning of departure, the transporting company did not have opportunity to supply the necessary cars, and the local battalion, with the zeal of an old Quartermaster-Sergeant, appropriated the first cars available, thereby leaving two companies that should have left at two o'clock p. m., waiting at the Post until six o'clock. The railroad company moved their first two trains from the camp as arranged. The third and fourth trains were, however, considerably delayed, this being caused by the Indianapolis Union Railway Company prohibiting the trains from entering the depot as soon as they arrived, the depot at the time being filled with regular trains and several excursions leaving on that date. This occasioned a delay in several companies reaching their home station.

In connection with the transportation the writer desires to bring to the attention of the Commanding General the fact that General Orders No. 8, c. s., Assistant Adjutant-General's office, Paragraph 7, was not fully complied with. This, however, is hardly a matter to embrace in this report, as the subject was clearly dealt with during the tour of duty. I would respectfully recommend that orders covering the size of chests to be taken to camp embrace a limit of weight which the article is not to exceed, as even a medium sized chest is sometimes filled with excessively heavy material, necessitating seven or eight men to handle it, and where the loading facilities are as meagre as those that we have considerable delay is occasioned by handling heavy baggage.

The discipline of the troops was, in the main, good. Some few cases, of course, are open to criticism, but such are usually excusable owing to the inexperienced and short length of service of the individual committing the breach. The general appearance of the troops, in the opinion of the writer, could be much improved by a thorough washing of the khaki uniform prior to the coming to camp.

A number of instances were noted where the new drill regulations had not been familiarized by the officers although the order promulgating the same and prohibiting the use of the old regulation has been in force more than eight months.

From communications and reports received at the Division Headquarters it is evident that the manner in which books are kept at the home station is not always of the best, and in many instances probably very poor. It may also be said that in the majority of cases officers are not well schooled in correspondence, this showing that a school of officers for the purpose of such instruction should be held two or three times during the interim between camps of instruction, and would result in much good.

The camp was situate on practically the same ground as was occupied the year before, and nothing could be desired to better the location. The water supply this year was much better than a year before, there being ample for all purposes and of a very good quality. The only objection heard at any time regarding the water was a taste of oil, which resulted no doubt from the pipes that were used.

During the maneuver the following points were noticed as open to criticism:

Advance and rear guards were not thoroughly formed by any one of the columns moving from camp, and had there been an enemy well schooled in guerrilla warfare to attack either the advance or rear of the columns it is the opinion of the writer that much damage could have been wrought before the column could have been deployed, there being insufficient distance between the guards which would have resulted in an attack upon the main column without the enemy being properly checked, as is the purpose of an advance and rear guard, the flankers for the advance guard not being far enough off the main highway to prevent the ambush lying in wait until the main column was fully abreast. It was also noticed that the point of each advance guard marched boldly down the road without taking advantage of any cover at turns or dangerous places for an attack. Communication with the advance and rear guard was not properly arranged, and in fact was of little necessity, owing to the short distance the advance and rear guard was from the main column.

During the night the outposts were, in the main, well located, although in several instances were not so placed as to command a thorough view of the territory in their immediate front. Communication with these outposts was not properly arranged for reports being received by the pickets from the non-commissioned officer in charge, as is usual in actual warfare. The commanding officers I believe zealously visited their outposts a number of times during the night, but this would hardly be sufficient in the case of actual service, as it becomes necessary for the outposts to communicate with the commanding officer or his immediate subordinates, doing this of course through the company commander or detachment commander under whose direction they are serving.

The maneuver in general resulted better than is generally supposed among the officers and enlisted men of the Guard, although an actual conflict was at no time brought on, yet this, in the opinion of the writer, was one of the greatest points achieved, and clearly demonstrated the control of the troops engaged, and shows thorough fire discipline.

The regular army officers serving with the National Guard are perforce supplied with mounts from among the contract animals, and sorry spectacles indeed are the "critters" which are placed at their disposal. It would be a credit to the Indiana National Guard, and much appreciated compliment to these officers, who frequently, as was the case at this Encampment, are at their homes on leave and offer their services for the benefit of the State troops, if at least respectable saddle horses could be provided for their use. It is well known that saddle horses are hard to obtain, and that the usual contract price will not procure them, but in these few cases the question arises if it would not be advisable to raise the price.

The civilian mess was a cause of much discontent among the civilian

employes, and the detachments remaining after the camp was struck, on account of the service and the food which they received, and it is suggested that this mess might be much better handled, probably more economically handled, by the Chief Subsistence Officer of the Division, he establishing the mess directly under his supervision, employing cooks and waiters and furnishing the rations for use in this mess hall, doing away altogether with the so-called sutler.

The field day exercises did not come under the observation of the writer owing to the duties of arranging with the transportation companies for the return of the troops to their home station, but from the many comments heard among officers and enlisted men the opinion is gained that the exercises are very much to the benefit of the entire Guard, and ought to be made a permanent feature of each Encampment. They arouse enthusiasm among both officers and enlisted men, as well as friendly rivalry which will result in assisting the company commanders to obtain recruits, and to hold them once obtained, and will also spur the enlisted men on to more strenuous efforts toward perfection in his duties in almost every particular.

Very respectfully,

Your obedient servant,

GUY A. BOYLE.

Captain and A. D. C.

REPORT No. 10.

INDIANAPOLIS, IND., August 23, 1905.

To the Assistant Adjutant-General, Indianapolis, Indiana:

Sir—I have the honor to make my report as Provost Marshall at the Camp of Instruction at Fort Benjamin Harrison for the term of August 3, to August 11, both dates inclusive.

On the evening of August 2, a report came to Division Headquarters that the troops were congregating in large numbers at Days Crossing. By command of the Commanding General, Major-General W. J. McKee, the reliefs not on post of the different regiments and artillery battalion, including the headquarters guard—the whole detachment under command of Captain G. A. Boyle, were sent down to Days Crossing and a number of men were placed under arrest and turned over to their own guards. At 11.30 o'clock the same night the headquarters guard, under Lieutenant Reno, of the 2d Infantry and myself returned to Days Crossing and remained until the last car arrived from the city. I had the car surrounded and placed forty six enlisted men under arrest. Owing to the limited number of men I had with me quite a few succeeded in making their escape. We then returned to camp and placed those we had in charge in the Guard House. Through instructions issued by the Commanding General, the regimental and artillery guards were ordered to report at Division Headquarters to receive the prisoners of their respective regiments and artillery battalion.

The commanders of the different guards were instructed to report the names of the men and the companies to which they belonged. This was done the next morning after some delay and repeated calls by phone. This

same routine of patrol duty was continued throughout term on duty, assisted by the guard of the 2d Regiment. They were instructed to guard the Spring Valley Road; to intercept any and all soldiers who might leave the cars at that point.

The lack of knowledge of guard duty was very perceptible, and in some cases the men had no instructions whatever. Their willingness to learn and the desire to do right was very commendable in them.

The officers detailed from day to day worked very hard to organize their different guards and to put them in working order, and, with one or two exceptions, they succeeded very well. The one serious fault found in some of our younger officers was that they are afraid to assume the responsibility connected with their rank; take them away from their companies and they go all to pieces.

Most respectfully submitted,

W. A. KREBER,
Capt. and A. D. C., I. N. G.

REPORT No. 11.

SIGNAL CORPS, I. N. G.,
WARSAW, IND., August 25, 1905.

To the Assistant Adjutant-General, Indianapolis, Ind.:

Sir—I have the honor to submit the following report, in compliance with General Orders No. 9, 1905, A. A. G. O., Par. III.

I left home station with the Warsaw detachment of the Signal Corps at 6.32 a. m. Arrived at Fort Benjamin Harrison 10.30 a. m.

As per Special Orders No. 103, 1905, A. A. G. O., Lieut. Wallace Sherwood proceeded to the reservation, with a detail of five enlisted men, arriving at 6.30 a. m., and at once commenced the work of establishing a telephone system, connecting the several headquarters and the city, with Division Headquarters. This work was completed at 9.30 a. m., August the 3d.

The strength of my command was: Officers, 2; men, 25.

Hours of services were prescribed subject to the general schedule of exercises.

In compliance with Field Order No. 1, 1905, Headquarters, I. N. G., a detachment of the Signal Corps was assigned to each column, and Division Headquarters. The assignments were as follows:

Myself and ten enlisted men, with Division Headquarters.

Sergeant Brainard Aikins, with the 1st Infantry.

Lieut. Wallace Sherwood, with the 2d Infantry.

Sergeant Garnet Aikins, with the 3d Infantry.

Division Headquarters had lines of communication with each column. Telegraph was used to the 1st and 3d Infantry, and telephone to the 2d Infantry. Flag stations were also established from the 3d Infantry to the 2d Infantry. Detachments reported that much interest was taken by the men of the Corps on this march.

I would recommend for the betterment of the service the adoption of

the buzzer system. The buzzers can be used as telegraph and telephone, just as desired, and the lines for the buzzers can be constructed in much less time than the lines for the field telephone or telegraph, I would therefore earnestly recommend that the buzzers be purchased especially for the field work of the Signal Corps.

Very respectfully,

JOHN N. LEHEW,
First Lieut. Comdg.

REPORT No. 12.

HEADQUARTERS SECOND INFANTRY,
INDIANA NATIONAL GUARD,
INDIANAPOLIS, IND., Dec. 30, 1905.

The Assistant Adjutant-General, Indiana National Guard, City:

Sir—Pursuant to instructions contained in General Orders No. 5, 1905, A. G. O., and also pursuant to instructions in General Orders No. 8 and No. 9, 1905, Headquarters Indiana National Guard, would respectfully report that these headquarters and the various companies of this command proceeded to Fort Benjamin Harrison, August 2d, 1905.

The location of this camp of this regiment was in the open field just south of the Spring Valley Road at about two hundred yards west of general headquarters. The first day was taken up by the establishment of camp and of the various companies to their positions, with the exception of the 1st Battalion, which had preceded the balance of the command and it arrived in the camp on the afternoon of August 1st.

The strength of the command was as follows:

Commissioned officers	45
Enlisted men	503
Total	548

The provisions of General Orders No. 9, Section 1, were carried out, and the time between Reveille at 5.30 a. m., and the Call to Quarters at 9.45 p. m., was utilized by dividing the same into hours of service for squad, company, battalion and regimental drills. Guard-mount, commissioned and non-commissioned officers' schools, and parades were fixed at such hours as would least conflict with drill hours. Major H. T. Conde of the 1st Battalion was designated as the officer to have charge of the guards and of guard-mount and to take general supervision of the same. Assistant Surgeon John M. Wallace was designated as the Regimental Sanitary Officer.

The drills, exercises, marches, etc., as arranged for by Division Headquarters were carried out and the program as outlined was followed.

I herewith attach detailed reports of Doctor Homer I. Jones,* Major Surgeon, and also of the three Battalion Commanders.**

* This report appears as Appendix "P" to Report No. 4 of the Assistant Surgeon General.

** Extracts from these are made a part of Part II of this report.

It is the opinion of these headquarters that this camp was one of the best which has been held by the Indiana National Guard.

The quartermaster supplies and those of the commissary department were issued promptly and in sufficient quantities to meet all requirements. The food was first-class in every respect and the new method of establishing the kitchen quarters on the right of the line of tents where they would be under the direct supervision of the commanding officers of the different companies, is to be commended, as it did away absolutely with men loafing around the cooking quarters. The supply of water was good and of sufficient quantity.

The assignment of hospital stewards and their work with the regiment was all that could be desired, and the same may be said of the wagons furnished by the Quartermaster's Department.

The work on the target ranges was better than ever before and better scores were made than formerly. The establishment of a State rifle team will lend encouragement in this particular branch of service.

In conclusion, I desire to return my sincere thanks to the United States army officers who were present during the entire week as Inspectors, and also to the members of the Division Staff for the many courtesies extended during the camp. Also to the field and line officers of the regiment and to the members of my staff for assistance given during this tour of duty.

Very respectfully,

H. B. SMITH,
Col. 2d Infantry, I. N. G.

REPORT No. 13.

HEADQUARTERS FIRST INFANTRY,
INDIANA NATIONAL GUARD,
VINCENNES, IND., August 28, 1905.

The Assistant Adjutant-General, Indiana National Guard, Indianapolis, Ind.:

Sir—I have the honor to submit herewith report of the operations of this command at the Camp of Instruction of August, 1905.

The command arrived at camp at Fort Benjamin Harrison, August 2d, with a total strength of 42 officers and 458 enlisted men.

Captain E. F. Branch was detailed as Acting Adjutant, Capt. Jas. N. McCoy as Acting Quartermaster, and First Lieut. Wm. H. Hoff as Acting Commissary. Each of these officers performed his various duties in a very satisfactory manner and much of the credit for the good showing made by the regiment is due to the very able assistance rendered by them. Lieut.-Col. Loudon was detailed as Summary Court Officer, and Capt. Wm. R. Davidson as Sanitary Officer. Color-Sergeant William R. Kennedy, who has been in the army continuously since 1898 was detailed for active work with the interior guard. Much good work was done by this young man, and it is believed that some progress in the line of guard duty was made. Sergeant Kennedy held school for the non-commissioned officers twice daily, and was almost all the time actively at work either with the guard or the non-commissioned officers. It seems that we make less progress in the matter of guard duty than in any other line of work, but it is apparent

that this duty can never be wholly satisfactorily performed until the companies take the matter up at their home stations, there giving it the serious attention that it deserves. During the ten days very few of the men are on guard more than one tour and during this twenty-four hours it is clearly impossible to teach the average enlisted man how to perform his duties satisfactorily. Many of the men, apparently of average intelligence, may have a matter thoroughly explained to them and seemingly comprehend everything that you tell them, yet if a strange officer approaches they will become rattled and unable to tell anything. This can only be corrected by hard and conscientious work, and can not be accomplished in the limited time which can be devoted to this while in camp.

The Officers of the command on the whole performed their various duties in a creditable manner. All of them had been in camp before, and all but seven had served as officers in previous camps. If the time ever comes when we can go into camp with the same officers who had served in like capacities during previous camps, we may expect a very considerable improvement in all particulars.

Very great improvement was apparent this year in sanitary matters, however, in the future at least one sink for each battalion should be provided, in case it is deemed impracticable to make one for each company, and zinc urinal troughs should by all means be placed in each one. The great improvement in this direction is attributed to the hard and conscientious work of Captain Davidson, who has been making a thorough study of these matters for the last two years. At my suggestion Dr. Davidson read a paper to the officers and non-commissioned officers on camp sanitation. This paper was a very excellent one and it is believed that all were greatly benefited by the same.

The idea of grading the different companies on their daily sanitary inspections is deemed a very excellent one indeed. These daily inspections have been consolidated and published to the command since camp and it is believed that much better work may be expected along this line from the very start of the next encampment. The consolidated standing of the different companies is shown as follows:

CONSOLIDATED SANITARY RATINGS.

	<i>Rations.</i>	<i>Kitchen.</i>	<i>Quarters.</i>	<i>Policing.</i>	<i>Gen. Av.</i>
Band	8.1	8.3	8.1	8.1	8.2
Co. A.....	8.16	8.8	8.4	8.7	8.6
Co. B.....	9.0	9.0	9.0	9.0	9.0
Co. C.....	9.6	8.4	7.2	7.1	8.2
Co. D.....	10.	9.8	9.8	9.8	9.8
Co. E.....	8.5	8.7	7.7	7.7	8.2
Co. F.....	6.8	8.3	7.8	7.6	7.6
Co. G.....	9.0	9.5	8.6	8.6	8.9
Co. H.....	8.4	8.7	8.5	8.6	8.6
Co. I.....	8.3	8.3	8.6	8.8	8.2
Co. K.....	8.4	8.4	8.7	9.0	8.6
Co. L.....	7.6	8.6	7.9	7.8	7.9
Co. M.....	8.2	8.8	8.6	7.4	8.7

The discipline of the command was good and it is believed that we have made some progress along this line. On arrival in camp it was not generally understood that the men were not allowed off the Reservation, as a result some 25 or 30 of the men strayed away the first night in camp and on return were arrested by the Provost Guard. Had this matter been thoroughly understood at the outset it is believed that the work of the Summary Court this year would have been very light indeed.

The health of the command during the tour was very good, not a single case being in the hospital. This is attributed to the carefully arranged program of exercises, the excellent weather, and the good water. Some oil was found in the latter, said to have come from the old pipes in use, but not enough to hurt anybody. This doubtless was a benefit as the bad taste tended to prevent the men drinking excessively.

The rations furnished were on the whole, good, the only complaint being of some bad potatoes, but were attended to by the Commissary Department when attention was called to the matter and the deficiency promptly supplied.

The idea of an annual field day is considered a very excellent one. The program for the next event should be published as far in advance as possible so that the different companies can talk the matter over at their home stations and be prepared to make their entries promptly on arrival in camp.

Taken as a whole the tour was a success, and more general interest is being manifested by the members of the guard than ever before.

Very respectfully,

GEORGE W. McCOY,
Colonel.

REPORT No. 14.

HEADQUARTERS THIRD INFANTRY,
INDIANA NATIONAL GUARD,
GREENFIELD, IND., October 31, 1905.

The Assistant Adjutant-General, Indiana National Guard, Indianapolis, Ind.:

Sir—I have the honor to report that on Wednesday, Aug. 2d, 1905, in pursuance of G. O. No. 5, 1905, A. G. O., I arrived at Fort Benjamin Harrison at eleven o'clock a. m. and assumed command of the 3d Infantry, I. N. G. Capt. W. O. Bragg had preceded me and was present upon the arrival of the several companies composing the regiment and assigned them to their respective positions in camp.

The Acting Regimental Quartermaster and the Regimental Quartermaster-Sergeant with a fatigued detail of eight enlisted men, and the battalion quartermasters and the battalion quartermaster-sergeants and the Regimental Commissary Officer and the Regimental Commissary-Sergeant with a fatigued detail of two enlisted men and one cook, preceded the command and arrived at camp at the time specified in S. O. No. 99, 1905, A. A. G. O., and S. O. No. 10, 1905, these headquarters.

The total strength of the command present was forty-seven officers and four hundred and sixty enlisted men.

As Commanding Officer of said command, I immediately issued G. O. No. 1, prescribing hours of service, a copy of which was at the time forwarded to Division Headquarters, and the regular routine of camp duties was observed and carried out each day as prescribed in G. O. No. 1, and in accordance with the Schedule of Exercises, Camp of Instruction, 1905, Indiana National Guard, issued from Division Headquarters.

The men entered into the work assigned them with enthusiasm and military spirit. A large per cent. of the regiment were recruits; never having been in camp. The officers took up the work of instruction and maintained good discipline throughout the tour of duty.

The sanitary condition was much better than the camp of 1904, and the arrangements of the sinks were vastly superior to any preceding year. The first day in camp some objections were made to the water, but this was soon overcome and no evil effects were noticed during the remainder of the encampment.

The supply of food as furnished by the Commissary Department was adequate and of excellent quality. A thorough inspection was made daily of the mess quarters, particular attention being paid to the company mess chests and kitchen. It was observed that the company cooks had a better conception of their duties than heretofore.

In the absence of the regular Regimental Quartermaster the Chaplain, W. G. Everson, assumed the duties of that office and executed them in a creditable manner.

The health of the command was noticeably good, as shown by the surgeon's daily report.

The results of this tour of duty were of a superior nature as evinced by the intense interest shown by officers and men in every exercise or assignment; particularly was this true at target practice.

The presence in Camp and the interest shown by His Excellency, the Governor, instilled much enthusiasm among the members of the guard.

The work of the officers was most commendable and all cheerfully responded to the several duties.

Respectfully,

EDWIN P. THAYER,
Col. Third Infantry, I. N. G.

REPORT No. 15.

HEADQUARTERS ARTILLERY BATTALION,
ROCKVILLE, IND., August 22, 1905.

The Assistant Adjutant-General, Indiana National Guard, Indianapolis, Ind.:

Sir—I have the honor to submit the following report on tour at Camp of Instruction, Fort Benjamin Harrison, August 2 to August 11, inclusive.

The Artillery Battalion which was reported at Division Headquarters at 5.30 p. m., August 2d, arrived as follows:

Battery "A," 4.20 p. m.; 2 officers, 43 enlisted men; marched.

Battery "B," 4.07 p. m.; 3 officers, 27 enlisted men; train.

Battery "C," 11.50 a. m.; 3 officers, 30 enlisted men; trolley.

Field and Staff, 5 officers, 2 enlisted men; train.

Four 3.2 field pieces and three 1.65 Hotchkiss guns.

The contract horses were at once carefully looked over and found to be, for the most part, an exceptionally good lot. At an inspection of these horses at the end of the tour although there were some saddle and collar galls, the horses were in better condition than at the beginning of the camp; they had been thoroughly groomed, regularly fed and quietly worked during the nine days and came out of it, with few exceptions, in excellent condition.

In regard to the severe criticisms received through the Veterinarian for the damaged condition of the horses turned over at the preceding camp, I wish to say that for this loss the Veterinarian was in no way to blame as his efforts were tireless. He was with these horses day and night and they received the very best medical aid possible when it was needed. It is impossible for green, soft horses to stand this work and not show some galls, but as without doubt these horses are hired for the purpose of use in conducting our drills, we work them, but they receive the best possible care. In the same connection let me call attention to the fact that all horses for which damages were paid were not used by the artillery, we do not claim to have turned our horses back without damages, for we will always have some, until our camp extends over a period of four to six weeks which would give time enough to harden the horses to artillery work. To expect us to do away entirely with sore backs and shoulders at a ten-days' camp with soft horses, is asking the impossible.

The water arrangement at this camp was excellent and the quality of the water was good, but it was almost ruined by conducting it through old gas or oil pipes. After the first day, however, the horses drank it all right. The men had to depend on neighboring wells for drinking water.

We had no trouble to keep abreast of the schedule and I am of the opinion that the men were not overworked although the time was entirely consumed. The schedule contained much interesting work and all officers and men seemed to try to come up to the standard of excellence expected of them.

The general health of the battalion was excellent, only four cases being sent to the general hospital. The principal complaints were gastro-intestinal disturbances, due probably to too frequent and indiscriminate indulgences at the lunch stands, and the change in the mode of living.

The Hotchkiss battery should be provided with horses for the next camp, as it has a tendency to make the men's tongues hang out to keep pace with the mounted part of the battalion.

The improvement in the standing gun drill with this battery was very marked and well shows what steady work will do for an organization. Battery "B" also shows marked improvement in the attention paid to detail and discipline.

Battery "A" is well up to their usual high rate of excellence and is to be congratulated upon the larger number in camp over last year and the improved personnel.

The field exercises in which the battalion took part was a most enjoyable piece of work. It seemed to me that all officers with whom I came in contact, from each branch of the service, were making all effort to get the best results. I found lookouts on straw stacks, up trees, lying on high points and scouting parties everywhere. Every man was alert and anxious to do his best and gain an advantage over the supposed enemy; I did not

see either officers or men exposing themselves needlessly and they in fact took all the precaution which would have been necessary in case of actual warfare. My former report on this maneuver, I believe, covers the positions of our guns and their action during this engagement.

I would consider that field day was a success and am heartily in favor of its continuance on our schedule at future camps, that medals for superiority be furnished by the State to contestants and suggest that the program contain other events besides those of a military turn, such as are usually handled on the athletic fields.

FOR RECOMMENDATIONS.

First of all I would earnestly suggest that eating stands run by civilians be barred from the grounds, as in every instance of illness in our quarters could be traced to these stands.

That the date set for the Camp of Instruction be published at least six weeks before the event, in order that we may make arrangement for our vacations to come at that time.

That the Hotchkiss battery be furnished with the pack equipment and horses or mules for the time of the next camp.

As we are undoubtedly neglecting the most important part of artillery service, I would suggest that a range be obtained on which we can use both the Hotchkiss pieces and the 3.2 guns, such a site can be made on the Post grounds with the labor of a half dozen men for a week or two.

That the water mains be laid with new galvanized pipes. I believe that each headquarters and battery should be provided with baths, an extra tent being provided for this purpose containing a shower which could be operated under sanitary conditions by placing under the supervision of an officer. These baths would undoubtedly add to the physical comfort of the men and indirectly to their general health.

The partitions in the stalls of the stables should be tight up to a height sufficient to keep a rolling horse from getting his leg through, lessening the liabilities to damage.

That the batteries be furnished with at least four extra horses each, which will allow us to lay off a horse out of condition, which otherwise we would work to his disadvantage.

That a pair of field glasses be furnished every officer.

In summing up, it seems to me that this was a most profitable camp. The men showed an interest and much energy in their work which to me was surprising. Their idea seemed to be to do the work in the best possible manner.

It occurs to me that the field maneuvers deserve very special mention, as without doubt it was the most satisfactory exercise of the kind we have had at our State camps, and I for one appreciate the value of this exercise as a training for real campaign duties. It would have been a great satisfaction to me to be able to see the location of the opposing troops at the wind up. When next we have a similar exercise, I hope the field will be given an opportunity of viewing the disposition of troops just before "recall."

Very respectfully,

F. E. STEVENSON,
Major Artillery Battalion.

PART II.
PRACTICE MARCH AND MANEUVERS.

REPORT No. 16.

HEADQUARTERS INDIANA NATIONAL GUARD.

INDIANAPOLIS, IND., Dec. 1, 1905.

To the Adjutant-General, State of Indiana:

Sir—I have the honor to present as Part II of the report on the Camp of Instruction, 1905, detail of the practice marches and maneuvers held August 8 and 9, and comment thereon.

It was the intention of these headquarters to give the sub-commands sudden orders with little preparatory time allowance or warning, so as to test the promptness of availability of these forces, and observe whether the precautionary dispositions would be properly met. The field orders were very simple and left responsibility for the service of security and information on the column commanders performing the retreat.

The test also was to ascertain the possibility of inter-communication between three columns moving on roads in the same direction on a retreat with a pursuing enemy, and converging on a position of defensive advantage. For this purpose a detachment of the Signal Corps was attached to each marching column.

Finally it behooves me to say that this tactical maneuver should not be looked upon as a display of what had already been learned, but more as a lesson to be solved to ascertain difficulties and short-comings, as well as to achieve experience in unexpected emergencies.

As much as the work was left to the Regimental Commanders, so the criticism and comment was left without constraint to the umpires, officers of the regular establishment, who conscientiously found and reported every fault they could discover.

The good results of this field exercise will depend upon the recognition by our service of the mistakes made and the need of avoiding them in the future. The harshness of the criticism should not be thought of in the light of any offense, but an honest analysis of our faults made by request. It should be an incentive to energetic, educational work up and down the line. At the same time it will prove the necessity of special training in companies at their home stations, and the absolute need that the Regimental Commanders should insist on special attention being given in their command to the teaching of Guard Duty, Outpost Duty and the Services of Security and Information, before coming to camp.

There are added hereto as appendices to this report, the preliminary and field orders which moved the subdivisions of this command on this maneuver. (Appendix "a," "b," "c," "d," "e," "f," "g.") A few photographs are added hereto to give an incidental suggestion of the character of the troops. (Appendix "h," "i," "j," "k" and "l.")

There is also included the comment on the exercise by First Lieut. Tarlton, U. S. A., Chief Umpire (Report No. 17), and Lieut. C. Lininger, U. S. A., Umpire (Appendix "m").

The report of Major Edgar F. Sommer, Commanding the Hospital Corps on this occasion, is considered worthy of being appended (Report No. 18).

This also applies to extracts from the reports of Major H. T. Conde,

2d Infantry, Major John H. Tarlton, 2d Infantry, and Major A. L. Kuhlman, 3d Infantry, which at least show a professional interest in the participation of their troops and form a rather marked contrast in comparison with some of the negligence shown by other sub-commands in their reports on these exercises. (Reports 19, 20 and 21.)

It will be the aim of these headquarters to enforce hereafter better preliminary preparation for field maneuvers and more prompt and complete reports on the technical results of these exercises.

Very respectfully,

WILL J. McKEE,
Major-General,
Comdg. Indiana National Guard.

REPORT No. 16. APPENDIX "a."

HEADQUARTERS INDIANA NATIONAL GUARD,
CAMP OF INSTRUCTION, FORT BENJ. HARRISON,
NEAR INDIANAPOLIS, August 8, 1905.

No. 6350.

MEMO. ORDERS,
1905.

With reference to the practice march and maneuver scheduled for to-day and tomorrow the following general instructions are prescribed and will be observed with utmost care:

A careful inspection for ball cartridges will be made in every company immediately before leaving camp, a report of the result being made to the respective Regimental Headquarters and forwarded to these Headquarters.

All men in each organization will be taken in this exercise, except the necessary camp guards. All men on the ranges will be ordered to report back to their regiments not later than 12 o'clock noon.

The troops participating in the exercise will wear Khaki "service" uniform.

While on the march in formation as if in an enemy's country, care will be taken not to invade private property, the flankers being drawn in so as to occupy only the public roads of the Military Reservation. Trespass on private grounds for any reason whatsoever is positively forbidden.

While engaged in the exercises in the Reservation itself, cultivated fields will be avoided and every precaution taken not to cause damage in any form.

Medical officers of the respective commands, through regimental commanders will prevent men from using water from contaminated wells and streams.

These orders will be republished in every command so that all officers will be thoroughly familiar with them before leaving on the march.

By command of Major-General McKee.

ALFRED B. SCHANZ,
Lieut.-Col. and Insp.-General.
A. A. A. G.

REPORT No. 16. APPENDIX "b."

HEADQUARTERS INDIANA NATIONAL GUARD,
CAMP OF INSTRUCTION, FORT BENJ. HARRISON,
NEAR INDIANAPOLIS, Aug. 8, 1905, 12.00 Noon.

FIELD ORDERS,

No. 1.

Distribution of Troops—

1. North Column, Col. Geo. W. McCoy, Commanding:
1st Infantry.
Detachment Signal Corps.
2. Center Column, Col. Edward P. Thayer, Commanding:
3d Infantry.
Detachment Signal Corps.
3. South Column, Col. Harry B. Smith, Commanding:
2d Infantry.
Detachment Signal Corps.

I. The enemy has been reported in superior force advancing from the East, making a retreat necessary.

II. The North Column will move at 2.00 p. m. via 13-12, Newkirk Bridge-10-9-8-7-6-5 and bivouac near Baker's Bridge, establishing outposts and a complete service of security against possible attack from the North or East.

III. The Center Column will move at 2.00 p. m. via 13-17-18 and the road 18-21 to 18 A and bivouac east of and near 18 A, establishing outposts and a complete service of security against possible attack from the Northeast, East and Southeast.

IV. The South Column will move at 2.00 p. m. via 15-19-20-20 A-20 B to old Lawrence Fair Grounds and bivouac, establishing outposts and a complete service of security against possible attack from the East and Northeast.

V. The Signal Corps will be divided into four detachments to report to the commanders of the three columns, and Division Headquarters. Commanding officers of the marching columns will maintain inter-communications.

VI. The commanding officers of the bivouac will establish connection with the commands of their flank, viz.: The North Column's right with the Center Column's left, and the Center Column's right with the South Column's left, facing East.

VII. The Divisional Artillery will move at 1.45 p. m. via the same route as South Column; park at old Lawrence Fair Grounds and await orders of the Commanding General. The Commanding Officer South Column will furnish the necessary protection for the Divisional Artillery.

VIII. The reserve ammunition train will follow the Divisional Artillery and park on same grounds.

IX. The Base Hospital will move at 1.45 p. m., follow the artillery, but move via 20 A-21 to 18 A and establish hospital near 18 A.

X. Division Headquarters will be established near 18 A.
By Command of Major-General McKee.

ALFRED B. SCHANZ,
Lieut.-Col. and Insp.-General,
A. A. A. G.

REPORT No. 16. APPENDIX "c."

HEADQUARTERS INDIANA NATIONAL GUARD,
CAMP OF INSTRUCTION, FORT BENJ. HARRISON,
NEAR INDIANAPOLIS, Aug. 8, 1905, 4.30 p. m.

FIELD ORDER,
No. 2.

The Commanding General directs the Chief of Artillery to report with two batteries (platoons) field artillery at Division Headquarters, near "18 A" at once.

ALFRED B. SCHANZ,
Lieut.-Col. and Insp.-General,
A. A. A. G.

REPORT No. 16. APPENDIX "d."

HEADQUARTERS INDIANA NATIONAL GUARD,
CAMP OF INSTRUCTION, FORT BENJ. HARRISON,

No. 6356.
MEMO. ORDER.

Chief of Artillery, in Bivouac Near "18 A":

Sir—The Commanding General directs that you perfect your present defensive positions wherever possible, selecting better points if possible, and strengthening your power of resistance in every respect. The present line of defense must be held at all hazards until reinforcements can arrive.

The Commanding Officers 1st and 3d Infantry have been directed to confer with you and furnish support for your artillery positions.

Very respectfully,

ALFRED B. SCHANZ,
Lieut.-Col. and Insp.-General,
A. A. A. G.

MEMO. ORDER.

C. O. 3d Infantry, in Bivouac Near "18 A":

Sir—The Commanding General directs that you occupy the strongest possible defensive position to the east of your present bivouac, maintaining

your present line of observation with vigilance so as to thoroughly protect yourself against possible attack. You will select a line of resistance and hold such positions at all hazards until reinforcements can arrive from the west. You will also arrange with the Chief of Artillery to furnish support for his artillery position near your command.

Very respectfully,

ALFRED B. SCHANZ,
Lieut.-Col. and Insp.-General,
A. A. A. G.

L. S. No. 6354.

MEMORANDUM.

C. O. 2d Infantry, in Bivouac at Lawrence Fair Grounds:

The Commanding General directs that you withdraw all your outposts at once with the exception of those connecting with the center column so far as is possible without having movement coming to the knowledge of other commands and return to your former camp with least possible delay, via Lawrence, Pendleton Pike, and 19-15. Upon arrival in camp you will clothe as "Blues" and operate as such throughout the remainder of the tactical exercise. Immediately upon transfer as "Blues" being completed you will deploy covering line of defense of last year's exercise, placing your outpost generally along line 15 to 17, selecting a line of resistance beyond which no advance will be made in force. Battery C will report to you prior to your leaving bivouac, the three Hotchkiss guns left in permanent camp being assigned to outpost.

You are supposed to represent a force superior to the "Browns," but charged only with development of the opposition without making a real attack. Under no condition will opposing sides come closer than mid-range fire, the object being to test individual officers in making disposition for stubborn resistance without bringing on an engagement other than of outposts.

You will continue to observe orders from these Headquarters after becoming "Blues."

This entire movement must be executed with every precaution for secrecy. You will take with you a detachment of Signal Corps assigned to you without further orders.

Yours respectfully,

ALFRED B. SCHANZ,
Lieut.-Col. and Insp.-General.

A. A. A. G.

REPORT No. 16. APPENDIX "k."

REPORT No. 16. APPENDIX "1."

REPORT No. 17.

INDIANAPOLIS, IND., September 1, 1905.

To the Assistant Adjutant-General, Indiana National Guard:

Sir—I have the honor to submit the following comments and reports upon the maneuvers of the Indiana National Guard during the days of August 2 to 11, 1905, which were held at Fort Benjamin Harrison, near Indianapolis, Indiana.

The field orders were delivered to the commanding officers of the different regiments and detachments that were to participate in the maneuvers, at 12 o'clock noon upon the 8th of August. A copy is attached marked Appendix "b." This gave to each detachment and regiment two hours to prepare for the march. The orders were concise, and gave the necessary information to each Commander of the several columns, but it left all of the details to be attended to by the commanding officers of the different units forming the movement.

This was what was desired by the Commanding General of the camp.

First. To give each Commanding Officer of each column an opportunity of equipping and providing his troops, and interpreting the orders.

Second. After forming for the retreat or retrograde movement, to observe what method each Commanding Officer would pursue to protect the main body of his column by forming a rear guard against an energetic and overpowering force, which was presumed to be in the immediate vicinity.

A map is hereto appended and marked Appendix "H," which gives the route, bivouac, and outpost positions of each unit comprising the movement.

The Divisional Artillery was the first to move, a little late in passing the road in front of the 2d Infantry quarters, but in good formation of column of sections, with their advance guard well to the front.

THE SOUTH COLUMN.

The South Column, Colonel Smith, composed of the 2d Infantry, was a few minutes late in starting, owing to the fact that they waited for the artillery to pass on the road. The Commanding Officer neglected to have an advance guard formed, depending upon the artillery to do this service for him, although he had nothing whatever to do with their movements. A rear guard was formed of one company after the column had abandoned camp, and was well committed to the movement, and afterwards another company was added to the rear guard. The rear guard commander knew nothing of the proximity of the enemy, and had no orders other than to form a rear guard, there being a perfect absence of orders from the Commanding Officer of the Column. At no time was the rear guard of each column over three hundred yards in rear of the main body, and the work was done in a most careless manner. The orders especially called attention to "Commanding Officers of the marching columns will maintain intercommunication." During the entire movement this was only done once, and then by the Commanding Officer of the South Column sending a mounted man to get into communication with the Center Column, which he

did at Blount's Bridge, but with so many mounted Battalion adjutants and Quartermasters it would seem that in an important affair of this kind, and in the absence of cavalry, he would have sent an officer with instructions to communicate.

Arriving at 20A, the place designated on orders to go into bivouac, the South Column found the Divisional Artillery in temporary park awaiting orders, and at once marched his entire column into a grove and proceeded to go into bivouac regardless of the fact that an overwhelming force was pursuing.

The Divisional Artillery had thrown out a small outpost of its own, but it was at first placed in the direction opposite to that from which the enemy was expected and towards the main body of their own army. This error was soon corrected. The orders especially stated that while the Divisional Artillery was temporarily parked at the bivouac of the South Column, that "The Commanding Officer of the South Column will furnish the necessary protection for the Divisional Artillery." This was not done; in fact the artillery was furnishing the only protection against an attack that the South Column enjoyed. The rear guard of the South Column, instead of forming an outpost when the main body went into bivouac, proceeded to the bivouac and began to pitch its own shelter tents. The Commander of the South Column sent out a few mounted officers towards the enemy, but an energetic enemy with good cavalry would have thrown the whole column into confusion at any time from their arrival, which was about 3 o'clock p. m. until about sunset, when one battalion was ordered out on outpost duty. This column had a great advantage by having its entire southern side protected by neutral territory, and had only to protect its east and northeast front. Major Conde of the 2d Infantry was ordered to command the outposts in front of this column, and when visited by the umpires at dark, he had taken a strong position on the road that runs north from 20, near Reddick's, about half a mile from his reserve. His No. 1 support was in a wheat stubble, but with no clear field of fire and on a poor line of resistance, although he entrenched the enemy could have approached the support from three different directions, and had cover for themselves after driving in his pickets. Though this position was badly selected, the pickets were well posted, and all seemed to know what was required of them.

The No. 2 and No. 3 supports were better selected to offer resistance and support the pickets. There was no patrolling between outposts and supports, but on the whole the South Column had the best disposition and seemed to have more knowledge of what was required of them on outpost duty than either of the other columns, but the delay of the Commanding Officer in protecting himself against an overwhelming enemy during the afternoon while his command was going into bivouac, is inexcusable.

The Signal Corps at once got into telephone communications with the different bivouacs and established wire connections, using the wire fencing as far as possible. This was done with dispatch and promptness that usually is not looked for in militia organizations.

THE CENTER COLUMN.

The Center Column, Col. Thayer, started about fifteen minutes late, forming an advance guard without enough detailed instruction to its officer, and when the column had left its camp he formed his rear guard of two companies. This was hardly enough, as he had the center column, and the enemy would in all probability hit him first, as they were in overwhelming numbers and would be expected to act with great boldness. The rear guard officer was left uninstructed as to what was expected of him, and just trailed along behind the column. No side roads or suspicious places along the route of march were reconnoitered. There was no disposition upon the part of the Center Column to get into touch with the columns on the right and left of it until the South Column had got into communication at "Blount's Bridge." After arriving at their bivouac south of "18A" they went into camp with all the deliberation of a body of troops in a friendly country, and it was at least two hours before outposts were placed along their front towards the enemy.

The position of the outposts of this column were in some instances well selected as far as observation was concerned, and the terrain afforded a fine location for their line of resistance, but the number of men placed on outpost duty was insufficient for the urgent needs that the situation demanded. A system of Cossack posts was established with a small support, but no reserve was established, and an enterprising enemy would have had a comparatively easy time in driving back the outposts, which would have left the main body unprotected by any organized body, as the lines of communication from the support to the main body were in all cases bad, and few of the support commanders even knew the road to the main body. The outposts in most cases did not know that there was an enemy in their front, or what was expected of them in case they were attacked. In some cases they did not know where the next post on their right or left was located, or what was the number of their posts.

The whole organization of the outposts along the front of the Center Column was poorly instructed, and in most cases poorly conducted. Yet, having advantage of the finest kind of ground to form an almost ideal system of outposts upon, in two cases the outposts had made their bivouac on the side of the fence towards the enemy without cover of any kind. There was no patrolling or communication between outposts.

THE NORTH COLUMN.

The North Column, Colonel McCoy, took the 10-9-8-7-6-5 road to Baker's Bridge. Their advance guard was at once organized, but entirely uninstructed, and made no effort whatever to gain information or to reconnoiter any of the many places that an energetic enemy's cavalry would have harassed its march. The rear guard was left without any instructions regarding the enemy and what it was to do in case of an attack, and the whole column marched a long distance between its own camp to (No. 12) in a northerly direction, exposing its entire length to a flank attack from an energetic enemy in superior numbers. This flank should have been protected by flank guards.

There was no effort to get into communication with the Center Column marching on a parallel road, and no effort made to reconnoiter the space between the Center and the North Column.

This Column was also late in getting out its outposts to protect its front, and thus placed itself in a position to be thrown into confusion by a sudden and determined attack from the front.

The orders provided that this column should march to the neighborhood of Baker's Bridge and there bivouac. For some unknown reason this column crossed Fall Creek at Baker's Bridge and went into bivouac on the near side of the creek nearest the enemy, with the creek at their back. This was a faulty position, and it was not until late at night that the bridge in rear, and the road over which they had traveled that day, were guarded. This left their rear and flank with a good road clear for the enemy's cavalry to approach and deliver a severe blow, and perhaps cut them off from the main body or roll them over on the Center Column of the rear guard. This condition was not altered until late at night when outposts were sent to cover the bridge and protect the road from surprise.

This column should have had a strong detachment at No. 17, Blount's Bridge, on the road, to interrupt or stop any advance that the enemy might make to attack their front, but this salient point was neglected and it was occupied early the next morning by the enemy. The position of the outposts established to the front was not well selected. The umpires were allowed to approach along the main road from No. 17, Blount's Bridge, up to within 100 yards of the bivouac at 12 o'clock at night without a challenge, and then only one sentinel was encountered.

The outposts were nicely established as far as the rugged country was concerned, but the main road, the route by which an enemy would naturally be expected, especially at night, was almost wholly unprotected from surprise. These outposts were fairly well instructed and seemed to know what they were on duty for, but the disposition was faulty in the extreme, they making more of an effort to connect and establish their line of observation with that of the Center Column, but leaving the road and northeast too much unprotected.

GENERAL COMMENT.

The first problem was that of a brigade moving on three parallel roads acting as a rear guard to a large body of troops in retreat. Its object was to see what method of security each Column Commander would adopt, and how each would conduct himself if confronted by a superior force who was advancing, means he would adopt to gain information of the enemy's actions; this without the use of cavalry.

First, the Regimental Commanders did not seem to take the movement in a serious military sense, their only object seemed to center in providing rations for their command over night and getting to their bivouac before nightfall, and failing almost entirely to get interested in the superior body of the enemy who was approaching from the east.

This was surmised by the utter lack of instructions given to the rear guard commanders, or even telling them where or in what direction the enemy was expected, or in most cases that there was an enemy at all in the neighborhood. The failure of protecting the flanks while on the march,

the failure to use the mounted officers in communicating between the parallel columns, and the inexcusably long time that their entire front was left open to a surprise and attack after arriving at their bivouac, made it all have the appearance of a practice march in a friendly country. Generally speaking, faulty positions were occupied by the line of observation and resistance along the entire front, some outposts being located where it was almost impossible for foot soldiers to go in day time, to say nothing of the night, and at the same time leaving the main avenue of approach comparatively open to the enemy. But most all of the fault in the outpost positions could be attributed to the lack of instructions and the lack of experience of the officers commanding the supports or reserves.

PROBLEM NUMBER TWO.

The South Column was withdrawn under cover of darkness and sent back to camp for a change of uniform, and at 3 o'clock in the morning took a deployed position as the enemy, their right resting at No. 17, Blount's Bridge, protected by a high hill, where they mounted two mountain guns and the line extending in a southeasterly direction along a high ridge parallel with the road No. 16-15, the left resting at the schoolhouse.

The enemy got in touch with the outposts of the North and Center Columns at about 3 o'clock a. m., and a few scattering shots were fired by both sides. Almost instantly the musicians of the North and Center Columns were up and sounding the alarm, and the whole force was under arms in a very short time. It was simply a small outpost affair and insufficient to even drive in the sentinels, but the whole force was up in arms, and their rest was destroyed for the balance of the night.

This problem was one of reconnoissance pure and simple, orders having been promulgated to prevent actual contact.

The North Column made several feeble efforts to make a reconnoissance of the enemy's position, and in at least two cases had mounted officers' patrols come up as far as Blount's Bridge, No. 17, which should have been protected by them with a strong detachment. These officers rode into the very lines of the enemy before they discerned that an enemy was there, and of course ruled out as captured, but in their excitement made their escape, and carried the information back to the North Column that the enemy had secured possession of the Blount Bridge. A few scouting patrols were observed from this column trying to definitely locate the position of the enemy, but there was no determined or well organized system of reconnoissance made either by the North or Center Columns of the position occupied by the enemy, as far as could be observed. The two columns seemed to be satisfied to await the attack which they thought was sure to follow.

The enemy upon gaining contact with the North and Center Columns at once commenced to make a rather energetic reconnoissance, and in many cases penetrated far into the lines of observation, and even in some cases going beyond the lines of resistance and observing the positions taken up by the main bodies of the Center and North Columns. While their work in this direction was of beneficial results, there was not a well organized system inaugurated. A great deal of most valuable information regarding the two columns was secured, but was never transmitted any farther than

the company commander, and in some cases not that far, and perhaps the same could be said of the greater part of the reconnoissance made by the two columns in bivouac.

The Divisional Artillery took station between the North and Center Columns upon a high wooded bluff overlooking a large tract of country to the north and east, and had an ideal position for a finish fight, but not for a retrograde movement, it commanding the two main avenues of approach and the country for about 120 degrees. Their position was faulty, for if the enemy would have made a determined attack through the rugged country and succeeded in turning the flank of the Center Column, the artillery position would have been untenable, and he then would have to get out quickly to keep from getting captured without dealing any blow in return, and depend entirely upon the North Column holding Baker's Bridge until he had crossed the creek. The ideal position in this retrograde movement would have been across on the far side of the creek, where the North Column should have bivouaced. In this position he was safe and could have commanded the same amount of territory, as well as held the Baker Bridge under his guns.

The artillery on each side participated in a duel, but neither seemed to locate the other, so there was no damage done.

The officers and men all seemed to enjoy and take an unusual interest in the problems, but the great fault lay in the Column Commanders, and they themselves not understanding sufficiently well the duty and responsibility that rested upon them; but as a whole the maneuvers were a success, and would be greatly improved upon if repeated at a future time.

The observation of the umpires was that whenever a line officer was encountered, either on advance or rear guard, outpost or reconnoissance, he generally had all of his men well instructed, and although his position perhaps may have been faulty, still, a perfect judgment in selection would only come from experience in the field against a real enemy.

These comments may seem harsh, but they are as seen by the umpires. The many good things that were observed are not commented upon. It was only those that seemed faulty that are touched upon by this report.

Respectfully submitted,

C. S. TARLTON,
First Lieut. 1st Inf., U. S. A.
Chief Umpire.

REPORT No. 17. APPENDIX "m."

FORT BENJAMIN HARRISON, INDIANA,
August 10, 1905.

To the Chief Umpire, Maneuvers I. N. G., Aug. 8 and 9, 1905, Fort Benjamin Harrison, Indiana:

Sir—I have the honor to report that I accompanied the 3d Infantry, I. N. G., Col. Edwin P. Thayer, 3d Infantry, I. N. G., Commanding, which was acting in compliance with Field Order No. 1, August 8, 1905. The regiment left camp promptly at two o'clock p. m. and immediately placed one

battalion as rear guard. No advance guard was formed until it had proceeded about two miles. There are several reasons why an advance guard should have been formed: to discover the inroad of hostile cavalry, open the road, gather information, and keep up communication with the main body (constructive) ahead, etc. The transportation of each battalion consisted of one wagon which moved with the battalion to which it pertained.

Route sketch of the country was made.

A detachment of the Signal Corps accompanied the command.

The regiment moved via 13-17-18 and the road 18-21 to 18 A, near which place it was to bivouac. It arrived at destination at 3.35 p. m., stacked arms and proceeded to make camp without reconnoitering the country to eastward in the direction of the enemy. The details for outpost duty moved out at 4.40 and one officer was noticed moving his detachment of about 40 men, in column of fours, making no effort to guard against surprise. In about two hours was established a system of outposts and a service of security against possible attack from the northeast, east, and southeast. A most noticeable feature of the system was the thinness of the line and the weakness of the supports. But in extenuation it may be said that this regiment had fewer men to draw from and covered a greater and more difficult extent of front than either of the other regiments. A sudden attack on this line would have not have met with much resistance.

Lieutenants Tarlton and Thuis and I visited the outposts of the 2d, 3d and 1st Infantry Regiments, beginning about sunset and continuing until one o'clock. One support was found located with three-quarters of a mile of stubble field in its rear, affording an exceedingly poor line of retreat if driven in, and a hundred yards to its front some woods, and farther on, corn fields. This was cleverly overcome by posting the sentinels in trees on the farther edge of the woods. Proceeding to a reserve no sentinel was found, but the Captain was keeping the entire body awake, under arms, and with all accoutrements on.

The right and left wings of outpost system of the 3d Infantry were separated by a deep and very difficult ravine. Its nature may be judged by the fact that the commander of the outpost stated it would be impossible for us to get our horses across and this we succeeded in doing only after a rather hard struggle. Inter-communication was therefore very difficult. And one who had not familiarized himself with the lay of the country by day, could easily have become hopelessly lost. This while unfortunate could not be helped. One non-commissioned officer was found who had put his entire Cossack post in the broad open on the enemy side of a rail fence. A change of twenty feet would have put his men in concealment. A couple of other Cossack posts were found where the sentinel was walking a post with bayonet fixed and glittering in the bright moonlight. Another non-commissioned officer pointed toward his own camp and said the enemy could be expected from that direction. And he was ignorant as to the location of his own and neighboring posts.

Continuing to the left of the outposts and on a couple hundred yards we came into the road leading to the 1st Infantry camp near Baker's Bridge. We followed this some three-quarters of a mile and it was not until we had arrived at less than two hundred yards from the bivouac that we were challenged. It is understood that orders were given to patrol this road thoroughly, but judging from our experience it seems that it was not done.

And so here was this road, a main avenue of approach from the enemy, lying broad wide open. Moving in the direction of the outpost, Lieutenant Thuis and I accidentally stumbled upon a camp which proved to be the reserve. There was no sentinel and waking up the officer in command we got a guide to the support and there we found the same condition of affairs. Going out to the outposts we found them, in the main, well posted, but some had gone to the opposite extreme of a few of the former sentinels and were lying down.

Throughout the entire outpost system there seemed a general laxity of communication. The lines of observation and resistance were not clearly defined, nor what should be done in case of attack, nor the location of neighboring posts and supports, nor what sentinels should do upon the approach of persons. At least half the sentinels failed to challenge and the majority of those who did allowed the entire party to approach mounted. A little more familiarity on the part of officers with the Field Service Regulations would obviate most of the errors mentioned above. The 'Cossack system was used throughout.

At about 10.30 p. m. the 2d Infantry on the right and the Hotchkiss Battery were quietly withdrawn and ordered to change to the blue uniform. Acting as an enemy they were to take a defensive position to the eastward. Some such movement as this was suspected and was reported when the patrols of the 3d Infantry failed to connect with those of the 2d. At about 4.10 a. m., Aug. 9, when the Blues were first discovered, the call to arms was sounded in the Brown camp and troops were sent forward to the line of resistance. There were one or two little brushes, but on the whole both sides lay on the defensive, each expecting attack from the other. It is not believed that at any time was there justification for the call to arms being sounded.

I saw only the 3d Infantry on the right, but when its companies came forward they were well placed. And when the two guns of Battery B came out to line of resistance, its guns were well located and handled and were supported by four companies of infantry.

The troops lay practically in this position until late in the forenoon when the recall was sounded and the outposts withdrawn. Orders were given for the command to return to the Camp of Instruction. Bivouac was broken up and the grounds thoroughly policed. Promptly at 12 o'clock noon, the 3d Infantry began its return march having out small advance and rear guards.

Immediately upon getting into camp on the 8th Brigade Hospital was established. The signal corps detachments with each command established first communication with flag and in the meantime put up a field telegraph line connecting Brigade Headquarters near 18 A with the three commands. So far as my observations went the work of each was eminently satisfactory.

The artillery was under the direct orders of the Brigade Commander. Those of its operations that came to my notice, were performed well and vigorously and with much spirit. It seems to be possessed of a great deal of *esprit de corps*.

Although there were errors of omission and commission an exercise such as this must certainly have been of great good. The project was well

planned and followed closely on the lines of actual work in the field against the enemy. There was little of the whooping and hurrahing, flanking the enemy at fifty yards, charging superior numbers across open grounds and all that sort of thing which usually takes place and does not approximate real conditions. I believe every one came back with a feeling of something accomplished, something learned and with a determination that the errors committed would not be repeated. The errors anyway were mainly matters of detail and the general work was good.

Very respectfully,

C. LININGER,
Second Lieutenant 1st Cavalry,
Acting Asst. Inspector-General.

REPORT No. 18.

HOSPITAL CORPS, INDIANA NATIONAL GUARD,
INDIANAPOLIS, IND., August 31, 1905.

To the Assistant Surgeon-General, Indiana National Guard, Indianapolis, Indiana:

Sir—I have the honor to submit the following report on tour of duty on August 8th and 9th, 1905, during maneuvers.

According to Field Orders No. 1, Par. 9, I was ordered to mobilize entire equipment of the Base Hospital and move by designated route and establish a hospital near a designated point (18 A).

One wagon was all that could be procured from the Quartermaster's Department, with which to execute orders. Necessarily I could move but a small portion of the Base Hospital property, leaving one sergeant and six men with sufficient medical supplies to care for the 11 patients in hospital and to look after property.

The equipment with which I left camp was sufficient for a hospital of 17 beds with one ambulance. By reason of lack of transportation, and with but one ambulance, it was impossible to establish a hospital of sufficient magnitude and ambulance stations in proper number to accommodate the fighting force if in real action, with any degree of casualties.

The personnel accompanying the expedition was as follows: one Surgeon, one Assistant Surgeon, one Quartermaster and 34 men of the Hospital Corps.

In pursuance of orders from the Assistant Surgeon-General, bearing date of August 8th, I sent a detachment of one sergeant and six men to report to the Surgeon of each Regiment, and one 1st class sergeant and two men to the Artillery Battalion.

In pursuance of verbal orders from the Assistant Surgeon-General, and with a general idea of the direction of the expedition of the 8th and 9th insts., I took a sanitary detachment consisting of one 1st class sergeant and two men over the country, securing samples of all water which the men were liable to use for drinking purposes. Analysis was made in the field and a report sent in to the Assistant Surgeon-General on the night of the 7th inst., for the information of the Commanding General. (See report.)

Several wells and streams, the water of which contained elements indicating pollution, were recommended to be condemned for drinking purposes.

In pursuance of Field Orders No. 1, Par. 9, I left camp with property and personnel mentioned, moving over designated route.

By reason of troops establishing bivouac on the western limits of the reservation, it was impossible to establish a hospital in the rear of the center of the division, at a point below the line of fire. The point selected, was on the road, the western limit of reservation about 300 yards south of Divisional Headquarters, well protected from the front by heavy woods with thick undergrowth. The hospital tents were pitched on a line north and south facing the west. The Hospital Corps pitched tents (shelter) on the same line to the north. This site was one-quarter mile from a good water supply and of easy access from the north and south by a good road which connected by crossroads with the right and left flank of the Division.

On the morning of the 9th instant, when call to arms was sounded, being without information as to the general movements of troops and points of attack, I was somewhat at a loss as to the most advantageous point for establishing an ambulance station. I made an effort to locate the center of division or point most likely for heavy casualties. In one hour after call, I located ambulance station in a deep ravine, protected on all sides with a protected access to first-aid dressing stations near the firing line and with the hospital in the rear, behind the line of reserves. Ambulance station was placed in charge of Assistant Surgeon, Lieut. H. E. Figg.

In taking position, the only accident was the turning over of one ambulance with slight damage, and no injury to occupants. With a proper supply of ambulances, I would have established a station in the rear of either flank of Division.

On the sounding of recall, the ambulance station was ordered to join the hospital, and at 11.45, the return to camp began, which was north to Baker's road, then east and in a southeasterly direction to camp, which was reached in one hour and the equipment carried added to that which was left in camp.

As regards the medical aspect of the maneuvers, as observed by me while in charge of the hospital and ambulance station, respectively, I have the honor to state that I believe the maneuvers to be of great practical value to the Medical Department of the Guard in the way of instruction, both by observation of and by actual participation in the movements of bodies of troops under circumstances simulating as nearly as possible, the conditions of war. In the disposition of the Medical Department in the field, it was evident that the Chief Surgeon of an army needed a copy of all orders for the general movement of troops, issued by the Commanding General to his subordinate commanders, in order that he might intelligently locate and assign the medical personnel.

The conduct of the men of the Hospital Corps was admirable, and to be commended in every respect.

Very respectfully,

EDGAR F. SOMMER,

Major Comdg. Hosp. Corps, I. N. G.,

Comdg. Officer, Base Hospital.

REPORT No. 19.

HEADQUARTERS FIRST BATTALION, SECOND INFANTRY,
INDIANAPOLIS, IND., August 31, 1905.

The Adjutant, Second Infantry, Indiana National Guard:

(Extract.)

Sir—Tuesday, August 8th, at 2.25 p. m., in compliance with orders, the battalion left camp with the regiment on practice march, arriving at the old Lawrence Fair Grounds at 3.25 p. m., the 8th instant. Went into bivouac at 4 o'clock p. m. Mess served at 4.55 p. m.

In compliance with orders from Regimental Headquarters, battalion moved out at 6.10 p. m. on outpost duty, and established eight Cossack posts carefully entrenched about one thousand yards in rear of regiment with right post near the Big Four Railroad and left post in touch with right post of 3d Regiment near wagon road running east and west on south side of Army Post Reservation. Company "C" under command of Captain Power on the right, with Company "H" under Captain Smith, Company "A" under Captain Kepner, and Company "D" under Captain Moorhead, in the order named from left to right. Reserve was established at Day's farmhouse on north and south road west of Reservation. At 6.45 p. m., formation was completed and reported to Regimental Headquarters. At 7.30 p. m. the Battalion Commander rode the lines of outposts with Umpires.

At 11.25 p. m. in compliance with orders from Regimental Headquarters, the battalion was withdrawn and joined regiment, returning to Camp Benjamin Harrison via Pendleton Pike, arriving at camp at 12.35 a. m., the 9th instant.

After halt of one hour, during which time clothes were changed from Khaki to Blue, and coffee served, the battalion left camp at 1.30 a. m., the 9th inst., via trail with Company "D" as advance guard, and took up its position in battle formation in line of defense entrenched, with right resting on Roberts Road, line extending south to junction of 2d Battalion in command of Major Backman. At the same time Company "D" was detached and ordered forward to Stone Bridge with orders to hold it at all hazards. At 4.40 a. m., on orders from Regimental Commander, Company "C" and half of Company "A" was moved to the left of Major Backman's line. At 6.00 a. m., on orders from Regimental Commander, Company "H" and balance of Company "A" were withdrawn and reported to Regimental Headquarters near the old schoolhouse, where orders were received to form the detachment on the extreme left, southwest of No. 15, where Hotchkiss Battery went immediately into action, firing about twenty rounds at about twelve hundred yards at enemy's artillery located near a straw stack on our left.

At 7.20 a. m. Company "H," in compliance with orders, advanced about seven hundred and fifty yards under cover, firing three volleys at enemy's artillery. At 8.40 a. m., Captain Middleton with small detachment, advanced by rushes to ditch about three hundred yards, a little to the left and fired two volleys at enemy's artillery. From that time to 11.15 line was held under the boiling sun, with men greatly exhausted, and at 11.15

a. m., of the 9th inst., orders were received to return to camp, which was reached at 11.30 a. m.

The following extract from report of Captain R. L. Moorhead, when detached from battalion and held Stone Bridge, is herewith submitted:

CAMP OF INSTRUCTION, FORT BENJ. HARRISON,
August 10, 1905.

The Adjutant, 1st Battalion, 2d Infantry, Indiana National Guard:

Sir—I have the honor to make the following report of the operations of Company "D" under my command during the maneuvers of August 8 and 9:

At 3.00 p. m. this company was detached and directed by the battalion to take up a defensive position at the Stone Bridge, Point 17, and to hold this bridge at all hazards. The following instructions were given:

The ground to the north of the road was neutral territory and no attack was to be looked for from that side. The attack was to be expected from the front and left. These instructions were immediately complied with. The first section under command of Lieutenant McAdams occupied a covered position to the right of the bridge. The second section under command of the 1st Sergeant was concealed in a defensive position in the farm-yard at the rear and left of the bridge. Six selected marksmen from each section were posted on and under the bridge, concealed by the walls and abutments. Our instructions were to make no reconnoissance, but to expect an attack at daylight.

Lieutenant McBride of this company was detached by direction of Battalion Commander with instructions to make a reconnoissance through the hills to the left.

At daybreak a mounted officer in Khaki, accompanied by a farmer on foot, was observed coming down the road from the direction of 18. Our position being entirely concealed, this officer approached to within fifty yards of our position. He proved to be Lieut.-Col. Loudon of the 1st Infantry. Upon being called upon to halt and surrender, he turned his horse. He was instantly fired at by several of our best marksmen. Lieut. Wallace Sherwood, Signal Corps, returning from reconnoissance down the road, also fired at him with his revolver several times within a range of three or four paces.

No other reconnoissance by the enemy was made from the road, although their outposts were observed on the road at a distance between 600 and 700 yards. At 6.00 a. m. a company of the enemy's infantry pursuing several reconnoitering patrols of this battalion, came within 100 yards of our position. We fired three volleys at them within this range. The patrol under command of Lieutenant McBride, captured eleven prisoners. These prisoners were immediately sent under guard to the Regimental Commander to be questioned concerning the enemy's position, force and intentions.

The enemy's outposts and scouts were constantly observed on the hills to the left and front of our positions. The range having been accurately determined, these were fired upon by selected riflemen whenever a good shot was offered. No attack or attempt was made to force our position. At 10.00 a. m. the following verbal instructions were given by the Regimental Commander, Colonel Smith:

"You will deploy your company in the field to the north of the bridge and advance forward as far as possible, turning to the left and force the enemy from their position on the hills. You will be supported by the Hotchkiss gun and Major Backman's Battalion, who will attack from the other side. (See point 16.) We will scour the hills with the Hotchkiss gun as you go forward. It is believed your movement to the right of the road will reveal the position of Captain Heiskell's Battery which has not yet been engaged."

Pursuant to these orders the company was deployed to the right of the road and moved forward on the run 450 yards. This being as far as we could go without encountering an impassable hill to our left, a change of direction to the left was ordered, and we ascended the hills to our left. During this time, we were under the fire from about one company of the enemy on the hills to the left, range between 400 and 600 yards. The losses were estimated light, as we were constantly in double time to reduce fire losses. Our movements up the hill brought forward a large force of the enemy. Seeing their advance to the front and right, I gave the order to retire to the road to avoid being caught, both front and flank.

At this point the Senior Umpire, First Lieutenant Tarlton, U. S. A., ordered the company out of action. We returned to our former position at the bridge at 10.20 a. m. Recall sounded at 10.30 a. m. We returned to camp by the road leading via 17, 16, and 15.

A typographical map was not prepared, we having in our possession an accurate map of the U. S. Reservation.

Respectfully submitted,

ROBERT L. MOORHEAD,
Captain 2d Infantry.

Very respectfully,

H. T. CONDE,
Major Second Infantry, I. N. G.

REPORT No. 20.

HEADQUARTERS THIRD BATTALION 2D INFANTRY,
FRANKLIN, IND., August 30, 1905.

The Assistant Adjutant-General, Indiana National Guard, Indianapolis, Ind.:

(Extract.)

Sir—Forenoon of August 8th the battalion was drilled in close and extended order. The attached map is made a part of this report and is referred to in explanation of the "Practice March" of August 8, and the "Tactical Exercise" of Aug. 9, 1905.

As per "Schedule of Exercises," the battalion with the regiment marched out of camp at 2.30 p. m., receiving verbal orders from Colonel Smith to form rear guard upon reaching the road. The battalion reached the road running south from No. 15 at 2.35 p. m., and entered this road about 50 yards south of No. 15. Rear guard was at once formed, composed of Companies "K" and "M" under command of Captain Fitch. Com-

pany "K" formed the "Reserve" and was under the immediate command of Captain Fitch. Company "M" formed the "Support" and "Rear Party" and was commanded by Captain Barnes. The march was south on this road to No. 19, thence west to road running south half way between Nos. 20 and 21, thence south on this road about three-fifths of a mile to road running west, thence west to the old Lawrence Fair Grounds, arriving at 4.00 p. m. Here camp was formed and the regiment bivouaced. Distance marched, about two and three-fourths miles.

At 10.40 p. m. camp was broken as per orders from Colonel Smith. The regiment was formed and waited until the outposts were withdrawn. The withdrawal of the outposts being completed, the march was begun at 11.30 p. m., east from old Lawrence Fair Grounds to the first road running south, thence south over this road to the town of Lawrence, thence northeast over the Pendleton Pike to, and north over the road running north from said pike to Nos. 19 and 15, thence to original camp, arriving at 12.30 a. m., August 9, 1905; distance marched about three and one-half miles. Here as per orders the regiment changed to the "Blue Army" and moved out to No. 15 at 1.30 a. m.

This battalion was ordered by Colonel Smith to take a position with left resting at the cemetery half way between Nos. 15 and 19, and extending along the highest contour to schoolhouse about one-fourth mile northwest of No. 15 and connecting at this point with Major Backman's left.

Company "L" was assigned to the left and took position in excavations on highest point of contour. Company "E" on Company "L's" right, also in excavations. A squad was sent from Company "E" to cemetery as an outpost half way between Nos. 15 and 19.

Company "K" took position on right of Company "E" and formed a line through the woods entrenching and connecting on right with Company "M," which was entrenched with a platoon on each side of the road near the schoolhouse, and completely commanding road from the schoolhouse northwest to No. 16. This position having been occupied and contact having been made with Major Backman's left, the fact was reported to Colonel Smith by Lieutenant Unversaw of the battalion staff. Scouts were sent out along the entire front and scouted to the front for a distance of one-half mile. A few scattering shots were fired by scouts at 4.00 a. m. These scouts brought in much valuable information as to the position of the enemy, which was at once reported to Colonel Smith. At 7.00 a. m., by request, the battalion was reinforced on the left by Major Conde with 1½ companies, also by one Hotchkiss gun from Battery "C" of Captain Doyle's command. This gun fired 23 shots at the enemy's battery, 13 being fired when the horses of the enemy's battery could be plainly seen. Firing ceased about 8.00 a. m. Recall was sounded at 10.00 a. m., and troops were marched back to camp where they rested the remainder of the day.

Very respectfully,

JOHN H. TARLTON,
Major, Third Infantry.

REPORT No. 21.

HEADQUARTERS 2D BATTALION, 3D INFANTRY,
AUBURN, IND., August 22, 1905.

The Adjutant, 3d Infantry, I. N. G., Greenfield, Ind.:

(Extract.)

Sir—Tuesday, August 8th, the regiment spent the forenoon in quarters and marched from camp at 1.55 o'clock p. m., this battalion leading and furnishing two companies for an advance guard, marching north one-half mile, then west one and one-half miles, then south one-half mile and going into bivouac on the east of the roadway in a field of underbrush at 3.40 p. m. Company C of this battalion was ordered to report to Major Geo. W. Freyermuth to serve as a portion of the outpost system, the remainder of the battalion pitching shelter tents on the right of the regiment, flanked on the right by Battery C Artillery Battalion, acting as infantry, and Battery B with two field pieces.

One-half mile further to the right was the 2d Infantry, in bivouac in a strip of timber, and about an equal interval to the left of the regiment was located the 1st Infantry, with Battery A posted in the interval.

About midnight I was informed by the Regimental Commander that the 2d Infantry had marched from its bivouac and I also noted that Battery C had moved away from our immediate right and I was ordered to prepare for an attack by these commands.

Firing was heard on our front and left at 4.00 o'clock a. m. on Wednesday the 9th. "To Arms" was sounded at 4.07 o'clock and I immediately went to the front to take charge of operations on our right.

Firing on our front and left becoming quite heavy, I ordered Company K to take position on the bluff east of the ravine and immediately in front of our bivouac, established lookouts in trees and here remained during the remainder of the action.

Company D was ordered to reinforce the center and Company B was held in reserve at the bivouac.

My lookouts reporting troops massing near a shed in our direct front, Major F. E. Stevenson ordered one field piece from Battery B to take a position in a meadow near my headquarters and shell the position of the enemy.

This piece was later reinforced by the other gun of Battery B and the two shelled the position of the enemy, some of whom were in plain view from my position and the others reported by my lookouts, the enemy replying with Hotchkiss pieces at one mile distance.

Following the artillery action, heavy lines of skirmishers were seen advancing on our front and other bodies of the enemy in close order were reported by my lookouts as moving toward our right.

I immediately ordered Company B forward from the bivouac, detached one platoon to guard our right flank, the other platoon and all of Company K were then advanced to the position chosen for resistance. On advance of the enemy's skirmishers the guns of Battery B were withdrawn to a position in our rear, on the opposite side of the ravine, where they

shelled the enemy whenever they came into view and, when the enemy's skirmishers moved by the flank, directly across our front and in plain view at five hundred yards distance, three volleys were fired by Company K but we were not further engaged and when "recall" was sounded at 10.30 o'clock, the battalion was assembled and marched to the place of bivouac.

At 11.59 a. m., the regiment marched from the bivouac arriving at the regular camp at 12.53 o'clock p. m. on the same date.

Very respectfully,

A. L. KUHLMAN,
Major Third Infantry.

PART III.
FIELD DAY OF MILITARY CONTESTS.

REPORT No. 22.

HEADQUARTERS INDIANA NATIONAL GUARD,
INDIANAPOLIS, April 7, 1906.

The Adjutant-General, State of Indiana:

Sir—I have the honor to submit as Part III of my report on the Camp of Instruction, 1905, details and comments regarding the first Field Day of Military Contests held at one of our encampments.

The regular service has for a number of years employed this method of keeping up the interest of the rank and file in their profession. The experiment of adopting this feature was suggested by Lieut.-Col. Alfred B. Schanz, Inspector-General, Indiana National Guard, who had placed himself in communication with the Military Secretary of the Department of California, where these contests had been brought to a high degree of perfection. Copies of G. O. No. 6, and No. 50, Headquarters, Dept. California, 1903, and G. O. No. 46 and Circular No. 5, Headquarters, Dept. California, 1904, the basis of Military Field Day as used in the U. S. army, were sent us, and the program for our Field Day was an application of the principles therein put forth, of course with such alterations and limitations as the peculiarities of our service required. Great credit is due Military Secretary S. W. Dunning, Dept. of California, for his prompt and courteous assistance.

Unfortunately there were unavoidable delays in preparing the program and it could not be published until too late for thorough preparations in the various sub-commands. This will explain the criticisms of a number of sub-commanders, herein contained, which of course must be acknowledged to have been just in the absence of valid excuses.

The Field Day was held on Thursday, August 10, 1905. An athletic field had been laid out west of the 2d Infantry camp, by the committee in charge, and a small observation stand had been erected for Governor Hanly and invited guests. The side lines were picketed and occupied by a large assembly of visitors. Considering the short time of preparation, the various teams accredited themselves admirably and furnished much pleasure, entertainment and amusement to the spectators, while at the same time showing proficiency in actual military drills and exercises.

The circulars and memoranda attached hereto give full detail of what was attempted and accomplished. (See Appendices "m," "n," "o," "p," "q," "r," "s," "t," "u" and "v.")

In order to get an expression of analytical criticism, Brig.-Gen. Chas. Shaler, U. S. A., acting as referee, was invited to make a special analytical and suggestive report on Field Day, which is appended hereto as Report No. 23. With proper attention to his advice the Field Days of the future would be made greater technical successes.

I take the liberty of quoting the following comments from sub-reports on the "Camp of Instruction:"

Col. H. B. Smith, 2d Infantry: "The day set apart for Field Exercises is a new feature of the Annual Camp of Instruction, but it is believed that the program for the same should be made out at an earlier date, so that the men of the regiment who desire to take part in the different events can

have an opportunity of entering the same at an earlier date and a great deal of confusion be avoided."

Col. G. W. McCoy, 1st Infantry: "The idea of an annual Field Day is considered a very excellent one. The program for the next event should be published as far in advance as possible so that the different companies can talk the matter over at their home stations and be prepared to promptly make their entries on arrival in camp."

Major H. T. Conde, 2d Infantry: "The introduction of a Field Day of sports is a wise move. In the future such events should be arranged far in advance and a full program of events be published in orders at least three months before camp."

Major John J. Backman, 2d Infantry: "The Field Day feature created a great deal of interest among the men. It was an excellent idea. Should it be continued it will be a good thing for the Guard."

Major John H. Tarlton, 2d Infantry: "The men in general enjoyed these field exercises and it seemed to create more interest among the enlisted men. Would most respectfully recommend that the program of these exercises be published several months in advance of the Annual Camp, as this would give the men more time to prepare and would do away with a great deal of annoyance in selecting entries in camp."

Major Thos. B. Coulter, 1st Infantry: "The Field Day exercises stimulated interest and can hardly fail to produce good results."

Major Wm. J. Coleman, 1st Infantry: "The wisdom of having a Military Field Day was attested by the enthusiasm which the contests aroused and the generally expressed intention of officers and men to make a better showing for their commands in an athletic way in the future. The writer feels that the military athletic tournament should be made a permanent feature of the Camp of Instruction, to the end that athletics in the companies may be encouraged and the personnel physically improved."

Major Jos. R. Harrison, 3d Infantry: "The Field Day exercises were entered into with a friendly rivalry of the men of my command and I think this was a wise innovation from our week of hard work, by the Major-General commanding and I think he and his efficient staff are to be heartily congratulated over the success of this notable event."

Major C. W. Freyermuth, 3d Infantry: "The field exercises which were participated in, were, I think, a great success. At first the officers and men did not look favorably on this part of the schedule, but as time drew on and the men became quite skillful in their practice, the officers and men became quite interested and showed a great deal of enthusiasm. As a whole, I think these Field Days should be made an annual affair, but arrangements and program should be published at least six months before the time of the annual encampment."

Major A. L. Kuhlman, 3d Infantry: "As showing the trend of thought among the enlisted men of the Guard, a conversation between several non-commissioned officers was accidentally overheard, relative to the Field Day contests, during which one of them remarked: 'I have heard considerable discussion among the men regarding these contests and am convinced that private soldiers as well as non-commissioned officers have sense enough to know that the time could be very much better employed on the range or at maneuvers than with these contests which interest principally the contestants.'"

If the opinion of the majority should prevail this seems to indicate that Military Athletic Field Days should figure at our future Camps of Instruction. One feature, the voluntary money contributions by commissioned officers to a "medal fund," is probably not the best method of arousing competition. It is too personal and far better would be inexpensive bronze medals issued under the official authority of the State, as deriving their honor and glory from a high administrative source.

Very respectfully,

WILL J. McKEE,

Major-General, Commanding Indiana National Guard.

REPORT No. 22. APPENDIX "n."

HEADQUARTERS INDIANA NATIONAL GUARD,
ASSISTANT ADJUTANT-GENERAL'S OFFICE,
INDIANAPOLIS, IND., July 24, 1905.

CIRCULAR No. 2,
1905.

1. During the forthcoming tour of duty in the Camp of Instruction, to be held at Fort Benjamin Harrison, August 2 to 11, inclusive, there will be held a Field Day of Military Athletic Contests on Thursday, August 10, of which the following is the proposed program:

PROGRAM.

Military Athletic Competition.

August 10, 1905.

COMMITTEE IN CHARGE.

Lieut.-Col. Alfred B. Schanz, General Staff.
Lieut.-Col. Theodore J. Loudon, First Infantry.
Capt. John M. Wallace, Asst. Surg., Second Infantry.
Capt. Wm. G. Everson, Chaplain, Third Infantry.
First Lieut. Ernest H. Burford, Artillery Battalion.

OFFICERS OF EVENTS.

Referee—Brig.-Gen. Charles Shaler, U. S. A., Retired.
Judges—First Lieut. Chas. S. Tarlton, 1st U. S. Inf.;
Lieut. C. Lininger, 1st U. S. Cavalry; Lieut. C. A.
Thuis, 23d U. S. Inf.; Lieut. Jarvis J. Bain, Eng.
Corps, U. S. A.
Starter—Lieut.-Col. Fred R. Charlton, Asst. Surg.-Gen.,
I. N. G.
Measurer—Major Frank E. Strouse, Chief of Eng., I. N. G.
Timers—Major Carroll B. Carr, A. Q. M. G., I. N. G.;
Major Wm. H. Kershner, A. Com. Gen., I. N. G.;
Captain Guy A. Boyle, A. D. C., I. N. G.
Clerk of Course—Div. Sergt.-Major Edw. Cassidy, I. N. G.
Scorer—First Lieut. Wallace Sherwood, S. C., I. N. G.

EVENTS.

August 10, 9 a. m. to 12 m.

TENT PITCHING.

- Contest No. 1— Scale of Points.
 Pitching Sibley Tent (5 men to tent).....1st, 10; 2d, 5; 3d, 2.
- Contest No. 2—
 Pitching Wall Tent (4 men to tent).....1st, 10; 2d, 5; 3d, 2.
- Contest No. 3—
 Pitching Shelter Tent (2 men to tent).....1st, 10; 2d, 5; 3d, 2.
 Conditions for Nos. 1, 2 and 3: Pegs to be well
 driven, walls well rolled, and men in line, in posi-
 tion of soldier, one pace to front.

TENT STRIKING.

- Contests Nos. 4, 5 and 6—
 Same tents, numbers of men and credits as in
 Nos. 1, 2 and 3.
 Conditions: Tents neatly folded in compact bundle,
 poles and pins piled on top and men in line, in
 position of soldier, one pace to front.

GO-AS-YOU-PLEASE.

- Contest No. 7—
 100 yards go-as-you-please in heavy marching order. 1st, 5; 2d, 3; 3d, 1.
- Contest No. 8—
 220 yards go-as-you-please in light marching order. 1st, 5; 2d, 3; 3d, 1.

HASTY ENTRENCHING.

- Contest No. 9—
 Hasty entrenching. Contestants stand at positions
 assigned for digging rifle pits, equipped in light
 marching order; bayonet and tin cup or meat can
 to be used for digging. Contestant to win who
 makes most effective cover in five minutes.
 Equipment may be taken off after signal is given. 1st, 5; 2d, 3; 3d, 1.

RELAY RACE.

- Contest No. 10—
 Relay race. Teams of ten men all from the same
 organization (Regiment Infantry or Artillery
 Battalion) placed opposite each other along lines
 100 yards apart; official envelope to be carried
 across and back over space intervening between
 detachments ten times; 100 yards by each man.
 Blouses unbuttoned if desired.....1st, 10; 2d, 5; 3d, 2.
- Contest No. 11—
 Five blank cartridges placed on small sheet of
 paper at 10-yard intervals; to be brought one

at a time and placed in magazine of a rifle left on ground on scratch. After last cartridge inserted, rifle to be loaded and fired in air as signal of completion.....1st, 5; 2d, 3; 3d, 1.

EQUIPMENT RACE.

Contest No. 12—

Eighty yards, contestants standing at scratch equipped with rifle, blanket roll, belt, ten rounds of blank ammunition and white gloves. To run straight away, leaving rifle at 10 yards, gloves at 20, blanket roll at 30, ammunition at 40, belt at 50, leggins at 60, hat at 70, turn stake at 80, and while returning to scratch, replace all clothing and equipments so as to pass inspection 1st, 5; 2d, 3; 3d, 1.

WALL~SCALING.

Contest No. 13—

In light marching order. Teams consist of a non-commissioned officer and four men. Teams to stand at mark 20 feet from wall, fully armed and equipped. Wooden wall 10 feet high, close jointed, with cap-piece 4 inches wide. Magazine of each rifle to be loaded with five (5) blank cartridges. Entire team to get over with arms, clothing and equipments, and fall in at mark 20 feet from wall, with equipments adjusted, in position of soldier, pieces at an "order." Five shots to be fired by first man who sees over wall, at a supposed enemy, before any more men become exposed on top; the first man who reaches top to fire five more while seated on top; the other fifteen shots to be fired from ground on other side by the three remaining members of team; the non-commissioned officer and each member to fire five shots and no more during the maneuver.....1st, 5; 2d, 3; 3d, 1.

Contest No. 14—

Teams of two men over wall 10 feet high. Same conditions and requirements as in Contest No. 13, except as to cartridges and firing, which will be omitted 1st, 5; 2d, 3; 3d, 1.

Contest No. 15—

Contestants start at scratch, with cartridge belt and five rounds blank ammunition; run to pieces 50 yards distant, with bolts taken out and apart; sit down, assemble bolt, insert in piece and retire to scratch, halting every ten yards and firing one shot to front in prone position; last shot to be fired at scratch.....1st, 5; 2d, 3; 3d, 1.

OBSTACLE RACE.

Contest No. 16—

100 yards. Between contestants in light marching order, over three obstacles, located at 25, 50 and 75 yards, respectively, from scratch; contestants to go over every obstacle, and halt at mark 25 yards from last one, in position of soldier at "order arms," equipments and clothing in order for inspection. Obstacles: Board fence five feet high, three horizontal rails; picket fence six feet high, 4-inch pickets, pointed at top and 2 inches apart; and solid fence of vertical boards 5 feet high. Smooth side of all fences to face contestants 1st, 5; 2d, 3; 3d, 1.

SHELTER TENT AND EQUIPMENT RACE.

Contest No. 17—

Two men armed with rifles loaded with blank cartridges in each tent, pitched; blankets spread under them; hats, blouses, leggins, belts and side-arms off. At signal rise, put on clothing, leggins and belt; strike tent; roll blankets in shelter half and make blanket roll, run 10 yards to mark and fire five blank rounds as signal of completion 1st, 5; 2d, 3; 3d, 1.

FIELD ARTILLERY.

Contest No. 18—

Spare wheel race. Each man to roll a spare, light artillery wheel 100 yards.....1st, 5; 2d, 3; 3d, 1.

Contest No. 19—

Gun detachment contest. Each detachment to consist of gunner and seven cannoneers wearing equipments and posted as prescribed by drill regulations (Paragraphs 85 and 88) at piece limbered, without horses. At signal, unlimber, fire one blank cartridge, dismount piece and carriage, laying wheels and carriage on ground, mount piece, fire another cartridge, limber up and resume positions occupied before beginning of contest. Cartridges may be carried by No. 2..1st, 10; 2d, 5; 3d, 3.

Contest No. 20—

Section contest. Each section to consist of a chief of section, caisson corporal, gunner, four drivers and seven cannoneers. Four-horse teams. Horses on ground line, 100 yards from firing line; harness on poles of pieces, packed ten yards in rear of ground line. At signal, harness, hitch, advance and come into action "in battery" on firing line, fire one shot, then change piece wheel with spare wheel, fire to the rear one shot, limber up and return across picket line,

counter-march and halt with heads of lead team of piece at picket line. First team thus reaching line, after complying with all other conditions, to win contest.

TUG OF WAR.

Contest No. 21—

Tug of war between teams representing the three regiments of infantry and artillery battalion. A. A. U. Rules to govern.

AUGUST 10, 2 P. M. TO 5 P. M.

Contest No. 22—

Baseball game—Infantry vs. Artillery.

NOTES.

In each contest each regiment of infantry and the artillery battalion will be entitled to an equal representation, either in number of teams or of individuals, the number of entries to be decided by the committee in charge.

Names of winners will be published in order. Badges, prizes, medals, and trophies to be contested for may be procured by voluntary contributions from the various organizations or members of the National Guard.

In the conduct of this and other contests, methods and means will be employed which will arouse emulation, friendly rivalry and a general interest in performing functions pertaining to legitimate military duties which will result in some benefit to all men of each organization. Officers are invited to submit suggestions for improvements in the specification of events.

Track rules in detail will be published later.

By command of Maj.-Gen. McKee.

F. W. FRANK,

Lieut.-Col., Asst. Adj.-General.

Note.—Payment of the several cash prizes and providing of trophies, medals, etc., is conditional upon raising of the necessary funds by means yet to be devised, but it is hoped, for the credit of the service, that great interest will be taken in the several events, irrespective of personal reward.

REPORT No. 22. APPENDIX "O."

HEADQUARTERS INDIANA NATIONAL GUARD,
CAMP OF INSTRUCTION, FORT BENJ. HARRISON,
NEAR INDIANAPOLIS, Aug. 4, 1905.

No. 6285.

MEMORANDUM CIRCULAR.

The following committee on Field Day has been appointed on the recommendation of the respective commanding officers of the infantry regiments, and the artillery battalion:

Lieut.-Col. Alfred B. Schanz, A. A. A. G., ex officio chairman.

Lieut.-Col. Theodore J. Loudon, 1st Infantry.

Lieut. John M. Wallace, 2d Infantry.

Capt. Wm. G. Everson, 3d Infantry.

First Lieut. Ernest H. Burford, Artillery Battalion.

And are authorized to make all appointments and arrangements in connection with the Military Athletic Competition scheduled for Thursday, August 10.

The Committee on Field Day has determined upon the following representation of each organization (Infantry, Regiment or Artillery Battalion) for each of the events of the Military Athletic Competition scheduled for Thursday, August 10, 1905:

- Contest No. 1—1 Team to each organization.
- Contest No. 2—1 Team to each organization.
- Contest No. 3—3 Teams to each organization.
- Contest No. 4—1 Team to each organization.
- Contest No. 5—1 Team to each organization.
- Contest No. 6—3 Teams to each organization.
- Contest No. 7—3 Contestants to each organization.
- Contest No. 8—3 Contestants to each organization.
- Contest No. 9—3 Contestants to each organization.
- Contest No. 10—1 Team to each organization.
- Contest No. 11—3 Contestants to each organization.
- Contest No. 12—3 Contestants to each organization.
- Contest No. 13—1 Team to each organization.
- Contest No. 14—3 Teams to each organization.
- Contest No. 15—3 Contestants to each organization.
- Contest No. 16—3 Contestants to each organization.
- Contest No. 17—3 Teams to each organization.
- Contest No. 18—1 Contestant to each Battery.
- Contest No. 19—Scratched.
- Contest No. 20—1 Section to each Battery.
- Contest No. 21—1 Team to each organization.
- Contest No. 22—1 Team to Infantry and 1 to Artillery.

Number of men constituting teams are defined in Circular No. 2, 1905.

Contests 18 and 20 are for Artillery only and points will not be counted in organization scores. In contests 11 and 12 add the words "or revolver" after the word "rifle," the substitution of the revolver being permitted to contestants from the Artillery Battalion. In all other contests primarily designed for infantry contestants from the artillery will be armed as infantry.

In all cases where three contestants or teams are allotted to a Regiment or the Artillery Battalion, one contestant or team will be taken from each battalion or battery, respectively, so that sub-divisions may be adequately represented.

All entries for the above events must be sent in before 6.00 p. m., Monday, August 7, to the Secretary Field Day Committee, Division Headquarters. Entries must come through Regimental (Artillery Battalion) Headquarters, and must be authenticated. The proper names will be given with special care, as also companies or batteries to which contestants belong.

No entries will be received after date mentioned. Each Regiment and

Artillery Battalion is expected to make complete entries as per schedule.

One or more Sibley tents will be assigned to each Regiment of Infantry within a day or two, to permit of team practice in tent pitching under the Tent Pitching Manual.

Further details will be published as developed.

By command of Major-General McKee.

ALFRED B. SCHANZ,

Lieut.-Col. and Insp.-Gen.

A. A. A. G.

REPORT No. 22. APPENDIX "p."

HEADQUARTERS INDIANA NATIONAL GUARD,
CAMP OF INSTRUCTION, FORT BENJ. HARRISON,
NEAR INDIANAPOLIS, August 9, 1905.

No. 6351.

MEMORANDUM CIRCULAR. EXTRACT.

TRACK RULES.

The following rules govern the Field Day events:

The contests will occur in the following order: Nos. 1, 4, 2, 5, 3, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 20 and 21.

No one will be allowed on the field proper except members of the committee and the Field Day Officers.

All contestants must be on the field at 8.00 o'clock a. m., August 10, 1905.

All contestants must have been on military duty since August 6, 1905.

All contestants must wear marching shoes (no cleats), Khaki uniform without blouse, except in Contest Nos. 7 and 10.

Rules for separate contests:

Contests 1, 4, 2, 5, 3, 6, will be conducted in accordance with the Tent Pitching Manual, U. S. Drill Regulations.

Contest No. 1. Each team must bring their own tent complete, two axes and required number of stakes. All teams contest at same time.

Intervals between center poles to be 10 yards. Alignment to be north and south.

Contest No. 2. Same conditions as Contest No. 1.

Contest No. 3. No tools allowed.

Contest Nos. 4, 5, and 6, same as Nos. 1, 2, and 3, respectively.

Contest No. 7. Heavy marching order as defined. Equipment of contestants to be equivalent in weight. Carbine and pistol to be considered equivalent to infantry arms.

Contest No. 8. Without arms or equipment.

Contest No. 9. As described in Circular No. 2, 1905, Hdqrs. I. N. G.

Contest Nos. 13, 14, 15, 16, 17, 18, 20, as described in Circular No. 2, 1905, Hdqrs. I. N. G.

Contest No. 21. Each team to be composed of five men. To be two heats, the two winners to contest for first and second place; the two losers to contest for third place.

The baseball game between artillery and Infantry will be played on the diamond south of the 2d Infantry, and will be called at 4.00 p. m., August 10, 1905.

By command of Major-General McKee.

By bill Tom Ramsey, umpire baseball game.....	10 00	
By postage.....	05	\$400 00

It is regretted that the names of individual members of the several winning teams were not obtained, and Regimental Commanders will see that the proper contestants get due credit for their efforts.

To the "Committee in Charge," and to the several officers officiating in the events, the Commanding General desires to extend his thanks and those of the entire command for their efforts in making a success of the first attempt of a "Field Day" under adverse conditions.

It is the desire and intention to make this the forerunner of other days at Annual Camps, and it is hoped that Company Commanders will devote considerable time to Military Athletics at home stations with the idea of being better prepared for taking part in greater numbers in any future events of a similar nature.

The presentation to the individuals of the several medals, and to teams of the trophies, should be made a matter of some public ceremony in order to make them the more prized and to impress upon all an appreciation of their efforts.

Regimental Commanders and the Commanding Officer Artillery Battalion will publish in orders, names of individual contestants comprising winning teams not given herein.

By command of Major-General McKee.

F. W. FRANK,
Lieut.-Col. and A. A. G.

REPORT No. 23.

ROOM 57, STATE HOUSE,
INDIANAPOLIS, January 1, 1906.

Report of Acting Inspector-General Charles Shaler, Brig.-Gen., U. S. A., Ret., on the Encampment of Indiana National Guard, Fort Benjamin Harrison, Aug. 2 to Aug 11, 1905.

(Extract.)

To the Major-General Commanding Division of the Indiana National Guard:

ATHLETIC CONTESTS.

Sir—These took place August 10, and (considering that it was a first effort) were successful. The principal defect was in the details.

First. When an exercise is to take place, such as pitching tents, the schedule should refer to the paragraph of drill regulations which should govern.

For example, "Contest 2" called for "pitching wall tents." One of the parties brought not a wall tent, but a common tent, and although the work was promptly and well done this team had to be ruled out. Again, there is a difference between a wall tent and a wall tent *complete*, as in the latter case the fly must also be added.

I would suggest that in a similar future contest the direction should read "Pitching wall tent complete. Inf. Drill Regulations 575, 583." And this in all cases where a regulation prescribes material and method.

Contest 10, Relay Race. Considerable delay was occasioned because the letters that were to be carried by the participants were not prepared until the runners reported for the exercise.

Contest 11. Cartridges were placed at intervals, and were to be brought one at a time to the rifle laid on the ground at the initial point, and the last cartridge was to be fired.

In this case the cartridges were not placed until the competitors had taken their places.

Contest 20. Harness, hitch and advance, etc., for artillery.

Here it was not prescribed as to whether the drivers or the cannoners were to hitch. A reference to the proper paragraph of drill regulations would have prevented confusion. In general, it would seem that improvement would result if the following requirements were made:

- 1st. Appoint a Regimental and an Artillery Battalion Athletic Officer.
- 2d. Sound a call at camp to assemble teams.
- 3d. As soon as formed, have each team inspected by Athletic Officer, who must see that each man is properly equipped; that each team has the proper material.
- 4th. Appoint an officer in charge of the course to whom each Athletic Officer shall report with his teams or men.
- 5th. Have this officer inspect teams and men rapidly, and rule out at once those not properly supplied or equipped, and waste no time in allowing them to correct defects.
- 6th. Have Athletic Officers assemble the men who are to take part

in any contest, before the completion of the preceding contest, so that they may move up the moment the preceding contest is finished. Rule out any participants who are not on the ground ready for work within three minutes after the signal to appear on the course is given, and be ruthless in carrying out this rule.

7th. Megaphone communication can not be relied on entirely. It should be supplemented by a bulletin board displaying large figures indicating that "Next Contest is No. ———."

8th. A bugle call should indicate the completion of a contest, and should be followed as soon as practicable by another call for the teams to report, these signals to be given by direction of the officer in charge, who should be accompanied by the bugler. Of course a system of whistles would be equally effective if a bugler is not to be had. A long whistle to indicate completion of a contest. Several short whistles to call the next contestants.

There was confusion at the side lines and end lines which was modified to a very limited extent by placing sentinels on the east side of the grounds where the largest crowd assembled, but the arrangement was not at all good.

This should be corrected by detailing a picket guard to surround the whole field, ends as well as sides, and putting an officer, a lieutenant, in charge of each line. Further, an officer of higher rank should have charge of the lieutenants and the pickets under them. He should proceed to any point where his service is required. The pickets who were posted made some effort to restrain the crowd, but in some cases their efforts were futile; in others they were rude and boisterous to such an extent that they had to be restrained. An officer seeing that the people intruded upon the limits could promptly proceed to such a point and with a few brief words of authority courteously delivered restrain the pressure, while the officer in general charge could reinforce the line when needed.

I repeat that the picket line should be, not only at the sides where the public assembles, but at the ends where the participants approach, as the latter, at times excited and insistent, need restraint.

These suggestions are, and are intended to be merely *indications* of what should be done, and are not to be taken as anything more. The formulation of rules requires careful consideration, and should be the subject of detailed examination, and then be embodied in proper form.

The strictest instruction should be given as to the use of the rifle in the exercises.

In one team it was supported at the breech and muzzle; when a wall was to be scaled, the scaler jumped on it and was lifted. In another case it was thrown over hurdles and picked up afterward. Such treatment of a rather delicate weapon should be prohibited.

In concluding this subject of athletics, I wish to say that it is of great advantage in that it brings the participants together in manly competition. The exercises, when properly arranged, are of such a nature that the participants are training themselves as soldiers, and they are a welcome relief from the otherwise hard work of an encampment (where, as in the Indiana National Guard, there is a good deal of stress from the duties imposed).

ADJUTANT-GENERAL'S REPORT 1906.

STATE OF INDIANA; ADJUTANT-GENERAL'S OFFICE,

February 1, 1907.

Hon. J. Frank Hanly, Governor of Indiana:

Sir—I have the honor to submit the following report of the condition and strength of the military forces of this State for the year ending December 31, 1906.

ORGANIZATION INDIANA NATIONAL GUARD.

Commander-in-Chief—Honorable J. Frank Hanly, Governor.
General Headquarters—Indianapolis.
Adjutant-General—Brigadier-General Oran Perry.
Address—Indianapolis.

Artillery—1 battalion of 2 light batteries.

Infantry—2 regiments of 12 companies; 1 regiment of 11 companies each.

Hospital Corps.

Signal Corps.

Major-General Will J. McKee, Commanding.

Address—Indianapolis.

Total strength, 2,083.

Artillery Battalion (2 light batteries)—

Headquarters	Rockville.
Battery A	Indianapolis.
Battery B	Fort Wayne.

First Infantry (12 companies)—

Headquarters	Vincennes.
Band	Vincennes.

First Battalion—

Headquarters	Evansville.
Company E	Evansville.
Company D	Spencer.
Company H	Bloomington.
Company K	Martinsville.

Second Battalion—

Headquarters	New Albany.
Company C	New Albany.
Company F	Madison.
Company L	Mount Vernon.
Company M	Jeffersonville.

Third Battalion—

Headquarters	Vincennes.
Company A	Vincennes.
Company B	Terre Haute.
Company G	Goshen.
Company I	Washington.

Second Infantry (11 companies)—

Headquarters	Indianapolis.
Band	Auburn.

First Battalion—

Headquarters	Indianapolis.
Company A	Indianapolis.
Company C	Indianapolis.
Company D	Indianapolis.
Company H	Indianapolis.

Second Battalion—

Headquarters	Martinsville.
Company B	Crawfordsville.
Company F	Winchester.
Company G	Bluffton.
Company I	Kokomo.

Third Battalion—

Headquarters	Franklin.
Company E	Franklin.
Company K	
Company L	Lebanon.
Company M	Greenfield.

Third Infantry (12 companies)—

Headquarters	Greenfield.
Band	Peru.

First Battalion—

Headquarters	South Bend.
Company E	Elkhart.
Company F	South Bend.
Company H	Warsaw.
Company I	Plymouth.

Second Battalion—

Headquarters	Auburn.
Company B	Angola.
Company C	Monticello.
Company D	Fort Wayne.
Company K	Auburn.

Third Battalion—

Headquarters	Columbia City.
Company A	Marion.

Company G	Columbia City.
Company L	Peru.
Company M	Rensselaer.
Hospital Corps	Indianapolis.
Signal Corps	Indianapolis.

The Act of Congress, approved January 21, 1903, requiring the organized militia to be armed, equipped and disciplined the same as the Regular Army, has been complied with, and the Indiana National Guard is ready to take the field at once in State or National defense.

COMPANIES MUSTERED INTO SERVICE 1906.

Company M, 1st Infy., Cap. John R. Van Liew, Jeffersonville.
 Company I, 1st Infy., Capt. Hugh G. Faith, Washington.
 Company C, 3d Infy., Capt. Arthur H. Brown, Monticello.
 Company L, 3d Infy., Capt. Ernest S. Phillips, Peru.
 Company L, 1st Infy., Capt. Winston Menzies, Mount Vernon.

COMPANIES MUSTERED OUT OF SERVICE 1906.

Jan. 8. Company M, 1st Infy., stationed at Portland.
 Mar. 9. Battery C, 1st Arty., stationed at Lafayette.
 Mar. 9. Company L, 3d Infy., stationed at Delphi.
 July 9. Company L, 1st Infy., stationed at Connersville.
 Oct. 9. 1st Sec. Signal Corps., stationed at Warsaw.
 Oct. 31. Company K, 2d Infy., stationed at Logansport.

RESIGNATIONS AND COMMISSIONS OF OFFICERS.

During the year thirty-four officers have resigned and ninety-two have been commissioned.

CAMP OF INSTRUCTION.

In compliance with General Orders No. 110, War Department, June 10, 1906, a camp of instruction was established at Fort Benjamin Harrison, beginning August 1st and ending September 25th, at which the following troops of the Regular Army were assembled under the command of Brigadier-General W. W. Carter:

Fourth Infantry—Headquarters and two battalions.
 Twenty-eighth Infantry—Headquarters and ten companies.
 Twenty-seventh Infantry—Headquarters and twelve companies.
 Second Cavalry—One squadron.

Fourteenth Battery Field Artillery.
 Twenty-first Battery Field Artillery.
 Signal Corps—One company.
 Hospital Corps—One company.

Encamped with above troops were the following named organizations of the National Guard:

Michigan Brigade—August 3d to August 12th.
 Indiana Brigade—August 11th to August 21st.
 Second Illinois Infantry—August 20th to August 26th.
 Second Wisconsin Infantry—September 9th to September 16th.

The mobilization of the Indiana National Guard was promptly accomplished in accordance with the concentration schedule published in Circular No. 7, and printed elsewhere in this volume.

This was in all respects the best school of instruction in which the Indiana National Guard has participated, the details of which are embodied in the report of the Commanding General.

TARGET PRACTICE.

Rifle practice on the range was more general this year than last and resulted in the selection of a team for the Sea Girt annual match, which made a very material improvement over the record of the 1905 team.

The result is recorded in General Orders No. 12, printed under head of General Orders and Circulars.

Much profitable time was spent in gallery practice during the winter of 1905-6 by the various organizations under the efficient direction of Major D. I. McCormick, Instructor in Rifle Practice. The use of the Sub-Target Machine Gun proved to be a valuable aid in the matter of position and sighting, as well as an economy in ammunition.

For the gallery season of 1906-7, November 1st to April 30th, a handsome sterling silver loving cup has been offered by the Indianapolis Star as a trophy to the company making the best figure of merit during the season, see General Order No. 14.

To facilitate the shooting a second Winder gun has been issued to each company, which will economize time and allow the men to shoot in pairs.

RIFLE RANGES.

The Act of Congress, approved June 22d, 1906, amended and re-enacted Section 1661 Revised Statutes, as follows:

Section 1. That the sum of two million dollars is hereby annually appropriated, to be paid out of any money in the treasury, not otherwise appropriated, for the purpose of providing arms, ordnance stores, quartermaster stores and camp equipment for issue to the militia, such appropriation to remain available until expended.

Section 2. That said appropriation shall be apportioned among the several States and Territories, under direction of the Secretary of War, according to the number of Senators and Representatives to which each State is entitled in the Congress of the United States. * * * * Provided, that the sums so appropriated * * * * shall be available for the purposes named in Section 14, Act of January 21, 1903, for the actual excess of expenses of travel in making the inspections therein provided for, over the allowances made for same by law; for the promotion of rifle practice, including the acquisition, construction, maintenance and equipment of shooting galleries and suitable target ranges, etc.

Under this apportionment \$59,843.10 is allotted to Indiana, of which sum \$14,966.77 is set aside as a minimum to be expended in rifle practice alone, as explained in the following note:

Under the requirements of paragraph 5, above, the amounts in this column (Promotion of Rifle Practice) are set aside for promotion of rifle practice, as provided in said Act, and must be entirely devoted to that purpose; any balances thereof on June 30, 1907, will be carried forward to the next fiscal year for application to the same object.

These amounts constitute the minimum limits of expenditure for the promotion of rifle practice required by the Department, but it should be expressly understood that no maximum limitation of amount has been fixed, the Governors of States have discretionary authority to expend for this purpose in excess of such minimum requirements out of the balance of the allotment to the State, as in their judgment may be deemed proper.

Complying with your request that prompt action be taken to place this State in position to avail itself of the allotment set aside for target practice, the following order was issued appointing a board of officers to investigate and make recommendations:

STATE OF INDIANA,
ADJUTANT-GENERAL'S OFFICE,
INDIANAPOLIS, IND., September 17, 1906.

SPECIAL ORDER,
No. 78.

Major Charles A. Garrard, Ordnance Officer; Major D. I. McCormick, Instructor Rifle Practice; Lieut. Herbert W. McBride, Co. D, 2d Infy., are

14—Adjutant-General.

appointed a committee to make suggestions, through channel, as to best method by which the late law of Congress, relating to the establishment and maintenance of rifle ranges, may be put into effect.

By order of the Governor.

ORAN PERRY,
Adjutant-General.

The following is their report:

INDIANAPOLIS, IND., September 27, 1906.

To the Adjutant-General of the State of Indiana:

Sir—In compliance with Special Order No. 78, A. G. O. (Sept 17, 1906), your board appointed to make suggestions, through channel, as to the best method by which the late law of Congress relating to the establishment and maintenance of rifle ranges may be put into effect, begs leave to submit the following report:

It is the opinion of the board that, where suitable ground can be procured, company ranges should be established as near home stations as possible. It is suggested that where only one company has the use of the range, one rectangular target will be sufficient for the present, but as the companies become more proficient it may become necessary to increase this to two. Where company is provided with a range and the ground is suitable, it should be furnished with not less than four of each of the skirmish figures D and E, which compose the group for skirmish firing. Proficiency in skirmishing is the most important of all the accomplishments in shooting. Where it is not possible to procure a range for a company near its station, it is suggested that a range be constructed at the most convenient point for any number of companies. Where ranges are constructed in a locality not convenient of access and the means of reaching the range involves the expenditure of money, it is suggested that arrangements be made for transportation without cost to the individual.

TARGETS.

It is suggested that such targets as the Quartermaster's Department now has on hand including both Brinton and Laidly targets be issued to the companies as fast as ranges can be prepared.

In reference to the purchase of new targets, it is recommended that future purchases be confined to the Aiken steel frame target because of its durability, cheapness and the fact that by changing temporary frames, it can be used for the short, middle and long ranges. These targets can be purchased for \$47.50 each, in lots of 15 to 20. The temporary frames for short and middle ranges cost \$2.50 per set; the temporary frames for long range cost \$3.00, or \$6.00 for two sets. Inasmuch as this target is constructed entirely from steel there is nothing to get out of repair. It is economical in that it does not require so much space for the frames as does the long range wood frame, and where the range will permit, a thousand-yard target can be had on any part thereof by simply attaching a long range frame.

With reference to company ranges, it is suggested that for a one and two target range not less than 50 feet in width be procured; for four targets,

not less than 100 feet in width, and where more than two targets are placed on a range numbers be placed in rear of each target in order to avoid confusion. Wherever possible ranges should be 1,000 yards long, and where two or more companies are located within reasonable distance of each other, and a range central to them can be located, which is 1,000 and not less than 500 yards long, the nearby companies should be transported to this range rather than short ranges be constructed, for the following reason:

Qualification for any of the classes prescribed in the firing regulations can not be made at a shorter range than 500 yards, and the shooter who is confined to the short range where he can not classify has no incentive to efficiency.

It is suggested that an order or circular letter be issued from the Adjutant-General's Office to company commanders requesting the following information relative to the location of ranges near their stations:

LIST OF QUESTIONS.

1. Field sketch showing proposed range, location of residences and other buildings near by. If there are any buildings in rear of range, what is the direction from the targets?
2. Are there any highways near the range, and if so, where located?
3. What distance is the proposed range from your armory?
4. Not less than 50 feet by 1,000 yards is desired for one and two target range where it is possible to procure it.
5. Be particular to give the nature of the ground in rear of targets.
6. Owner's name, name of tenant, if any.
7. The probable cost for one year lease with the privilege of leasing from year to year.
8. Will the target set north, south, east or west from firing point?
9. What are the means of transportation?

It is important that information with reference to the location of ranges be had at an early date in order that the location may be inspected by an officer of experience able to recommend or reject the selections. Attention is called to the importance of securing leases on land for this purpose if possible before arrangements are made by owner or tenant for planting the spring crop.

CONSTRUCTION OF RANGES.

It is not deemed practicable to construct concrete or stone supporting walls for earthwork on what might prove to be temporary company ranges. A retaining wall built of two-inch boards and supported by six-inch posts, all to be well coated with pitch, is recommended. Wood carefully treated in this manner will last several years and will answer all the purposes that expensive walls would. A pit for one mid-range target with a shelter house 6x10 feet square and the height of the target in which to shelter target supplies must be about 25x6 feet. The entire pit should be roofed over in order to shed the water, which in many places it may be found impossible to drain, and in case of storms while the company is using the range the pit would fill up with water and cause delay unless this were done. In the construction of this pit a four-foot excavation is contemplated.

The depth of the pit, depends somewhat on the conformation of the ground. An itemized statement of probable cost of material and construction is herewith furnished.

TWO MID-RANGE TARGETS.

(36 ft. pit.)

2 in. lumber for walls.....	1,124 ft. @ \$25.00 per M,	\$28 10
9 6"x6"x14' supports for walls.....	378 "	9 45
5 4"x4"x12' floor beams.....	75 "	1 87
5 4"x4"x14' posts for shelterhouse.....	93 "	2 32
4"x36" floor slats.....	144 "	3 60
3 2"x4"x12' strips support roof.....	24 "	60
3 2"x4"x10' shelterhouse.....	20 "	50
1"x10"x7' roofing.....	252 "	6 40
	2,110	\$52 84

Rubberized tar paper.....	\$5 00
Pitch for protecting wood.....	5 00
Earth work, 63 yards.....	18 90
Labor.....	15 00
Target.....	50 00
	\$146 74

ONE MID-RANGE TARGET.

(25 ft. pit.)

2 in. lumber for walls.....	996 ft. @ \$25.00 per M,	\$24 90
6 6"x6"x14' supports for walls.....	252 "	6 30
3 4"x4"x12' floor beams.....	45 "	1 12
3 4"x4"x14' roof supports.....	56 "	1 40
4"x25' floor slats.....	100 "	2 50
5 2"x4"x10' shelterhouse.....	54 "	1 35
1"x10"x7' roofing.....	175 "	4 37
	1,678	\$41 94

Rubberized tar paper.....	\$4 00
Pitch for protecting wood.....	4 00
Labor.....	15 00
Earth work, 45 yards.....	13 50
Target.....	50 00
	\$138 44

Two mid-range targets will require a pit about 36 feet long and 6 feet wide, with a shelter house the same as the one indicated above. For the cost of construction see itemized statement hereinbefore submitted.

Where a thousand-yard range can be had and only one target is required, it is suggested that the Aiken steel frame be furnished as it is the most economical and can be used for the shorter ranges. A pit 28x6 ft. will be required for this target, also a shelter house 8x14 ft. The cost will be but little more than the 25 ft. pit.

The estimates furnished herewith with reference to the cost of constructing ranges described, are considered the maximum, and we are confident that in some instances the cost will be considerably less than the figures given.

CENTRAL RANGE.

The importance of establishing a central range should not be overlooked. Competition between organizations is the incentive which leads to higher accomplishments with the rifle. And in order that all the organizations of the Indiana National Guard may have an opportunity to meet and compete with each other, it is necessary that a central range should be

established, located in such part of the State as will be easy of access to all the companies. It is respectfully suggested that as Indianapolis is easy of such access to all the companies, and is more nearly central to all the organizations, one large central range be located as near the city as circumstances will permit. This range should be located with a view to its permanency, that is to say, that such care should be exercised in selecting the location as will insure the State's occupancy for a number of years. It is suggested for consideration that a lease of not less than five to ten years should be taken on this central range with the privilege of extending the lease, provided the location is such that complications are not likely to arise which will destroy its usefulness in the future. In order to avoid its impairment, the ground in the rear of the targets for a greater or lesser distance, depending on its conformation, should be controlled by the lease. The range should be so located that there will not be any hindrance to extending the range to one or both sides if it is desired.

In view of the constantly increasing values of real estate, and particularly such as would be found suitable for a range in this part of the State, the matter of leasing with a view of purchasing should be considered, and in purchasing care should be used in regard to the purchase price, to the end that if it should become necessary to sell this land at some future time, it may be sold at an increase.

The importance of locating and establishing this range at once should not be overlooked. In the years of 1905 and 1906, Indiana sent teams to the national competition at Sea Girt, N. J. These teams entered into the competition with practically no training as teams. Competition for a place on these teams is a great incentive to the guardsmen. To be able to win prizes in the national competition is the goal aimed at, and no effort should be spared to contribute everything within reason to prepare our guardsmen for a place as winners in these contests. Unless some suitable place is prepared before another season rolls around it will be impossible to give a team any training as such and all will agree that they must have a thorough training before entering these competitions if Indiana expects to stand near the head in the list of States. There are fifteen organizations of the National Guard located within fifty miles of Indianapolis, seven of them in the city, more than one-third of all of the organizations of the Guard. The railroads and traction lines extending in every direction make Indianapolis easy of access where battalion, regimental and State teams can come for practice and competition.

(Signed) CHAS. A. GARRARD,

Maj. of Ord. and I. S. A. P., I. N. G.

D. I. McCORMICK,

Maj. I. N. G., Ret., Inst. S. A. P.

H. W. McBRIDE,

First Lieut. 2d Infty., I. N. G.

(Through channel.)

Following the suggestion of the board, a number of locations were visited by Major McCormick, two of which have been surveyed by the Engineer Corps, one of which was dis-

approved by the War Department and the map of the other is not yet completed.

GENERAL ORDERS.

Below is inserted the General Orders issued from this office during the year:

STATE OF INDIANA,
ADJUTANT-GENERAL'S OFFICE,
INDIANAPOLIS, IND., January 6, 1906.

GENERAL ORDER, No. 1.

The annual inspection of the Indiana National Guard by officers of the U. S. A. will probably be about April 2d, 1906, and commanding officers are hereby directed to place their companies in the best possible condition and with the least delay.

Khaki clothing, haversacks and leggins should be laundered, and the rest of the property be given a thorough overhauling with a view to condemnation of all that is unserviceable and making requisition for new supplies to replace it.

Commanding officers will report compliance with this order, through channel, not later than February 1st, together with list of property to be submitted to Board of Officers for condemnation.

For this purpose the following Board is appointed, who will visit all stations where the amount of property to be condemned will justify the expense.

Brig.-Gen. Samuel M. Compton, Retired.

Maj. W. H. Kershner, Division Staff.

Travel is enjoined.

By order of the Governor.

ORAN PERRY,
Adjutant-General.

STATE OF INDIANA,
ADJUTANT-GENERAL'S OFFICE,
INDIANAPOLIS, INDIANA, Jan. 8, 1906.

GENERAL ORDER, No. 2.

The accompanying table of the price of ordnance and ordnance stores, clothing and equipage is published for the information and guidance of all concerned.

2. A table showing existing relations between the commercial sizes of clothing and those furnished by the Quartermaster's Department is also published, for the information of officers making requisitions.

3. Cleaning rods will be carried on the semi-annual return under the two headings "Cleaning rods, sec. 1," and "Cleaning rods, secs. 2 and 3." Each command was issued a complete cleaning rod with each gun, and by referring to the original invoice, the number to be accounted for may be

ascertained. The number under each of the above two headings must be exactly the same.

4. Hereafter each command must account for C. O. sabres, sabre scabbards, and chamois skin cases under the three separate headings.

5. Requisitions must be sent in so that they may reach the Quartermaster-General, through the channel, at least thirty days before the property is needed. No more property will be issued to any command until the Quartermaster-General has received requisition approved by the channel.

6. Each command is ordered to bring the equipment up to the number of 60, and should never, through loss or otherwise, fall below that number.

7. Where a shortage is reported by the inspecting officer on his April tour, the time before the next inspection is sufficient to enable the accountable officer to satisfactorily account for same by either recovery of the property or affidavit. The books of the Department are closed in November, and any shortage shown at that time must be settled for with the War Department and the State Treasurer, and after that settlement is made, no reimbursement can be made. Therefore, it is absolutely necessary for each commanding officer to see that the April shortage is properly accounted for in his October return, and that there is NO SHORTAGE at the October inspection.

Hereafter all clothing of enlisted men will be carried as U. S. Q. M. supplies except caps and cap ornaments, which are State property.

Ordnance and Ordnance Stores are all U. S. except the Winder Musket.

All officers' clothing is State property.

By order of the Governor.

ORAN PERRY,
Adjutant-General.

Statement of the Prices at which Ordnance and Ordnance Stores, Clothing and Equipage will be charged to individual accounts for loss or damage.

	PRICE.
Arm chests	\$6 50
Axes and helms	60

STATE OF INDIANA,
 ADJUTANT-GENERAL'S OFFICE.
 INDIANAPOLIS, IND., January 15, 1906.

GENERAL ORDER,

No. 3.

The following amendments to paragraphs 383 and 441 of the United States Army Regulations, 1904, with the necessary changes for the guidance of the militia, are published for the information and guidance of all concerned, and the requirements of the Drill Regulations will be modified accordingly:

"Whenever 'The Star-Spangled Banner' is played by the band on a formal occasion at a military station, or at any place where persons belonging to the military service are present in their official capacity, all officers and enlisted men present will stand at attention, and if not in the ranks will 'salute with the right hand,' the position of the salute being retained until the last note of 'The Star-Spangled Banner.' If not in ranks and armed, the rifle salute or sabre salute will be used. If in ranks, the commanding officer only will salute. The same respect will be observed toward the national air of any other country when it is played as a compliment to official representatives of such country. Whenever 'The Star-Spangled Banner' is played, as contemplated by this paragraph, the air will be played through once without the repetition of any part, except such repetition as is called for by the musical score.

"At every military post or station the flag will be hoisted at the sounding of the first note of the reveille, or of the first note of the march, if a march be played before the reveille. The flag will be lowered at the sounding of the last note of the retreat, and while the flag is being lowered the band will play 'The Star-Spangled Banner,' or, if there be no band present, the field music will sound 'To the Color.' When 'To the Color' is sounded by the field music while the flag is being lowered the same respect will be observed as when 'The Star-Spangled Banner' is played by the band. The national flag shall be displayed at a seacoast or lake fort at the commencement of an action and during a battle in which the fort may be engaged, whether by day or night."

By order of the Governor.

ORAN PERRY,
 Adjutant-General.

STATE OF INDIANA,
 ADJUTANT-GENERAL'S OFFICE,
 INDIANAPOLIS, INDIANA, March 1, 1906.

GENERAL ORDER,

No. 4.

1. The inspection of the organized militia of the State of Indiana for the year 1906 by officers of the regular army, under the provisions of Section 14 of the Militia Act of 1903, will take place as scheduled below:

ITINERARY OF CAPT. F. W. SMITH, 4TH U. S. INFANTRY.

Monday, April 2d, Terre Haute—

Co. B, 1st Infantry, Capt. Alvin W. Dudley.

Hospital Corps Detachment, Sergt. R. C. McCloskey.

Tuesday, April 3d, Crawfordsville—

Co. B, 2d Infantry, Capt. R. P. Youngman.

Wednesday, April 4th, Rensselaer—

Co. M, 3d Infantry, Capt. G. H. Healey.

Thursday, April 5th, Delphi—

Co. L, 3d Infantry, Lieut. J. C. Reynolds.

Friday, April 6th, Logansport—

Co. K, 2d Infantry, Capt. Leroy Fitch.

Saturday, April 7th, Plymouth—

Co. I, 3d Infantry, Capt. C. F. Holtzendorff.

Monday, April 9th, South Bend—

Co. F, 3d Infantry, Capt. H. E. Faulkner.

Hdqrs. 1st Batt., 3d Infantry, Maj. G. W. Freyermuth.

Tuesday, April 10th, Elkhart—

Co. E, 3d Infantry, Capt. G. C. Grolle.

Wednesday, April 11th, Goshen—

Co. G, 1st Infantry, Capt. H. W. Pease.

Thursday, April 12th, Auburn—

Co. K, 3d Infantry, Capt. J. R. McDowell, Band 2d Infantry.

Hdqrs. 2d Batt., 3d Infantry, Maj. A. L. Kuhlman.

Friday, April 13th, Angola—

Co. B, 3d Infantry, Capt. H. L. Rockwood.

Saturday, April 14th, Ft. Wayne—

Co. D, 3d Infantry, Capt. J. L. Bireley.

Batty. B, Art. Battn., Capt. Harry Clark.

Monday, April 16th, Columbia City—

Co. G, 3d Infantry, Capt. S. N. Markley.

Hdqrs. 3d Batt., 3d Infantry, Maj. J. R. Harrison.

Tuesday, April 17th, Warsaw—

Co. H, 3d Infantry, Capt. O. B. Kilmer.

Signal Corps Detachment, Lieut. J. N. LeHew.

Wednesday, April 18th, Kokomo—

Co. I, 2d Infantry, Capt. L. R. Naftzger.

Thursday, April 19th, Peru—

Band 3d Infantry, Sergt. Clifton.

Friday, April 20th, Frankfort—

Hospital Corps Detachment, Sergt. A. G. Chittick.

Friday, April 20th, Lebanon—

Co. L, 2d Infantry, Capt. E. N. Caldwell.

ITINERARY OF CAPT. W. F. NESBITT, 4TH U. S. INFANTRY.

Monday, April 2d, Martinsville—

Co. K, 1st Infantry, Capt. W. E. Clark.

Tuesday, April 3d, Spencer—

Co. D, 1st Infantry, Capt. J. F. Robinson.

Hospital Corps Detachment, Sergt. R. R. Coble.

Wednesday, April 4th, Vincennes—

Co. A, 1st Infantry, Capt. U. G. Case, Band 1st Infantry.

Hdqrs. 1st Infantry, Col. George W. McCoy.

Hdqrs. 3d Batt., 1st Infantry, Maj. T. B. Coulter.

Thursday, April 5th, Evansville—

Co. E, 1st Infantry, Capt. W. D. Schreeder.

Hdqrs. 1st Batt., 1st Infantry, Maj. J. F. Blum.

Friday, April 6th, Jeffersonville—

Co. M, 1st Infantry, Capt. J. R. Van Liew.

Friday, April 6th, New Albany—

Co. C, 1st Infantry, Lieut. H. B. Austin.

Hdqrs. 2d Batt., 1st Infantry, Maj. W. J. Coleman.

Saturday, April 7th, Bloomington—

Co. H, 1st Infantry, Capt. W. M. Louden.

Monday, April 9th, Franklin—

Co. E, 2d Infantry, Capt. E. L. Middleton.

Tuesday, April 10th, Madison—

Co. E, 2d Infantry, Capt. A. E. Haigh.

Wednesday, April 11th, Indianapolis—

Co. A, 2d Infantry, Capt. F. H. Lexsow.

Co. C, 2d Infantry, Capt. T. C. Power.

Co. D, 2d Infantry, Capt. R. L. Moorhead.

Co. H, 2d Infantry, Capt. A. P. Smith.

Thursday, April 12th, Indianapolis—

Hospital Corps Detachment, Maj. E. F. Sommer.

Signal Corps Detachment, Lieut. Wallace Sherwood.

Friday, April 13th, Indianapolis—

Division Headquarters, Maj.-Gen. Will J. McKee.

Hdqrs. 2d Infantry, Col. H. B. Smith.

Hdqrs. 3d Infantry, Col. E. P. Thayer.

Hdqrs. 1st Batt., 2d Infantry, Maj. H. T. Conde.

Hdqrs. 2d Batt., 2d Infantry, Maj. E. F. Branch.

Hdqrs. 3d Batt., 2d Infantry, Maj. J. H. Tarlton.

Hdqrs. Art. Battn., Maj. F. E. Stevenson.

Batty. A, Art. Battn., Capt. R. H. Tyndall.

Saturday, April 14th, Connersville—

Co. L, 1st Infantry, Capt. Basil Middleton.

Monday, April 16th, Greenfield—

Co. M, 2d Infantry, Capt. Chas. A. Barnes, Jr.

Tuesday, April 17th, Winchester—

Co. F, 2d Infantry, Capt. W. O. Jericho.

Wednesday, April 18th, Bluffton—

Co. G, 2d Infantry, Capt. C. F. Brunn.

Thursday, April 19th, Marion—

Co. A, 3d Infantry, Capt. Pearl A. Bogue.

2. Infantry and artillery will appear in service and khaki uniform, in heavy marching order, blanket rolls made up in accordance with instructions in Par. 486, Revised Infantry Drill Regulations.

3. Division headquarters, regimental and battalion headquarters, non-commissioned staffs and band, and hospital and signal corps will parade in blue dress uniform.

4. The State semi-annual property inspection for pay will be made at the various armories upon the dates specified above, and for such service the following named officers are designated as Acting Assistant Inspectors-General:

Brig.-Gen. Samuel M. Compton, retired.

Capt. Guy A. Boyle, Aide-de-Camp, General Staff.

The travel and subsistence enjoined is necessary for the public service.
By order of the Governor.

ORAN PERRY,
Adjutant-General.

STATE OF INDIANA,
ADJUTANT-GENERAL'S OFFICE,
INDIANAPOLIS, March 16, 1906.

GENERAL ORDERS,
No. 5.

I. Major David I. McCormick, retired, is hereby relieved from duty as Ordnance Officer in connection with the Quartermaster-General's Department.

II. Major D. I. McCormick is hereby assigned to duty as Instructor of Rifle Practice and will report to the Adjutant-General for Instructions.
By order of the Governor.

ORAN PERRY,
Adjutant-General.

STATE OF INDIANA,
ADJUTANT-GENERAL'S OFFICE,
INDIANAPOLIS, March 29, 1906.

GENERAL ORDERS,
No. 6.

In the future a letter of resignation from an officer of the Indiana National Guard other than a Captain of a Company, must be accompanied by a receipt for the property used by him from the officer to whom he was accountable, or a certificate of non-indebtedness.

By order of the Governor.

ORAN PERRY,
Adjutant-General.

STATE OF INDIANA,
ADJUTANT-GENERAL'S OFFICE,
INDIANAPOLIS, April 13, 1906.

GENERAL ORDER,
No. 7.

I. Special Orders No. 12, 1904, revoking the commission of Captain H. M. Franklin, Company H, Second Infantry, are hereby rescinded, and the subject of this order is restored to the rank of Captain of Infantry to date from April 25th, 1904.

II. There being no vacancy to which Captain Franklin can be assigned, he is hereby transferred to the retired list.

Record of service—

Second Lieutenant, Second Infantry, July 9, 1900.

First Lieutenant, Second Infantry, November 30, 1900.

Captain, Second Infantry, November 13, 1901.

By order of the Governor.

ORAN PERRY,
Adjutant-General.

STATE OF INDIANA,
OFFICE OF ADJUTANT-GENERAL,
INDIANAPOLIS, April 13, 1906.

GENERAL ORDER,
No. 8.

I. The practice of this office of deducting shortages from the semi-annual pay rolls has been abandoned, and in the future full payment will be made immediately upon receipt of the pay rolls.

II. Deductions for shortage of property will be made by the commanding officers from the amount due the individual who lost the property, as contemplated in Section 56, Indiana Military Law. The amount thus collected will be forwarded to the Adjutant-General, together with a statement of items on Q. M. G. O. blank No. 13, a copy of which is enclosed.

III. The effect of this will be to hold the commanding officers to a stricter accountability than heretofore, and it will be to their interest to see that the provisions of Sections 30, 25, 23 and 56 are understood by their men.

IV. Pay rolls should carry the names of all men of the company; absentees should be accounted for, extensions should be carried out, columns footed, and the blank spaces of the first page of cover properly filled.

V. Within thirty days from the reception of the pay checks, commanding officers will report to the Adjutant-General, through channel, whether or not payment has been completed, and if any sum remains on hand, the statement must include the names of, the amount and the reasons why unpaid.

VI. Sergeant's roll books must be used at all roll calls and must be open to inspection of the enlisted men of the company at all times.

By order of the Governor.

ORAN PERRY,
Adjutant-General.

STATE OF INDIANA,
OFFICE OF ADJUTANT-GENERAL,
INDIANAPOLIS, INDIANA, May 1, 1906.

GENERAL ORDERS,
No. 9.

I. Beginning on July 15th and concluding on July 27th, 1906, the Indiana National Guard, constituting the organized militia of the State,

will engage in field and camp service for instruction at the Army Post site near Lawrence, Marion County, Indiana.

II. The Adjutant-General will, on the issuance of this order, immediately proceed to make the necessary arrangements for the transportation of the several organizations of the militia to and from the place of encampment, designated in paragraph I of this order, and will cause to be prepared pay rolls covering payment to be made by the State to the militia for the service performed. He will also take any and all steps necessary to the fulfillment of the spirit of this order as comes within the authority of his department.

III. The Quartermaster-General will place the site selected for the camp in condition to receive the troops, and will provide for the subsistence of the same during the time of said encampment; provide the necessary horses and forage therefor; establish headquarters for the Governor and his staff; procure a supply of water suitable to the needs of the troops encamped, and perform any other service necessary for the fulfillment of the intent of this order not herein enumerated.

IV. The Adjutant-General and Quartermaster-General will, while on duty under this order, establish and maintain during the encampment their respective headquarters in the field at the place of encampment.

V. The Major-General commanding will issue such orders as he deems necessary for the mobilization of the Guard, their equipment, discipline, course of instruction while in camp, and such other matters as the tour of duty contemplated may necessitate.

By order of the Governor.

ORAN PERRY,
Adjutant-General.

STATE OF INDIANA,
OFFICE OF ADJUTANT-GENERAL,
INDIANAPOLIS, June 9, 1906.

GENERAL ORDERS,
No. 10.

I. That part of General Orders No. 9, naming July 18th to 27 inclusive, as the date for the Annual Camp of Instruction, is hereby rescinded, and August 13th to 22d inclusive is designated instead.

II. Paragraphs II, III, IV and V, of General Orders No. 9, will remain in force.

III. This change is made to enable the Indiana National Guard to participate in maneuvers with the troops of the Regular Army, stationed for the summer at Fort Benjamin Harrison.

The Governor believes that association with these troops will result in material benefit to the Guard, and for this reason he especially desires that each organization will present its maximum strength.

IV. Captains of Companies will immediately take steps to equip their commands with everything necessary for the tour, as no requisitions will be honored by the Quartermaster-General after July 10th.

By order of the Governor.

ORAN PERRY,
Adjutant-General.

STATE OF INDIANA,
OFFICE OF ADJUTANT-GENERAL,
INDIANAPOLIS, June 11, 1906.

GENERAL ORDERS,
No. 11.

Permission is hereby granted all troops of the National Guard of other States to enter and pass through the State of Indiana armed and equipped for the purpose of proceeding to and returning from participation in the maneuvers to be held at Fort Benjamin Harrison during the months of July and August, and the rifle practice at Sea Girt, New Jersey, the latter part of August.

By order of the Governor.

ORAN PERRY,
Adjutant-General.

STATE OF INDIANA,
OFFICE OF ADJUTANT-GENERAL,
INDIANAPOLIS, August 24, 1906.

GENERAL ORDER,
No. 12.

The State Rifle Team to compete in the National Match, at Sea Girt, New Jersey, beginning August 27, 1906, will be composed as follows:

CAPTAIN.

Major Charles A. Garrard, Ordnance Department.

COACH.

Captain Robert L. Moorhead, Co. D, 2d Infantry.

SPOTTER.

Captain James N. Robinson, Co. D, 1st Infantry.

TEAM AND ALTERNATES.

1. 2d Lieut. Adolph Kruse, 1st Infantry.
2. 2d Lieut. Louis J. Morgan, 2d Infantry.
3. 1st Lieut. Herbert W. McBride, 2d Infantry.
4. 1st Lieut. Albert Catlin, 1st Infantry.
5. Private Basil Middleton, Co. F, 1st Infantry.
6. 1st Lieut. Benjamin E. Wimer, 1st Infantry.
7. Private Charles B. Haynes, Co. D, 1st Infantry.
8. Sergt. William F. Smith, Co. D, 2d Infantry.
9. Sergt. Arthur J. Perry, Co. H, 2d Infantry.
10. Corporal Al. L. Marshall, Co. D, 2d Infantry.
11. Private Lewis B. Jarrett, Co. D, 2d Infantry.
12. 1st Lieut. Frank L. Bridges, 2d Infantry.

Alternates.

Private William C. McIntire, Co. D, 2d Infantry.
Corporal G. Bradford Denison, Co. K, 3d Infantry.
2d Lieut. Joseph C. Clark, Co. D, 1st Infantry.

All of the foregoing officers and men have been certified to by their respective commanding officers as being regularly commissioned officers or enlisted men of the Indiana National Guard, and as having performed at least seventy-five per cent. of all military duty lawfully required during the preceding year.

General Will J. McKee and General Oran Perry are hereby detailed to accompany the team as observers. The travel enjoined is necessary in the military service.

By order of the Governor.

ORAN PERRY,
Adjutant-General.

STATE OF INDIANA,
OFFICE OF ADJUTANT-GENERAL,
INDIANAPOLIS, IND., September 21, 1906.

GENERAL ORDERS.

No. 13.

I. Paragraphs 89, 90, 91, 93, 94, 95 and 98, Rules and Regulations, Indiana National Guard, are amended to read as follows:

89. The part of paragraph beginning on line sixteen "and make" and ending with the words "last day of the month" on line twenty is revoked.

90. Each accountable officer must make and certify an annual account of property on the proper return blanks, in triplicate, two of which will be mailed direct to the Quartermaster-General on the last day of September, and one retained by the officer. These annual returns must include all Ordnance and Ordnance Stores, Quartermaster's Supplies, State Property, Subsistence Stores, Medical Stores and Supplies, Signal Property, Engineer Property, and Equipage, issued to or in the possession of the command since the last property return. They must also show from what source obtained and be accompanied by the proper vouchers, i. e., invoices. They must show what disposition has been made of any of the property and be accompanied by the proper vouchers for such disposition, i. e., receipts for transfer to other commands; affidavits in triplicate for lost, destroyed or stolen property; Q. M. G. O. Form No. 13 in duplicate, or U. S. A. Form No. 108 in triplicate, for cash settlements.

91. In each case of loss or destruction of property, the affidavit of the accountable officer, in triplicate, must accompany the property return showing how, when and where the loss occurred, and as detailed a statement of the loss as possible. Each set of affidavits must cover but one of the classes of property as set forth in paragraph 90, R. & R., I. N. G.

93. The Quartermaster of the Hospital Corps and the Quartermaster of the Signal Corps will each make a similar annual property return for his respective command.

94. Regimental Commanders will cause annual property returns to be made for the field and staff officers, and the Regimental Adjutants will make an annual property return for the band and non-commissioned staff.

95. The Commanding General will cause similar annual property returns to be made for the staff and non-commissioned staff at headquarters of the Indiana National Guard.

98. All annual property returns will be made in triplicate, one copy retained by the accountable officer and the other two mailed direct to the Quartermaster-General on the last day of September, of which one copy will be returned with such corrections as may be necessary marked thereon. Should any of such corrections be unacceptable to the accountable officer, he must notify the Quartermaster-General direct by return mail of that fact with reasons for the same. Such corrected copy returned to the accountable officer becomes the basis for the next annual property return.

II. General Order No. 7, 1902, Sec. II, is revoked. Deductions may be made from property accountability of the property lost, stolen or destroyed where the triplicate affidavits accompany the return covering the loss. Should such affidavits not be conclusive proof to the board of officers, the accountable officer becomes liable for the money value of the lost property.

By order of the Governor.

ORAN PERRY,
Adjutant-General.

STATE OF INDIANA,
ADJUTANT-GENERAL'S OFFICE,
INDIANAPOLIS, October 1, 1906.

GENERAL ORDER,

No. 14.

I. The gallery rifle practice season will commence November 1, 1906, and close April 30, 1907. Every officer and enlisted man in the infantry organization of the Indiana National Guard will be required to participate in this practice, and the privilege is also extended to the artillery and signal corps.

II. A handsome trophy has been provided by The Indianapolis Star to be presented to the company having the highest average figure of merit for the six months from November, 1906, to April, 1907, inclusive.

III. Monthly returns will be made to Division Headquarters in accordance with Memoranda Order No. 6574, A. A. G. O., 1906. This return must be forwarded not later than the 5th of each month, and will, in all cases, be accompanied by the targets used during the month, and also by a tabulated report showing the classification of each member of the company for the month and the monthly company figure of merit. The method of classification and computing the figures of merit is described below.

IV. All monthly returns and scores will be verified at headquarters and published each month in The Indianapolis Star.

V. Company Commanders will immediately take steps to secure and prepare a suitable gallery range and will make requisition, through proper channel, for the necessary targets and ammunition for the Winchester (Winder) musket, caliber 22, and be prepared to begin a systematic course of firing on the date above designated.

VI. The matter of position, sighting and aiming drills must not be neglected, and Company Commanders must see that each man is properly instructed in these drills, using the methods prescribed in the firing regulations, before permitting him to do any firing with ammunition.

VII. All practice will be conducted on a fifty-foot range with the X, Y and Z targets. For the X target the position will be off-hand, standing as prescribed in the firing regulations for two-hundred-yard range firing. For the Y target the position may be either kneeling or sitting as prescribed for three-hundred-yard range firing, and for the Z target the prone position will be used. Under no circumstances will Commanding Officers permit any deviation from the prescribed distances or positions.

VIII. All classifications will be based on the best full score of ten shots each (targets not necessarily consecutive), fired during the month, at each of the X, Y and Z targets and will be graded as follows:

Fourth Class: All who have not fired.

Third Class: All who have fired less than the required full score of ten shots at each of the three targets, or having fired the required course, have failed to make a total of seventy-five out of a possible one hundred and fifty.

Second Class: All who have fired one or more full scores of ten shots at each of the X, Y and Z targets, and from the best one at each target have made a total of seventy-five out of a possible one hundred and fifty.

First Class: All who have fired one or more full scores as above, and from the best one at each target have made a total of ninety-six out of a possible one hundred and fifty.

Marksman: All who have fired one or more full scores as above, and from the best one at each target have made a total of one hundred and ten out of a possible one hundred and fifty.

Sharpshooter: All who have fired one or more full scores as above, and from the best one at each target have made a total of one hundred and twenty-five out of a possible one hundred and fifty.

Expert: All who have fired one or more full scores as above and from the best one at each target have made a total of one hundred and thirty-five out of a possible one hundred and fifty.

FIGURE OF MERIT.

IX. The Company figure of merit will be computed by multiplying the number of experts by 200; of sharpshooters by 150; of marksmen by 100; of first class men by 75; of second class men by 50; of third class men by 10; and of fourth class men by 0, and dividing the total of the products thus obtained by the aggregate strength of the company as shown by the monthly return for the current month.

Examples of Company figure of merit:

2 experts	$2 \times 200 =$	400
5 sharpshooters	$5 \times 150 =$	750
12 marksmen	$12 \times 100 =$	1,200
10 first class men	$10 \times 75 =$	750
5 second class men	$5 \times 50 =$	250
8 third class men	$8 \times 10 =$	80
13 fourth class men	$13 \times 0 =$	0
55....Total		3,430

$3,430 \div 55 = 62.4$, Company figure of merit.

X. The attention of Company Commanders is particularly directed to the fact that to secure a high figure of merit, the attendance must be kept up to the maximum and all *must* participate in the practice. Absence or failure to practice puts a man in the fourth class, where he counts for naught and is simply an additional burden to be carried by those who do attend and practice.

By order of the Governor.

ORAN PERRY,
Adjutant-General.

STATE OF INDIANA,
ADJUTANT-GENERAL'S OFFICE,
INDIANAPOLIS, November 10, 1906.

GENERAL ORDERS,
No. 15.

The following is published for the information of all concerned:

INDIANAPOLIS, August 24, 1906.

GENERAL ORDERS No. 12,
1906.

The State rifle team to compete in the national match at Sea Girt, New Jersey, beginning August 27, 1906, will be composed as follows:

CAPTAIN—

Major Charles A. Garrard, Ordnance Department.

COACH—

Captain Robert L. Moorhead, Co. D, 2d Infantry.

SPOTTER—

Captain James N. Robinson, Co. D, 1st Infantry.

TEAM AND ALTERNATES—

1. 2d Lieut. Adolph Kruse, 1st Infy.
2. 2d Lieut. Louis J. Morgan, 2d Infy.
3. 1st Lieut. Herbert W. McBride, 2d Infy.
4. 1st Lieut. Albert Catlin, 1st Infy.
5. Private Basil Middleton, Co. F, 1st Infy.
6. 1st Lieut. Benjamin E. Wimer, 1st Infy.
7. Private Charles B. Haynes, Co. D, 1st Infy.
8. Sergt. William F. Smith, Co. D, 2d Infy.
9. Sergt. Arthur J. Perry, Co. H, 2d Infy.
10. Corp. Al L. Marshall, Co. D, 2d Infy.
11. Private Lewis B. Jarrett, Co. D, 2d Infy.
12. 1st Lieut. Frank L. Bridges, 2d Infy.

Alternates. Private William C. McIntire, Co. D, 2d Infy.
Corp. G. Bradford Denison, Co. K, 3d Infy.
2d Lieut. Joseph C. Clark, 1st Infy.

All of the foregoing officers and men have been certified to by their respective commanding officers as being regularly commissioned officers or enlisted men of the Indiana National Guard, and as having performed

at least seventy-five per cent. of all military duty lawfully required during the preceding year.

Gen. Will J. McKee and Gen. Oran Perry are hereby detailed to accompany the team as observers. The travel enjoined is necessary in the service.

By order of the Governor.

ORAN PERRY, Adjutant-General.

October 29, 1906.

To the Adjutant-General:

Sir—Pursuant to the foregoing order, the team left Indianapolis, via Pennsylvania R. R., at 8 o'clock a. m., August 26th, and arrived at Sea Girt Monday, August 27th, about 10.30 a. m.

Tentage and all necessary camp equipment were provided by the National Guard of New Jersey, and by noon the team was comfortably established in their camp.

To afford the men an opportunity to study the elevations and weather conditions, it was decided to enter the entire team in a number of the matches of the National Rifle Association and New Jersey State Rifle Association, which preceded the national matches. These entries were chosen with a view to giving every member of the team ample opportunity for practicing at all the ranges included in the national match, and it is conceded by all that this preliminary practice was probably the greatest factor in making possible the gratifying gain over the scores of the preceding year. Not only were the general atmospheric conditions radically different from any to which the men had been accustomed, but the ammunition of 1906 gives so much greater velocity than the 1901 and 1902 issues, with which they had conducted all their work at home, that it would have been impossible to have done any consistent shooting at the long and mid-ranges without this preparatory practice.

The members of the team were entered in the following individual matches:

Hayes match, 10 shots at 600 yards.

"Trophy" match, 10 shots at 600 yards.

Spencer match, 7 shots at 800 yards.

Wimbledon cup, 10 shots at 600 yards.

And as many as possible were entered in the following team matches:

Company team, five men from Co. D, 2d Regt.

Company tyro, 3-man teams from Co. D, 2d Regt. (2), and Co. D, 1st Infy.

Regimental team, 6 men from 1st and 6 men from 2d Regt.

Regimental skirmish, 6 men from 1st and 6 men from 2d Regt.

Dryden match, team of 8 men.

In addition to the above, nearly all entered at their own expense a number of the "souvenir medal" matches, and Lieut. McBride also competed in the Leech Cup and President's matches.

The relative standing of these entries in the various matches, so far as reported, are shown below:

The national team match was begun on the 4th of September, the 200 and 600-yard stages being completed that day. A strong cross wind made difficult work of the off-hand shooting, and the scores suffered in consequence. Our total at this range, 464, while somewhat below what was expected, was 49 points above that of last year's team, a gain of more than 8 per cent. The 600-yard work was more consistent, the team score of 452 fulfilling all expectations and being 114 points above last year's score, a gain of 19 per cent.

The 800-yard slow fire and 200-yard rapid fire stages were shot the next day, September 5th. It was at this point that the weakness of the team from lack of practice began to show up. The weather conditions were ideal, and the score at 800 yards should have exceeded that at 600. Few of the team members had had any practice at this distance at home, however, and none of them sufficient to give them the confidence which is absolutely essential to consistent shooting. The inevitable result was a slump all the way down the line, and the team total was 410. Even this, however, was 83 points ahead of the 1905 score, a gain of 14 per cent.

The firing at 200 yards rapid fire was probably as good as could have been expected, in view of the fact that there had been no preliminary practice, and as this style of fire is not included in "Special Course C," several members of the team had never even seen an "F" target, much less fire at it. The total here was 441, a gain of 62 points, or 10 per cent.

The skirmish firing was begun next day, followed by 1,000 yards slow fire. Taking into consideration the fact that the team members had fired only two or three times at 1,000 yards, and the well known variations in the service ammunition, the work at this stage was better than was expected, the total, 312, being 165 points, or 25 per cent., ahead of the corresponding score of last year.

The skirmish firing brought out the true weakness of the team. This is a class of fire that requires long and earnest preparation, and no man or team of men can expect to make even a fair average without the expenditure of a great deal of time and ammunition in practice. The total score of the team, 434, was 50 points above last year's, a gain of only about 4 per cent.

A summary of the scores for the whole match shows the following:

	Score.	Possible.	Per Cent.	Per Cent. 1905.	Per Cent. Gain.
Slow fire, 200 yards.....	464	600	77.3	69.2	8.1
Slow fire, 600 yards.....	452	600	75.3	56.3	19
Slow fire, 800 yards.....	410	600	68.3	54.5	13.8
Slow fire, 1,000 yards.....	312	600	52	27.5	24.5
Rapid fire, 200 yards.....	441	600	73.5	63.2	10.3
Skirmish	434	1,200	36.2	32	4.2
	2,513	4,200	59.8	47.8	12

The net result of the match, in so far as our team is concerned, shows a very gratifying improvement. It should not be overlooked, however, that this improvement exists in but three or four companies in the State. The fact that six of the twelve men firing on the team were from one company, while being greatly to the credit of that particular company, is proof conclusive that the subject of rifle practice is not receiving the attention it deserves by the other organizations. A team of this kind should, above all else, comprise the very best talent available, and if two or three organizations work faithfully and systematically to perfect themselves in rifle practice they undoubtedly deserve to reap the honors to the exclusion of those who will not devote the time and effort necessary to become proficient as marksmen. The only way to secure a team that will be evenly balanced in representation of the various subdivisions of the guard is to devise ways and means to make them all indulge in target practice on home ranges until the best shots are developed, and then bring these "best shots" together on a State range for a series of competitions severe enough to test the "staying qualities" of each, and from those making the best average select the State team.

The individual scores in the national team match are shown below, the members being given in the "order of merit" and not in the order in which they fired.

The enforced absence of Lieut. Kruse, who was called home before the beginning of the match, made it necessary to use one of the alternates, and Private McIntire was assigned to fill the vacancy.

		464	452	410	441	434	312 2,513

Owing to the unavoidable delays in completing the various competitions most of the team members were obliged to leave before the conclusion of the national individual match. Those who finished were:

Lieut. McBride	Score 260
Lieut Morgan	Score 239
Private Jarrett	Score 239

The outfit of instruments purchased for the use of the team proved of the greatest value to those members of the team who made any especial effort to perfect themselves in their use. The fact that the officers on the team stood higher than the enlisted men is beyond question due to the fact that they devoted more serious thought and study to the scientific principles involved, and not to any greater natural ability or physical superiority. It is respectfully suggested that it would, perhaps, be worth while to permit commanding officers of companies which are well advanced in rifle practice to draw certain of these instruments from the Quartermaster's Department and instruct all expert riflemen and sharpshooters in their use. This would apply particularly to the micrometer sight adjusters.

Respectfully submitted,

CHAS. A. GARRARD,
Maj. and Ord. O. I. S. P. A., Team Capt.

By order of the Governor.

ORAN PERRY,
Adjutant-General.

STATE OF INDIANA,
ADJUTANT-GENERAL'S OFFICE,
INDIANAPOLIS, IND., January 1, 1906.

CIRCULAR TO COMMANDING OFFICERS,
No. 1.

For the information and guidance of the officers and enlisted men of the Indiana National Guard, I publish below the amounts due organizations on October Rolls, together with deductions made on account of property:

Two thousand thirty-four dollars and one cent shortage in six months, is a record of carelessness and recklessness in the handling of public property that almost challenges belief, and which calls for prompt and speedy reform.

The fault lies with the men who carry away the property from the armories and the officers who permit it. If at any time a Commanding Officer should see fit to allow a man to take his equipment from the armory, he should take a receipt for the items, and thus keep trace of the property.

Preceding the semi-annual inspection Commanding Officers should put their affairs in order, by locating missing property, calling in all property out on receipts, making affidavits to cover legitimate losses, thus preparing the way for a favorable report from the Inspector, and a prompt payment of pay rolls.

Impress your men with the fact, that any time they carry away, or destroy property, they jeopardize their own pay and that of their comrades. I believe that when they thoroughly understand their own interests in this matter, they will assist you in the care of the property and reduce the deductions to practically nothing.

The companies that have no deductions are to be commended, they should have been paid long ago, and in the future, it will be the policy of this Department, to pay all clear rolls on sight. It is up to you to secure prompt payment of your men.

Company Commanders are directed to take immediate steps to recover missing property and adjust their accounts with this office.

I suggest that this circular be read to your companies, and posted in the armories where all may see it.

Very truly,

ORAN PERRY,
Adjutant-General.

STATE OF INDIANA,
ADJUTANT-GENERAL'S OFFICE,
INDIANAPOLIS, INDIANA, January 1, 1906.

CIRCULAR TO COMPANY COMMANDERS,
No. 2.

At the last encampment there was issued to you an elaborate and expensive property book. I wish an answer by return mail to the following question:

Are you prepared to exhibit to an Inspecting Officer this property book, with all of the details written up to date?

Note your answer on space below, and return by first mail.

Very truly,

ORAN PERRY,
Adjutant-General.

(ANSWER)
(To Adjutant-General direct.)

STATE OF INDIANA,
ADJUTANT-GENERAL'S OFFICE,
INDIANAPOLIS, INDIANA, January 1, 1906.

CIRCULAR
No. 3.

The attention of Company Commanders is called to Article IX, Rules and Regulations, relating to company by-laws, and they are directed to comply therewith.

Duplicate copies of the by-laws should be sent to the Adjutant-General, through channel, not later than the first of February, together with a letter giving the name of the Secretary and Treasurer. The bond of the Treasurer should not be less than \$100.00

See Rules and Regulations, Sections 50 to 58.

ORAN PERRY,
Adjutant-General.

STATE OF INDIANA,
ADJUTANT-GENERAL'S OFFICE,
INDIANAPOLIS, February 20, 1906.

CIRCULAR
No. 4.

The following letter is published for the information of the officers and men of the Indiana National Guard:

INDIANAPOLIS, February 17, 1906.

The Adjutant-General, State of Indiana, Indianapolis, Ind.:

Sir—Pursuant to your suggestion, I have the honor to submit the following, pertinent to the care of property and equipment, and the inspection thereof. I am cognizant of the fact that most, if not all, of this information is in the possession of, or at least has been supplied to, all Company Commanders. Some few ideas, briefly put, may, however, be productive of beneficial results.

The care of the rifle is fully covered in the volume issued on that subject; conditions, however, prompt the opinion that in many instances accountable officers are totally devoid of knowledge of the contents of this book. A careful study of it is an absolute necessity if the pieces are to be maintained at their best. The rifle should be oiled thoroughly at all times, but care should be exercised that a surplus of oil is not allowed to remain on the exposed parts and in the magazine and chamber, particularly at the time of inspection. Frequent cleaning is essential, as the oil is prone to gum or harden, and thus interfere with the proper working of the gun's mechanism. Attention should also be given to the chamber in the stock where the oiler and cleaning rod are kept. It was the experience of the writer during the last inspection to find many rifles that clearly showed by the condition of the butt-plate, and the opening to the cleaning rod chamber, that this part of the rifle had not been opened in at least a year's time.

Sight and muzzle covers should be better cared for. Apparently not a single company in the service has at the present moment to exceed twenty-five per cent. of their original number of these useful articles. Care should be exercised by the commanding officers to have these in place when the gun is in the rack at the Armory, and their removal should not be omitted when about to fire. Two instances are known where men have been permitted to accidentally fire the rifle with the covers on. This was as much the fault of the Commander as the man.

The gun-sling has no resemblance to a drum head, and under no circumstances should be as tightly drawn; on the contrary, it should at all times be loose enough to be readily unhooked and lengthened.

When the rifles are received from the State they are properly packed in the cases, and are so cleated that movement and injury to the sights is impossible. The blocks that are used in cleating should be carefully preserved as they are absolutely necessary in packing. The loss of these blocks should be charged the same as other property.

Multi-ball cartridges are issued that the companies may be properly armed in case of necessity for service in riots, and the allowing of the men to carry away or expend this ammunition should be cause for the

preferring of charges against the officer permitting it. Except in case of actual necessity, the original package should not be opened.

Blank shells for gallery practice should be cleaned immediately after firing, and not permitted to corrode.

The set of reloading tools should receive as careful treatment as the finest tools of any mechanic. These should not be left exposed to the dust and moisture, but when not in use (and with the use of the Winder musket companies will use their reloading tools very little) all the tools should be coated with oil and stored away in a perfectly dry place.

Haversacks—Immediately after each encampment or other service of any length of time, all soiled haversacks, leggins and Khaki clothing should be laundered and placed away in good condition. This would prevent the finding of haversacks half filled with stale rations, ants, roaches, and even rodents that frequently destroy beyond repair the texture of the bag.

Canteens—These should be entirely emptied and dried by standing upside down, then placed in a dry place, with the stoppers out, to prevent mustiness. If the canvas covering is soiled it can be cleaned with a scrubbing brush, soap and water, then dried as above described.

Haversack and canteen straps and the leather strap on the leggin should be oiled sufficiently to prevent cracking or brittleness.

Meat cans, tin cups, knives, forks and spoons should be scoured with Sapolio if necessary, and thoroughly dried to prevent rusting.

Blankets, if badly soiled, should be laundered; otherwise, well shaken, or better, beat the dust from them, then pack away in well-closed and tarpaper lined boxes. This will prevent the destruction by moths; also the carrying away by the men.

Ponchos should be spread out and all mud and dust removed by wiping with a wet cloth, then dried and folded, with the rubber side out, to prevent adhesion.

Overcoats—Clean off all mud, thoroughly dust and pack away same as blankets.

Blue clothing should be likewise cared for, or, if kept in the lockers of the men, frequently dusted by beating and brushing (pressing when necessary), and well aired.

The flannel shirt should be laundered as seldom as possible; still, frequently enough to maintain in a presentable condition. After each encampment is sufficient if the Company Commander is careful to see that the men do not wear their shirts at other times than when authorized. Care should be taken to see that all buttons are on, and that small tears and rips are mended.

During the interim between camps the shelter-tent halves should be folded and packed away, the poles and pins sorted, and all broken and split ones, that are unserviceable, replaced. Care should be exercised that the ferrules on the poles are not crushed or buckled.

Last, but not least, the BOOKS of the Company; not alone the Record books, but also the text-books that are issued. These should not be scattered over the community like garden seeds or the fish commission's report that arrives under the congressman's "frank," but as much as is possible with thorough study, should be kept in the Armory. The Record books belong in the Armory at all times, except the company be ab-

sent from their home station, then in the field desk with the company. A comprehensive treatise on the method of keeping the records of a military organization was issued by the War Department in 1904. Copies can be obtained from the Adjutant-General of the State if it has not already been supplied from that office.

The writer is of the opinion that the system at present in vogue in Indiana of charging lost property against the pay roll of the company is bad. If the Commander or other responsible officer was alone held on his bond he would exercise such diligence that the only shortages that would appear are such as should properly come before a Board of Survey.

Very respectfully,

GUY A. BOYLE, Captain and A. D. C.

Commanding officers are directed to read this circular at regular drill, furnish a copy to each lieutenant, first sergeant, quartermaster-sergeant and post one copy in the Armory.

By order of the Governor.

ORAN PERRY,
Adjutant-General.

STATE OF INDIANA,
ADJUTANT-GENERAL'S OFFICE,
INDIANAPOLIS, INDIANA, March 1, 1906.

CIRCULAR
No. 5.

The following instructions, supplemental to General Order No. 4, are published for the guidance of commanding officers:

1. The property will be counted during the afternoon, and should be so arranged that it can be done quickly and accurately. Not less than six men should be detailed to assist. Lists should be made showing the number of articles in hands of men, the number in store and the totals of each.

2. The inspection in heavy marching order will take place at 8 p. m., and the men should be ordered to armories in ample time to prepare their rolls. Shoes must be uniform, either black or tan.

3. Prepare in advance all the data at hand for fully answering questions in the "Memoranda of Inspection, Form No. 11—Militia," which is herewith enclosed. This will be the first thing called for by the inspecting officer. Organization commanders must personally verify all papers in connection with the inspection. The books and papers will be exhibited at the afternoon inspection.

4. The troops will be paid target practice pay, and will be subject to order any time after 1 o'clock p. m. of the day of inspection.

5. It is the ardent desire of the Governor that the Indiana National Guard shall take first rank in the organized militia of the United States, and he expects every officer and man to bend his energies to that end. Be satisfied with nothing less than 100 per cent.

By order of the Governor.

ORAN PERRY,
Adjutant-General.

STATE OF INDIANA,
 ADJUTANT-GENERAL'S OFFICE,
 INDIANAPOLIS, May 1, 1906.

CIRCULAR
 No. 6.

As the time approaches for the observance of Memorial Day on May 30th next, officers and men of the Indiana National Guard are respectfully requested to assist where they can in the preparation of fitting exercises and to participate in the ceremonies of the day at their respective home stations.

It is fitting that not only the memories and glorious deeds of the soldiers of the wars of our country should be appropriately honored, but also that the soldiers of today, who are holding themselves in readiness for service, should their nation need them, be also kept in mind that the proper military spirit for the adequate defense of our country may be maintained. To this end participation by the Indiana National Guard in the events of Memorial Day and recognition of the citizen soldiery by the speakers on that occasion will be an important aid.

Immediately on receipt of this circular Captains of companies will make requisition on Quartermaster-General for such amount of blank ammunition as will be necessary for salutes.

In accordance with the United States Army Regulations the national flag will be displayed at half staff on all armories from sunrise to midday. At noon the flag will be hoisted to the top of the staff and will remain there until sunset.

By command of the Governor.

ORAN PERRY,
 Adjutant-General.

STATE OF INDIANA,
 ADJUTANT-GENERAL'S OFFICE,
 INDIANAPOLIS, July 20, 1906.

CIRCULAR.

To the Members of the 161st I. V. I. and Colored Infantry:

The money recently collected from the U. S. Government for your organizations will be ready for distribution the first week in August. The amounts range from \$3.25 to \$30.00 per man, the average being about \$20.00.

To establish his claim the soldier will have to present his discharge from the service, together with proofs of his identity as described in another paragraph of this circular.

It is not necessary to present the claims in person, in fact it delays payment by doing so, and interferes with the system adopted by this office for the rapid handling of the business.

The soldier should fill out the enclosed power of attorney which authorizes the gentlemen named to transact his business for him, and at the same time establishes his identity. This, with his discharge, should be mailed to the ADJUTANT-GENERAL, INDIANAPOLIS, where it will receive attention in the order in which it is received. His agent who holds his power of

attorney will sign the roll for him and a check on the Union National Bank for the full amount due him, signed by the Governor and countersigned by the Adjutant-General, will be mailed to him, together with his discharge. If the soldier has lost his discharge, he should apply to the Adjutant-General by letter for a certificate showing his military services. In case of the death of a soldier, the payment can be made to his administrator ONLY, and as the expense of taking out letters of administration will be as much as the amount involved, and thus defeat the intention of the State to reimburse the soldier or his heirs, the Governor has decided to ask the coming General Assembly for a special act authorizing him to pay the sums thus involved to the next of kin without additional cost to the recipients.

As there seems to be no other method of handling this part of the distribution, it is hoped that the heirs of the deceased soldiers will accept this explanation and exercise commendable patience until the payment to next of kin may be legalized as suggested.

By order of the Governor.

ORAN PERRY,
Adjutant-General.

Cars of both traction and steam roads will run through to Fort Harrison without change. Requests for transportation for the organizations named herein will be forwarded to commanding officers in ample time. All officers and men detached from above named stations should make application for transportation to this office immediately upon receipt of this circular.

By order of the Governor.

ORAN PERRY,
Adjutant-General.

STATE OF INDIANA,
ADJUTANT-GENERAL'S OFFICE,
INDIANAPOLIS, IND., September 21, 1906.

CIRCULAR

No. 8.

I. Circular No. 1, 1902, "Certificates" is hereby revoked.

II. Affidavits

1. All affidavits of lost or destroyed property must be in triplicate.
2. Such affidavits are eventually filed with the heads of departments, and therefore great care must be exercised not to mix the classes, i. e., Ordnance and Ordnance Stores, Quartermaster's Supplies, State Property, Subsistence Stores, Medical Stores and Supplies, Signal Property, Engineer Property. If any doubt is felt as to the class property belongs, the question should be asked. Company commanders have only the first three, Regimental commanders only have the third, Hospital commanders have the fourth and the last two are issued only to the Signal Corps.

3. No opinion should be expressed as to the responsibility for loss of property. It is useless for the officer to say "due care was used," or that "every effort was made to recover," or similar statements. He must state what care was used and what efforts were made to recover and let the board decide whether they were "due care," or could be called "every effort." A plain, concise statement of all the facts in the case should be made.

4. Each affidavit should show what care has been exercised for the protection of property. If lost in camp, affidavit should show what guard was placed over the property, to whom loss was reported and what effort was made by accountable officer or superiors to trace the loss.

If loss occurred from armory, statement should be made of the condition of armory, state of locks, who held keys, whether property was kept in lockers, or packed in boxes, who had access to it, etc.

5. Affidavit should show what if any effort has been made to recover property or punish offenders.

By order of the Governor.

ORAN PERRY,
Adjutant-General.

STATE OF INDIANA,
 ADJUTANT-GENERAL'S OFFICE,
 INDIANAPOLIS, INDIANA, Nov. 14, 1906.

CIRCULAR
 No. 9.

The following information issued as a supplement to General Orders No. 14:

In order to economize time, increase interest, and habituate the men to shooting in pairs, another Winder rifle will be issued to each organization.

A case of ammunition, containing 10,000 rounds, will also be issued to each company, and commanding officers are directed to keep it under lock and key, issuing each night sufficient for the evening's work. At the close of the match an invoice must be made of balance on hand and reported to this office through the Colonel.

Each man will be required to shoot ten rounds at each target, X Y Z, every week of the season, and always under direction of a commissioned officer. Those who can not attend on regular nights may shoot any other nights of the week arranged for by the commanding officer, who is hereby directed to afford every man full opportunity to perfect himself in gallery practice and thereby increase the figure of merit of his company.

Special attention is directed to paragraph 3, G. O. No. 14.

Accompanying this circular is the blank to be used in making monthly report, with full instructions on the back.

The Indianapolis Star is preparing a full sized half-tone picture of the "Loving Cup," copies of which will be sent to each company for posting in the Armory.

By order of the Governor.

ORAN PERRY,
 Adjutant-General.

BOARD OF SURVEY.

A Board of Survey, consisting of Brig.-Gen. Samuel M. Compton, Retired, and Maj. William H. Kershner, Assistant Commissary-General, were appointed for the settlement of all outstanding matters of property, their report has been filed and approved by the War Department, and the Quartermaster-General has been directed to charge off all such accounts from his books.

REIMBURSEMENT OF OFFICERS AND MEN OF 161ST REGT. INFY.

During the administration of Governor Durbin he was waited upon by Mr. Albert Wishard, Attorney of this city, with the information that he believed that additional pay could be procured for the officers and men of the 161st In-

diana Infantry and two companies (A and B), colored infantry, covering the period of their enrollment to their muster into service, and that he would be willing to undertake the collection of it for a commission of 25 per cent., and a contract was made by the State with Mr. Wishard to that effect.

The prosecution of the claim was successful, a gross amount of \$46,698.47 being allowed by the Government, which, less \$11,674.61, commission allowed attorneys, left a net sum of \$35,023.86 for distribution among those interested. The disbursement of the fund placed in the hands of the Adjutant-General up to this time includes about two-thirds of the men whose claims have been allowed by the Government.

Some have died since their discharge from service, and where there have been administrators of estates the claims have been paid, but there are a number leaving heirs but no estates. For the relief of these, a bill will be introduced in the Legislature legalizing payment to heirs direct without the intervention of an administrator.

The accounts of the late Adjutant-General have been satisfactorily settled and receipts given him for the total amount paid in, \$2,531.96.

The reports of the Adjutant-General, Quartermaster-General and Major-General Commanding will be found on other pages of this report.

Respectfully submitted,

ORAN PERRY,
Adjutant-General.

- 250 Britton's Manual No. 3.
- 5 Prov. Modern Army.
- 5 Straight Army Ration.

The annual camp of instruction was held as heretofore at Fort Benjamin Harrison, August 13th to 22d. Under orders from the War Department, the troops were under command of Brig.-Gen. William H. Carter, U. S. A., and camp transportation, forage, subsistence and quartermaster's stores

were supplied by the Government and charged to the Indiana allotment under the provisions of the Dick Bill and Sec. 1661 Revised Statutes, as amended by Act of June 22, 1906.

All officers connected with the quartermaster and commissary departments of the U. S. A. were courteous and ready at all times to supply the needs of the Guard with everything at their command.

The supply of horses for the Artillery and such officers as are provided for under the law were furnished under contract. It is believed by this department that if suitable stabling could be provided, a better grade of horses could be secured and the damages resulting from accidents, lack of protection from exposure to the hot sun and storms, would not be so great.

In connection with others, on order of the Governor, the Quartermaster-General visited the annual practice of the National Camp for the promotion of Rifle Practice at Sea Girt, N. J., in August of this year, and noticed with no little pride the splendid improvement shown by the Indiana team. It is believed that every encouragement should be given members of the Indiana National Guard to perfect themselves for this annual contest to the end that greater interest in the matter of proficiency in marksmanship may be attained and that Indiana may take her place in this matter as she always has in every important feature of military work, at the top of the list of contestants. This department will most heartily co-operate in every effort toward the betterment of the guard in marksmanship.

Respectfully submitted,

GEO. W. POWELL,
Quartermaster-General.

REPORT OF MAJOR-GENERAL W. J. McKEE, Commanding I. N. G.

HEADQUARTERS INDIANA NATIONAL GUARD,
INDIANAPOLIS, May 2, 1907.

The Adjutant-General, State of Indiana:

Sir—I have the honor to submit the following report of Annual Camp of Instruction at Fort Benjamin Harrison, Indiana, August 13-22, 1906.

The several organizations arrived as per schedule arranged in the A. G. O.

FIELD RETURN.

The change of date originally named for Camp to later in the season had effect upon the attendance. Experience shows the middle of July as suiting the convenience of the greatest number, for the Annual Camp.

Batteries "A" and "B" were attached to the Artillery Battalion of the Regular Army during the entire period, by direction of the Commanding General of the joint camp, and the Signal Company to the Signal Company of the Army. The command of the three Infantry Regiments and Field Hospital of the organized Militia was relinquished to Col. Harry B. Smith, senior Colonel, who exercised command in

all the maneuvers and exercises. To each Regimental and Battalion Headquarters was assigned a junior officer of the Army as instructor.

The first few days were devoted to practice of the several battalions in extended order drill and outpost duty; the latter days of the tour to battle exercises and problems, planned by a board designated for the purpose; all under the direct control and orders of the Brigadier-General commanding joint camp.

The several camp sites were located by officers of the Army and all the sanitary arrangements were under direction of the same. The latrine system was excellent, but the disposal of kitchen garbage and refuse was not at times without inconvenience owing to changeable orders and lack of suitable transportation facilities. The utmost harmony and good-fellowship existed throughout the tour of duty between officers and men of the Army and the National Guard and untiring effort put forth by all the former to impart information and instruction where same was desired or appeared needed.

The maintenance of a heavy Provost Guard of the militia on the boundaries of the Reservation during almost the entire period of the Camp of the Regular troops without ill-feeling being engendered was conclusive evidence of a most satisfactory association of the two services. Conditions necessitating the Provost Guard were anomalous to say the least when it is understood that a portion of the United States Army on a United States Military Reservation were surrounded by a militia Provost Guard to enforce the State statute prohibiting the sale of intoxicating liquor within a mile limit of such Reservation, declared by proclamation of the Chief Executive as a Camp of Instruction.

Troops returned to station by route and at time designated and scheduled from the A. G. O. In this connection, attention is invited to the great inconvenience, not to say detriment to the service, of early hours arranged for departure. Tentage is seldom dry enough in the early morning to be packed for storage and as pay had been allowed

for the day, as well as subsistence issued, there is no known reason why route should be taken before noon by any organization, unless it be two or three Companies stationed at remote corners of the State. The morning of the last day broke stormy and wet and canvas had to be allowed to stand until troops had departed and it was impossible to leave the grounds satisfactorily policed or to handle heavy stores short of employment of a large force of civilians and at considerable extra expense. Troops should be routed to leave only in time for arrival at station by nightfall of last day, those with longest travel to leave first, those within one to four hours of station being held until late in the day so as to be available for the heavy work necessitated by return to Q. M. Depot of temporary issues. This is particularly true in view of the fact that striking tents and handling and packing camp equipage is an important part of the instruction of a soldier.

Respectfully submitted,

WILL J. McKEE,
Maj.-Gen. Comdg.
